Connect Port Introduction

Image: Close-up view of the monitor's connection ports. On one side: Power input, Audio Jack, Menu buttons (Manu +/-), and OTG port (for Keyboard & Mouse). On the other side: Mini HDMI port and two USB-C (Full Function) ports.

Setup

Follow these steps to set up your FOOWIN Portable Monitor:

1. **Power Connection:** Connect the monitor to a power source using the provided USB-C to USB-A cable and a compatible power adapter (not included). Ensure sufficient power is supplied to avoid flickering or instability.

2. **Device Connection:**

   - **USB-C (Full Function):** For devices with a full-featured USB-C port (e.g., some laptops, MacBooks, phones), use the provided USB-C to USB-C cable. This single cable can transmit both video signal and power.

   - **Mini HDMI:** For devices with an HDMI output (e.g., PS5/PS4, Xbox, Switch, desktop PCs, laptops), use the provided Mini HDMI to HDMI cable. An additional USB-C to USB-A cable will be required for power.

3. **Positioning:** Use the magnetic smart cover to prop up the monitor in your desired viewing angle. The cover can be folded to create a stable stand.

4. **Audio:** If you prefer external audio, connect headphones or external speakers to the 3.5mm Audio Jack. The monitor also has built-in speakers.

5. **Peripherals (OTG):** If your device supports OTG (On-The-Go) functionality via the monitor, you can connect a keyboard or mouse to the OTG USB port on the monitor.

Operating the Monitor

The FOOWIN Portable Monitor offers various display modes and settings for optimal use.

On-Screen Display (OSD) Menu

Use the "Manu +/-" buttons located on the side of the monitor to navigate the OSD menu. These buttons typically control power, menu access, and navigation within the menu.

- Press the Menu button to open the OSD.
- Use the +/- buttons to navigate through options.
- Press the Menu button again to select an option or confirm a setting.
- Common settings include Brightness, Contrast, Color Temperature, Input Source, and Aspect Ratio.

Display Modes

The monitor supports multiple display modes, configurable through your connected device's display settings:

- **Duplicate Mode:** Mirrors the content of your primary screen. Ideal for presentations or sharing content.
- **Extend Mode:** Extends your desktop workspace, allowing you to have different applications open on each screen. Increases productivity.
- **Second Screen Mode:** Uses only the portable monitor as the display.
- **Portrait Mode:** Rotates the display 90 degrees for vertical viewing. Useful for coding, document viewing, or social media feeds. (Note: May require manual rotation settings on your connected device and an external stand for stability.)

Maintenance

Proper care and maintenance will extend the life of your portable monitor.

- **Cleaning the Screen:** Use the provided screen cleaning cloth or a soft, lint-free cloth. For stubborn smudges, lightly dampen the cloth with water or a screen-safe cleaning solution. Do not spray liquid directly onto the screen.
- **Cleaning the Body:** Wipe the monitor's body with a soft, dry cloth. Avoid abrasive cleaners.
- **Magnetic Smart Cover:** The cover is scratch-proof and water-proof. Wipe it clean with a damp cloth if necessary. Ensure it is properly positioned to protect the screen during transport.
- **Storage:** When not in use, store the monitor in a cool, dry place, protected by its smart cover. Avoid extreme temperatures and direct sunlight.
- **Handling:** The monitor is designed to be portable but is still a delicate electronic device. Avoid dropping it or

applying excessive pressure to the screen.

Troubleshooting

If you encounter issues with your FOOWIN Portable Monitor, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
No Signal / Black Screen	- Ensure all cables (power and video) are securely connected. - Verify the input source on the monitor's OSD matches your connection (USB-C or HDMI). - Check your connected device's display settings to ensure it's configured to output to an external monitor (e.g., extend or duplicate display). - Try a different cable or port if available.
Monitor Flickers / Turns Off Randomly	- This often indicates insufficient power. Ensure you are using a power adapter that provides enough wattage (e.g., 5V/2A or higher). - If using a single USB-C cable for power and video, ensure your device's USB-C port can supply enough power. Try connecting an external power source to the monitor's dedicated power input. - Reduce monitor brightness if the issue persists, especially when powered solely by a device.
No Audio from Monitor Speakers	- Check the volume settings on both the monitor's OSD and your connected device. - Ensure the audio output on your connected device is set to the FOOWIN monitor.
Image Quality Issues (Blurry, Distorted Colors)	- Ensure the display resolution on your connected device is set to 1920x1080 (FHD). - Check cable connections for looseness or damage. - Adjust brightness, contrast, and color settings via the monitor's OSD.

If the problem persists after trying these solutions, please contact FOOWIN customer support.

Specifications

Feature	Detail
Brand	FOOWIN
Model	VP525
Screen Size	15.8 Inches
