chefhandy 6700

Chefhandy Baby Bottle Sterilizer and Dryer Model 6700

Instruction Manual

Introduction

Thank you for choosing the Chefhandy Baby Bottle Sterilizer and Dryer. This 2-in-1 appliance is designed to provide fast, effective, and convenient sterilization and drying for baby bottles, pacifiers, breast pump parts, and other baby items. Please read this manual thoroughly before use to ensure safe and optimal operation.

Important Safety Information

- Always place the unit on a stable, heat-resistant surface.
- Keep out of reach of children.
- Do not immerse the base unit in water or other liquids.
- Use only purified water to prevent mineral buildup on the heating plate.
- Do not open the lid during operation, as hot steam can cause burns.
- Allow the unit to cool completely before cleaning or storing.
- Unplug the unit when not in use and before cleaning.

Package Contents

Please check that all items are present in your package:

- Chefhandy Sterilizer and Dryer Base Unit
- Bottle Rack
- Accessory Tray
- Lid
- Measuring Cup
- Tongs

Product Overview

Familiarize yourself with the components of your Chefhandy Sterilizer and Dryer.

The Chefhandy Baby Bottle Sterilizer and Dryer features an intuitive LED display and control buttons for easy operation. The unit is shown with bottles and pacifiers placed inside for sterilization.

The unit consists of a base with a heating plate, a bottle rack for holding bottles upright, an accessory tray for smaller items like pacifiers and nipples, and a lid to contain the steam. The front panel features an LED display and touch-sensitive buttons for selecting modes and controlling the device.

The heating plate is designed with a high-density coating for efficient and safe operation.

The unit incorporates a filter air purification system to ensure clean air circulation during the drying process.

Setup

1. **Unpack and Clean:** Remove all components from the packaging. Wash the bottle rack, accessory tray, and lid with warm soapy water, rinse thoroughly, and dry. Wipe the base unit with a damp cloth.
2. **Placement:** Place the sterilizer and dryer on a flat, stable, and heat-resistant surface, away from direct sunlight and heat sources. Ensure there is adequate ventilation around the unit.
3. **Add Water:** Using the provided measuring cup, add approximately 4 oz (130 ml) of purified water to the heating plate in the base unit. Do not exceed the 'MAX' water level indicator. Using purified water helps prevent mineral buildup.
4. **Load Items:** Place clean bottles upside down on the bottle rack. Arrange pacifiers, nipples, and other small accessories on the accessory tray. The unit can hold up to 6 bottles and various accessories.
5. **Secure Lid:** Place the lid securely on top of the unit.

The sterilizer offers flexible placement options to accommodate up to 6 bottles and various accessories.

This versatile unit can sterilize and dry not only bottles but also pacifiers, toys, and tableware.

Operating Instructions

The Chefhandy Sterilizer and Dryer offers three operating modes:

1. **Power On:** Plug the unit into a 110V (AC) power outlet. Press the **Power On/Off** button to activate the unit. The LED display will light up.
2. **Sterilize Only Mode (Steam):**
    - Press the **Steam** button. The display will show '10' for 10 minutes of sterilization.
    - The unit will begin heating the water to produce high-temperature steam, effectively sterilizing the contents.
    - Once the 10-minute cycle is complete, the unit will beep and automatically shut off.
3. **Dry Only Mode (Dryer):**
    - Press the **Dryer** button repeatedly to cycle through drying times: 50, 40, or 30 minutes. Select your desired drying time.
    - The unit will circulate warm air to dry the contents.
    - After the selected drying time, the unit will beep and automatically shut off.
4. **Sterilize & Dry Mode (Auto):**

- Press the **Auto** button repeatedly to cycle through combined cycles: 60, 50, or 40 minutes. These cycles typically include 10 minutes of sterilization followed by the remaining time for drying.
- The unit will first sterilize with steam, then automatically switch to the drying function.
- Upon completion, the unit will beep and automatically shut off.

Your browser does not support the video tag.

This video demonstrates how to operate the Chefhandy baby bottle steam sterilizer, including adding water, loading items, and selecting different modes.

The unit provides fast sterilization in just 10 minutes, ensuring items are thoroughly cleaned.

The LED display clearly shows the remaining working time. The device will auto-off with a beep reminder when the cleaning cycle is complete.

Maintenance

1. **Cleaning the Heating Plate:** After each use, allow the heating plate to cool down completely. Wipe the heating plate with a soft, damp cloth or paper towel to remove any water residue or mineral deposits. For stubborn deposits, a solution of vinegar and water can be used, followed by rinsing with clean water and wiping dry.
2. **Cleaning Other Components:** The bottle rack, accessory tray, and lid can be washed with warm soapy water and rinsed thoroughly. They are also top-rack dishwasher safe.
3. **Exterior Cleaning:** Wipe the exterior of the base unit with a damp cloth. Do not use abrasive cleaners or immerse the base in water.
4. **Storage:** Store the unit in a clean, dry place when not in use.

The heating plate is easy to clean; simply wipe it down after each use once cooled.

Troubleshooting

- **Unit not turning on:** Ensure the power cord is securely plugged into a working outlet. Check if the power button has been pressed.
- **Sterilization/Drying not effective:** Ensure the lid is properly closed. Verify that the correct amount of purified water was added to the heating plate. Make sure items are arranged to allow steam and air circulation.
- **Excessive mineral buildup:** Use purified or distilled water to minimize mineral deposits. Regularly clean the heating plate as described in the Maintenance section.

Specifications
