1. **Unpack and Identify Parts:** Lay out all panels and hardware. Refer to the included parts list to ensure everything is present.

7. Troubleshooting

Problem	Possible Cause	Solution
Cabinet does not fit around sink pedestal.	Incorrect measurements or sink type.	Verify sink dimensions against cabinet specifications (Faucet Hole: 7 9/16" W x 8 7/16" D). This cabinet is designed for pedestal sinks.
Doors do not close properly.	Hinges are loose or misaligned; magnetic catches are not aligned.	Check and tighten hinge screws. Adjust hinges for proper door alignment. Ensure magnetic catches are correctly installed and aligned.
Cabinet feels unstable.	Loose connections; not secured to wall.	Ensure all assembly screws are tightened. Use the provided wall-mounting hardware to secure the cabinet to the wall for enhanced stability.
