Bytech CL-LP-CA-122-WT

User Manual: BYTECH 3.5FT Type-C to Lighting Cable

Model: CL-LP-CA-122-WT

1. INTRODUCTION

Thank you for choosing the BYTECH 3.5FT Type-C to Lighting Cable. This cable is designed to provide reliable and efficient charging and data transfer between devices equipped with a USB Type-C port and devices utilizing a Lighting port.

1.1 Product Overview

The BYTECH Type-C to Lighting Cable is a versatile accessory for your electronic devices. It features a durable, round white design and is 3.5 feet (approximately 1.07 meters) in length, offering flexibility for various usage scenarios. It supports both power delivery for charging and high-speed data synchronization.

2. SETUP

Setting up your BYTECH Type-C to Lighting Cable is straightforward. Follow these steps to connect your devices:

1. Identify the Type-C port on your source device (e.g., power adapter, computer, tablet).
2. Identify the Lighting port on your target device (e.g., iPhone, iPad, iPod).
3. Gently insert the USB Type-C connector of the cable into the Type-C port of your source device. Ensure it is fully seated.
4. Gently insert the Lighting connector of the cable into the Lighting port of your target device. Ensure it is fully

seated.

5. Once both ends are connected, your devices are ready for charging or data transfer.

Note: Always ensure the connectors are aligned correctly before inserting to prevent damage to the cable or device ports.

3. OPERATING INSTRUCTIONS

3.1 Charging Your Device

To charge your Lighting-enabled device:

- Connect the Type-C end of the cable to a compatible USB Type-C power adapter or a device with a Type-C port that supports power output.
- Connect the Lighting end of the cable to your Lighting-enabled device.
- The device should begin charging automatically. Monitor your device's screen for charging indicators.

3.2 Data Transfer

To transfer data between your devices:

- Connect the Type-C end of the cable to a computer or other device with a Type-C port that supports data transfer.
- Connect the Lighting end of the cable to your Lighting-enabled device.
- Your computer should recognize the connected device. Follow the on-screen prompts or use your device's file management software to initiate data transfer (e.g., syncing photos, videos, or documents).

Important: Ensure your devices' operating systems and software are up-to-date for optimal compatibility and performance during data transfer.

4. MAINTENANCE

Proper care and maintenance will extend the lifespan of your BYTECH cable:

- **Storage:** When not in use, store the cable in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid tightly coiling or bending the cable at sharp angles, especially near the connectors.
- **Cleaning:** If the cable or connectors become dirty, gently wipe them with a soft, dry, lint-free cloth. Do not use harsh chemicals, abrasive cleaners, or excessive moisture.
- **Handling:** Always grasp the connector housing when plugging or unplugging the cable. Avoid pulling directly on the cable itself, as this can damage the internal wires.
- **Inspection:** Periodically inspect the cable for any signs of wear, fraying, or damage to the insulation or connectors. Discontinue use if any damage is observed.

5. TROUBLESHOOTING

If you encounter issues with your BYTECH Type-C to Lighting Cable, try the following troubleshooting steps:

- **Cable Not Charging/Connecting:**

  - Ensure both ends of the cable are fully and securely inserted into their respective ports.
  - Try connecting the cable to a different USB Type-C port or power adapter.
  - Try connecting the cable to a different Lighting-enabled device to rule out an issue with your device's port.

- Check for any debris or lint in the device's Lighting port or the cable's connectors. Clean carefully if necessary (e.g., with a dry, soft brush or compressed air).
    - Restart your devices.

- **Slow Charging:**

    - Ensure you are using a power adapter that provides sufficient power output for your device.
    - Avoid using the device heavily while charging.
    - Check for background apps consuming power.

- **Data Transfer Issues:**

    - Verify that your computer's operating system and device drivers are up-to-date.
    - Ensure your device is unlocked and set to allow data transfer (e.g., "Trust This Computer" prompt on iOS devices).
    - Try a different USB Type-C port on your computer.

If these steps do not resolve the issue, please refer to the Warranty and Support section.

6. SPECIFICATIONS

Feature	Detail
Brand	Bytech
Model Name	3.5FT Type-C to Lighting Cable
Item Model Number	CL-LP-CA-122-WT
ASIN	B09BD5LLTL
Connector Type	USB Type-C, Lighting
Cable Length	3.5 Feet (approx. 1.07 meters)
Color	White
Shape	Round
Special Feature	Data Transfer
Recommended Uses	Connecting Type-C devices to Lighting devices, charging and data transfer
Item Weight	1.6 ounces (approx. 45 grams)
Product Dimensions	7 x 3 x 1 inches (packaging)
Indoor/Outdoor Usage	Indoor, Outdoor
Manufacturer	BYTECH
UPC	805112058570
