PowerPac PP303

POWERPAC ULTRASONIC INSECT REPELLENT MOSQUITO KILLER (PP303) User Manual

INTRODUCTION

This manual provides instructions for the safe and effective use of the PowerPac Ultrasonic Insect Repellent Mosquito Killer, model PP303. Please read this manual thoroughly before operating the device and retain it for future reference. The PowerPac PP303 utilizes ultrasonic waves to repel various flying insects such as house-flies, mosquitoes, bugs, and crickets within an area of approximately 200 square meters. It is designed for indoor use in various environments including homes, dining rooms, hotels, hospitals, offices, storage areas, and farms.

IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before using the appliance.
- Do not expose the device to water or moisture.
- Do not attempt to open or repair the device yourself. Refer all servicing to qualified personnel.
- Keep out of reach of children and pets.
- Ensure the power outlet voltage matches the device's specifications (AC210-230V, 50Hz).
- Unplug the device from the outlet when not in use or before cleaning.
- Do not cover the device during operation.

SETUP

1. **Unpacking:** Carefully remove the PowerPac PP303 from its packaging. Inspect the device for any signs of damage.
2. **Placement:**
For optimal performance, install the device in the area with the most severe pest activity first. Once pest elimination begins in that region, relocate the product to a central location within the housing (e.g., living room) or near common entry points for pests.
Ensure the device is placed in an open area, free from obstructions that could block the ultrasonic waves. Avoid

placing it behind furniture, curtains, or other large objects.

The device should be positioned approximately 20-80 cm (8-31 inches) from the floor.

3. **Power Connection:** Plug the device directly into a standard AC210-230V, 50Hz wall outlet. The device features a 3-pin plug for secure connection.

OPERATING INSTRUCTIONS

- **Power On:** Once plugged into a suitable power outlet, the device will automatically power on. A small indicator light (if present) will illuminate, signifying operation.
- **Continuous Operation:** For best results, the PowerPac PP303 should operate continuously, 24 hours a day.
- **No Noise Operation:** This device operates silently, producing no audible noise during use.
- **Initial Results:** It may take several days to weeks to observe a significant reduction in pest activity. Continuous use is crucial for long-term effectiveness.

MAINTENANCE

- **Cleaning:**

Before cleaning, always unplug the device from the power outlet.

Wipe the exterior of the device with a soft, dry cloth. Do not use water, solvents, or abrasive cleaners, as these can damage the unit.

- **Storage:** If storing the device for an extended period, unplug it and keep it in a cool, dry place, away from direct sunlight and moisture.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not working (no indicator light)	No power supply.	Check if the device is properly plugged into a working power outlet. Test the outlet with another appliance.
Pest activity persists or increases initially	Initial adjustment period for pests; device not optimally placed; severe infestation.	Allow 2-4 weeks for full effectiveness. Ensure the device is not obstructed and is placed in an open area. Consider using multiple units for larger or heavily infested areas.
Reduced effectiveness over time	Device obstructed; environmental changes; device malfunction.	Verify placement and ensure no new obstructions. Clean the device. If issues persist, contact customer support.

SPECIFICATIONS

Feature	Detail
Model	PP303
Brand	PowerPac
Input Voltage	AC210-230V
Frequency	50Hz
Power Consumption	5-8 Watts
Effective Area	Approx. 200 sq meters
Dimensions (approx.)	5.5 x 4.5 x 10.5 cm
Plug Type	3-pin plug
Special Features	No Radiation, AI Chip, Energy Saving, No Noise
Color	Black
Finish	Plastic
