Maintenance and Care

- **Cleaning:** Wipe surfaces with a soft, damp cloth. The MDF panels are water-repellent and easy to clean. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Spills:** Promptly wipe up any spills to prevent moisture damage, despite the water-repellent properties.
- **Inspection:** Periodically check all fasteners and tighten them if necessary to maintain stability.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading or discoloration.
- **Humidity:** Maintain a stable room temperature and humidity level to prevent warping or cracking of the wood panels.

- **Cabinet is Wobbly:**
 - Ensure all screws and fasteners are securely tightened.
 - Verify that the cabinet is placed on a level surface. Adjust if necessary.
- **Drawers Do Not Slide Smoothly:**
 - Check that the drawer slides are correctly installed and aligned.
