SETUP: SETTING YOUR COMBINATION

Follow these steps to set or reset the 4-digit combination for your ORIA Key Lock Box.

- 1. Open the Lock Box:** Dial the default code (0-0-0-0) to open the key box.
- 2. Locate Reset Lever:** Inside the lock box, on the back of the door, find the reset lever.
- 3. Move Lever to Position B:** Push the RESET lever from position A to position B.
- 4. Set New Combination:** With the lever in position B, scroll the numbers on the dials to your desired 4-digit combination.
- 5. Return Lever to Position A:** Push the RESET lever back to position A. Your new combination is now set.
- 6. Important Reminder:** After setting a new password, it is highly recommended to record it immediately, either by taking a photo or writing it down. Forgetting the combination will prevent you from unlocking the box.

HOW TO SET YOUR OWN PASSWORD

Step 1 Dial to the default code(0-0-0-0) to open the key box.

Step 2 Push the RESET lever to position B.

Step 3 Scroll numbers to set your desired combination.

Step 4 Push the RESET lever to position A, it's done!

OPERATING THE Lock Box

Opening the Lock Box

1. Ensure the shackle is securely attached if in use.
2. Rotate the dials to your set 4-digit combination.
3. Press the release button or pull the front cover down to open the compartment.

Closing the Lock Box

1. Place keys or other items inside the compartment.
2. Close the front cover firmly until it clicks shut.
3. Scramble the combination dials to secure the lock box.

MAINTENANCE

To ensure the longevity and proper function of your ORIA Key Lock Box, consider the following maintenance tips:

- **Cleaning:** Wipe the exterior with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish.
- **Lubrication:** Periodically apply a small amount of graphite lubricant to the combination dials to ensure smooth operation, especially in outdoor environments.
- **Environmental Exposure:** While durable, the lock box is **not water resistant**. For outdoor use, consider placing it in a sheltered location to protect it from direct rain and extreme weather conditions, which can affect its internal mechanisms over time.

TROUBLESHOOTING

- **Cannot Open with Correct Combination:**

- Ensure each dial is precisely aligned with the indicator mark.
- Try rotating the dials a full turn past the combination and then back to the correct numbers.
- Verify that the reset lever inside the box is fully in position A.

- **Dials are Stiff:**

- Apply a small amount of graphite lubricant to the dials.
- Clean any dirt or debris from around the dials.

- **Forgot Combination:**

- Unfortunately, if the combination is forgotten and not recorded, there is no master key or backdoor to open the lock box. The only solution is to try all 10,000 combinations, which is time-consuming, or replace the unit. This highlights the importance of recording your combination as advised during setup.
