LOCK & LOCK KIT820AN

LOCK & LOCK 1.6L Rectangular Food Storage Containers Instruction Manual

Model: KIT820AN

INTRODUCTION

Thank you for choosing LOCK & LOCK 1.6L Rectangular Food Storage Containers. These containers are designed for optimal food preservation, featuring an advanced four-side locking system and a silicone seal to ensure airtight and leak-proof storage. Made from durable, BPA-free plastic, they are safe for use in the microwave, freezer, and dishwasher. This manual provides essential information for the proper use and care of your new containers.

PRODUCT FEATURES

- **Airtight & Leak-Proof Seal:** Equipped with a four-side locking system and a hollow silicone gasket for superior sealing.
- **Durable Construction:** Made from high-quality, BPA-free polypropylene plastic, designed for long-lasting use.
- **Versatile Use:** Safe for microwave, freezer, and dishwasher.
- **Space-Saving Design:** Rectangular shape and stackable for efficient storage in refrigerators, freezers, and cabinets.
- **Capacity:** Each container holds 1.6 liters.

SETUP

1. **Unpack:** Carefully remove the containers from their packaging.
2. **Initial Cleaning:** Before first use, wash the containers and lids thoroughly with warm, soapy water. Rinse completely and dry.
3. **Inspect:** Check the silicone gasket and locking tabs for any damage or deformities. Ensure the gasket is properly seated in the lid groove.

OPERATING INSTRUCTIONS

Sealing the Container

1. **Fill:** Place food or items into the container. Do not overfill; leave some space for the lid.
2. **Position Lid:** Align the lid with the container, ensuring the silicone gasket is properly seated.
3. **Lock Tabs:** Press down firmly on each of the four locking tabs until they click into place. This creates the airtight and leak-proof seal.

FOUR SIDE LOCKING SYSTEM

Locknlock Silicone
with a hollow gasket makes space
for air to be compressed, creating a
100% airtight seal

**Other Brands
Generic Silicone**

Without the hollow center,
does not provide airtightness

Image: Detailed view of the four-side locking mechanism and the hollow silicone gasket, illustrating how it creates an airtight seal.

Opening the Container

1. **Release Tabs:** Gently lift each of the four locking tabs outwards until they disengage from the container base.
2. **Remove Lid:** Lift the lid off the container.

Microwave Use

- When microwaving, always unlatch all four locking tabs and slightly open the lid to allow steam to escape. This prevents pressure buildup.
- Do not use the container in a conventional oven, under a grill, or on a stovetop.
- Avoid heating oily or sugary foods for extended periods, as they can reach very high temperatures and potentially damage the container.

Freezer Use

- Containers are safe for freezer storage.
- Allow hot foods to cool before placing them in the freezer to prevent thermal shock and potential damage to the container or food.

MAINTENANCE AND CARE

Cleaning

- **Dishwasher Safe:** Containers and lids are safe for the top rack of a dishwasher.
- **Hand Washing:** For best results and to prolong the life of the silicone gasket, hand washing with warm, soapy water is recommended.
- **Stain Removal:** For stubborn stains, a baking soda paste can be used. Apply the paste, let it sit for a few hours, then wash and rinse.
- **Odor Removal:** To remove odors, wash thoroughly and air dry with the lid open. Placing a crumpled newspaper inside for a day can also help absorb odors.
- **Gasket Care:** The silicone gasket can be removed for thorough cleaning if necessary. Ensure it is properly re-inserted before sealing.

Image: Illustration detailing the durability, 4-hinge locking system, and airtight seal of the containers, emphasizing their robust design.

Storage

- Store containers with lids unlatched or slightly ajar to prevent odors from being trapped.
- The containers are designed to be stackable for compact storage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Lid does not seal properly.	Gasket is dislodged or dirty. Container is overfilled.	Ensure the silicone gasket is correctly seated in the lid. Clean the gasket and lid. Reduce contents if overfilled.
Container leaks.	Lid not properly latched. Gasket is damaged or missing.	Ensure all four locking tabs are securely latched. Check the gasket for damage; replace if necessary.
Stains or odors persist.	Strongly colored or odorous foods.	Clean with a baking soda paste. Air dry with lid open. For persistent odors, try placing crumpled newspaper inside.
Lid warps in microwave.	Lid was fully sealed during microwaving.	Always unlatch all four tabs and slightly open the lid when microwaving to allow steam to escape.

SPECIFICATIONS

- **Model Number:** KIT820AN
- **Brand:** LOCK & LOCK
- **Capacity:** 1.6 Liters per container
- **Quantity:** Set of 2 containers
- **Dimensions (L x W x H):** 23.2 cm x 16.5 cm x 6.9 cm (approximately 9.13 x 6.5 x 2.72 inches)
- **Weight:** 300 Grams (per container, approximate)
- **Material:** BPA-free Polypropylene Plastic
- **Color:** Transparent
- **Special Features:** Airtight, Leak-proof, Microwave Safe (with lid unlatched), Freezer Safe, Dishwasher Safe (top rack recommended), Stackable.
