4. SETUP AND INSTALLATION

The DELTACO wall mount is designed for easy installation. Follow these steps to securely mount the holder next to your EV wall box.

1. **Choose Location:** Select a suitable location on the wall, ideally next to your EV wall box, ensuring it is within easy reach of your charging cable. Make sure the surface is solid and can support the weight of the holder and the charging cable plug.
2. **Mark Drilling Points:** Hold the wall mount against the chosen location on the wall. Use a pencil to mark the positions for the four mounting holes. Ensure the holder is level before marking.
3. **Drill Holes:** Using an appropriate drill bit for your wall type (e.g., masonry bit for concrete/brick, wood bit for studs), drill holes at the marked points. The depth and diameter of the holes should match the provided wall dowels.
4. **Insert Dowels:** Insert the four wall dowels into the drilled holes. Tap them gently with a hammer until they are flush with the wall surface.
5. **Mount Holder:** Align the mounting holes on the DELTACO wall mount with the inserted dowels. Insert the provided screws through the holder's holes and into the dowels.
6. **Secure Holder:** Tighten the screws firmly with a screwdriver until the wall mount is securely fastened to the wall. Do not overtighten.

5. OPERATING INSTRUCTIONS

Using the DELTACO wall mount is straightforward:

- **To Remove the Plug:** When you need to charge your vehicle, simply press the release button on the charging cable plug (if applicable) and pull the plug out of the wall mount. The holder allows for quick and easy removal with one hand.

The holder ensures that your charging cable plug is always stored safely and tidily when not in use, preventing it from lying on the ground where it could be damaged or become a tripping hazard.

6. MAINTENANCE

The DELTACO Type 2 EV Charging Cable Connector Wall Mount requires minimal maintenance to ensure its longevity and proper function.

- **Cleaning:** Periodically wipe the holder with a soft, damp cloth to remove dust and dirt. Avoid using abrasive cleaners or solvents, as these may damage the plastic material.

- **Inspection:** Regularly check the mounting screws to ensure they remain tight. If the holder feels loose, gently retighten the screws. Inspect the holder for any signs of damage or wear.
- **Environmental Conditions:** While designed for durability, avoid exposing the holder to extreme temperatures or harsh chemicals that could compromise its material integrity.

7. TROUBLESHOOTING

This product is a simple mechanical device, and issues are rare. However, if you encounter any problems, consider the following:

- **Holder feels loose after installation:**
 - Ensure the mounting screws are fully tightened.
 - Verify that the wall dowels are properly seated in the drilled holes and are suitable for your wall material.
- **Charging cable plug does not fit or is difficult to insert/remove:**
