7. MAINTENANCE AND CARE

- **Cleaning:** Use a soft, dry cloth to gently wipe the figure. Avoid abrasive cleaners or solvents, as these can damage the paint and plastic.
- **Storage:** Store the figure in a cool, dry place away from direct sunlight and extreme temperatures to prevent discoloration or material degradation.
- **Handling:** Always handle the figure by its main body parts. Avoid excessive force on small or delicate components during posing or transformation.

8. TROUBLESHOOTING

- **Stiff Joints:** If a joint feels too stiff, gently work it back and forth a few times. Do not force it. Applying a very small amount of silicone shock oil (not petroleum-based lubricants) to the joint may help, but proceed with caution.
- **Parts Not Aligning:** During transformation, ensure all previous steps are correctly completed. Check for any misaligned tabs or panels that might be obstructing the next step. Refer to the visual instructions

provided with the figure.

- **Loose Parts:** If a part becomes loose, inspect it for any damage. For minor looseness, a small amount of clear nail polish or a specialized joint tightener can be applied to the peg or ball joint, allowed to dry, and then reassembled.
