Initial Power-On

1. Connect the included AC adapter to the DC IN jack on the rear panel of the piano.
2. Plug the AC adapter into a suitable wall outlet.
3. Press the POWER button located on the control panel to turn on the instrument. The indicator light will illuminate.
4. Adjust the VOLUME knob to a comfortable listening level.

OPERATING INSTRUCTIONS

Realistic Piano Feel and Response (RH3 Keybed)

The LP-380U features Korg's Real Weighted Hammer Action 3 (RH3) keyboard. This keybed is designed to replicate the feel of a traditional acoustic grand piano, with a heavier touch in the lower register that gradually becomes lighter as you move towards the higher notes. This graded hammer action provides an authentic and expressive playing experience.

RH3 GRADED HAMMER ACTION KEYBED

- Korg's premium RH3 action has four weight zones, to more accurately replicate the key weights of an acoustic piano from the top of the note range to the bottom.

Excellent Sound Quality

Explore a rich palette of 30 high-quality sounds, including various expressive pianos, vintage electric pianos, vibrant strings, and more. The LP-380U offers several modes to enhance your musical expression:

- **Layer Mode:** Allows you to play two different sounds simultaneously, such as piano and strings, for a richer, more complex timbre.
- **Partner Mode:** Divides the keyboard into two identical sections, enabling two players to play in the same pitch range simultaneously. This is ideal for lessons or duets.

Modern Connectivity

The LP-380U is equipped with USB Audio and MIDI capabilities, providing flexible connectivity options for modern music production and learning environments. Connect to your computer or smart device to:

- Utilize recording software for capturing your performances.
- Control virtual instruments for expanded sound possibilities.
- Engage with piano learning applications to enhance your skills.

A free software bundle is often included, which may provide access to piano learning software and other useful applications.

3-Pedal Unit

The LP-380U comes with a standard 3-pedal unit, replicating the functionality found on a traditional grand piano. These pedals allow for expressive playability:

- **Damper Pedal (Right):** Sustains notes. Supports realistic half-pedaling.
- **Sostenuto Pedal (Middle):** Sustains only notes held down at the moment the pedal is pressed.
- **Soft Pedal (Left):** Softens the sound. Supports realistic half-pedaling.

Slim & Compact Design

Designed to complement any interior, the LP-380U boasts an elegant and compact profile. With a depth of merely 26cm (approximately 10.2 inches), it is slim enough to fit comfortably in various living spaces. The wooden key cover, when closed, provides a flat top surface, allowing the instrument to blend seamlessly into your room's decor.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the piano. For stubborn dirt, slightly dampen the cloth with water and a mild, neutral detergent, then wipe dry immediately. Avoid abrasive cleaners or solvents.
- **Key Care:** Keep the keys clean. If they become dirty, wipe them with a soft cloth dampened with water and a small amount of mild soap.
- **Storage:** When not in use, close the key cover to protect the keys and internal components from dust.
- **Environment:** Avoid exposing the instrument to extreme temperatures, humidity, or direct sunlight, as these can cause damage.

TROUBLESHOOTING

If you encounter issues with your KORG LP-380U, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No sound	Volume too low; headphones connected; incorrect sound selection.	Increase VOLUME knob; disconnect headphones; select a sound.
Power does not turn on	AC adapter not properly connected; power outlet issue.	Check all power connections; try a different outlet.
Keys feel unresponsive or sticky	Dust or debris under keys; liquid spill.	Clean keys and surrounding area; if liquid spill, discontinue use and seek professional service.
USB MIDI/Audio not working	Incorrect driver; software settings; cable issue.	Install latest drivers from KORG website; check software MIDI/Audio settings; try a different USB cable.
