SETUP AND ASSEMBLY INSTRUCTIONS

Follow these steps carefully for proper assembly. It is recommended to assemble the unit with two people.

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface (e.g., a blanket or cardboard) to prevent scratches. Identify each part using the provided parts list.
2. **Assemble the Metal Frame:** Connect the vertical and horizontal metal frame components using the provided screws and Allen key. Ensure all connections are firm but do not fully tighten screws until all parts are aligned.
3. **Attach Shelf Boards:** Place the shelf boards onto the designated frame sections. Secure them with the appropriate screws. Start with the bottom shelf and work your way up.
4. **Install Adjustable Feet:** Screw the adjustable feet into the bottom of the metal frame. These can be adjusted later to level the unit on uneven floors.
5. **Attach Side Hooks:** Secure the four side hooks to the designated holes on the side of the metal frame.
6. **Install Anti-Tip Device:** Position the assembled shelf in its desired location. Mark the wall where the anti-tip device will be secured. Drill a pilot hole, insert the wall anchor, and then attach the anti-tip strap to both the shelf and the wall using the provided screws. This step is crucial for safety.

- **Check Connections:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary to maintain stability.
