ASSEMBLY INSTRUCTIONS

Assembly of the Zinus Yelena bed frame is designed to be straightforward and can typically be completed by two people in under an hour. All parts are clearly numbered for easy identification.

- 1. Unpack and Identify Parts:** Lay out all frame sections, legs, and slats. Match each part to the corresponding number in the instruction manual. The hardware kit includes an Allen wrench and a convenient ratchet tool for tightening bolts.
- 2. Assemble Frame Sections:** Connect the head and foot sections to the side rails using the provided bolts. Ensure all connections are secure but do not fully tighten until the entire frame is assembled. The parts are numbered to guide correct connections.
- 3. Attach Support Legs:** Securely attach the central support legs to the frame. These legs provide additional stability and weight distribution.
- 4. Insert Steel Slats:** Place the steel slats across the frame. The slats are designed to fit into designated slots on the side rails. Some slats may have non-slip tape on the upper surface; ensure this side faces upwards to prevent mattress movement.
- 5. Final Tightening:** Once all components are in place, use the provided ratchet tool to fully tighten all bolts. This ensures the frame is stable and secure.
- 6. Headboard Attachment (Optional):** The bed frame features pre-drilled holes on the legs at the head of the bed, allowing for easy attachment of a standard-sized headboard (sold separately).

USAGE GUIDELINES

The Zinus Yelena platform bed frame is designed to support your mattress directly, eliminating the need for a box spring. This design also provides significant under-bed clearance for storage.

- **No Box Spring Required:** Place your latex, memory foam, or spring mattress directly onto the steel slats.
- **Under-Bed Storage:** The 16.38 inches of ground-to-item distance offers ample space for storing boxes, bins, or other items, helping to maximize your room's utility.
- **Mattress Stability:** The steel slats are equipped with non-slip tape to help keep your mattress securely in place and prevent it from sliding.

MAINTENANCE

To ensure the longevity and continued performance of your Zinus Yelena Metal Platform Bed Frame, follow these simple maintenance tips:

- **Regular Cleaning:** Wipe down the metal frame with a soft, damp cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners that could damage the finish.
- **Check Connections:** Periodically inspect all bolts and connections to ensure they remain tight. Retighten any loose bolts using the provided Allen wrench or ratchet tool to maintain stability and prevent squeaking.
- **Inspect Slats:** Ensure all steel slats are properly seated in their designated positions.

TROUBLESHOOTING

- **Mattress Sliding:** If your mattress tends to slide, ensure the non-slip tape on the steel slats is clean and free from dust. If the tape is worn, consider replacing it or adding additional non-slip material between the mattress and slats.

- **Squeaking or Noise:** Check all bolts and connections for tightness. Loose bolts are a common cause of noise. The frame also includes foam padding on the center support bar to minimize metal-on-metal contact and reduce noise.
- **Frame Instability:** Verify that all legs are evenly placed on the floor and that all bolts are fully tightened. Ensure the frame is assembled on a flat, level surface.
