Rechargeable Living Glow Rechargeable LED Bulbs (6-Pack)

Living Glow Rechargeable LED Bulbs User Manual

Model: Living Glow Rechargeable LED Bulbs (6-Pack)

Brand: Rechargeable

1. INTRODUCTION

These Living Glow rechargeable LED bulbs are designed to provide reliable illumination, functioning as standard light bulbs during normal power and automatically switching to emergency lighting during power outages. They are versatile, working in multi-socket applications in various lamps and light fixtures. The bulbs are designed to charge automatically with everyday use.

Key features include:

- Easy-to-use emergency light: Simply screw the rechargeable LED bulb into any lamp or light fixture as you would a typical light bulb.
- Extended LED life: Approximately 50,000 hours, equivalent to about 45 years of typical use.
- Portable power cap: Enables the bulb to function as a portable lantern.
- Automatic charging: Charges with everyday use when plugged into a powered socket.
- Emergency lighting: Provides up to 6 hours of illumination in low mode during power outages.
- Automatic activation: When a power outage occurs, the bulb's built-in battery activates to keep your home lit.

2. SETUP

1. **Initial Installation:** Screw the Living Glow rechargeable LED bulb into any standard lamp or light fixture socket. Ensure the fixture is connected to a power source.
2. **Charging:** The bulb will automatically charge its internal battery during normal use when the fixture is powered on. No special charging procedure is required for daily use.
3. **Using the Power Cap for Portability:**
 - To use the bulb as a portable lantern, carefully unscrew the bulb from its fixture.
 - Attach one of the provided power caps to the base of the bulb by screwing it on.
 - Once the power cap is attached, the bulb can be turned on/off using the switch on the cap.
 - For hanging, attach one of the provided hanging hooks to the loop on the power cap.

Figure 4: The six hanging hooks provided for portable use of the bulbs.

3. OPERATING INSTRUCTIONS

- **Standard Operation:** When screwed into a powered lamp or fixture, the Living Glow bulb functions as a regular LED light bulb. Use the lamp's switch to turn it on or off.
- **Emergency Mode:** In the event of a power outage, the bulb's internal battery will automatically activate, providing emergency lighting. This transition is seamless.
- **Portable Lantern Mode:** As described in the Setup section, attach a power cap to the bulb. The switch on the power cap allows you to turn the bulb on and off independently of a lamp fixture, making it ideal for portable use.

Figure 5: Visual comparison of daylight and soft light settings, demonstrating potential light color options (note: this product is Daylight White).

4. MAINTENANCE

- **Charging:** The bulbs are designed to charge automatically during everyday use when installed in a powered fixture. Ensure they are regularly used in a powered socket to maintain battery charge.
- **Storage:** If storing bulbs for an extended period, it is recommended to periodically charge them to maintain battery health.
- **Cleaning:** Clean the bulbs with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.
- **Lifespan:** The LED components have an estimated lifespan of 50,000 hours.

5. TROUBLESHOOTING

- **Bulb not lighting up in emergency mode:**
 - Ensure the bulb has been sufficiently charged by being in a powered fixture for an adequate period.
 - Check if the power cap is securely attached if using it in portable mode.
- **Bulb not lighting up in standard mode:**
 - Verify that the lamp or fixture is properly plugged into a working wall outlet.
 - Check the lamp's switch to ensure it is in the "on" position.
 - Ensure the bulb is screwed in tightly into the socket.
- **Brightness seems low:**
 - These bulbs provide 800 lumens of brightness. If you are comparing them to higher lumen bulbs, they may appear less bright.
 - Ensure the bulb is fully charged for optimal performance.

6. SPECIFICATIONS

Feature	Detail
Brand	Rechargeable
Light Type	LED
Special Feature	Rechargeable
Wattage	60 watts (Incandescent Equivalent), 9.5 Watts (Light Source)
Bulb Shape Size	A15
Bulb Base	B15D
Specific Uses	Emergency, Portable, General Lighting
Light Color	Daylight White
Voltage	3 Volts (DC)
Unit Count	6 Count
Color Temperature	5000 Kelvin
Brightness	800 Lumen
Shape	Arbitrary (A)
Material	Copper
Connectivity Technology	Normal bulb
Indoor/Outdoor Usage	Indoor
Power Source	Battery Powered
Color Rendering Index	80
Average Life	50000 Hours
Batteries	1 CR123A batteries required (included)
Item Weight	1.21 pounds
Package Dimensions	13.07 x 10 x 3.19 inches

7. WARRANTY AND SUPPORT

Specific warranty information for Living Glow Rechargeable LED Bulbs is not provided in the product details. Please refer to the product packaging or contact the manufacturer directly for warranty details and customer support. For further assistance, you may visit the product page on Amazon or contact the seller, Winford & Company, through the Amazon platform.
