### SETUP INSTRUCTIONS

#### 1. Installing Batteries into Your Controller

1. Open the battery compartment on the back of your Xbox controller.
2. Orient the OIVO rechargeable battery pack according to the markings on the battery and inside the controller compartment. The metal contacts of the battery should align with the contacts in the controller.
3. First, insert the side of the battery with the metal contacts into the controller.
4. Then, gently press the other side of the battery down until it clicks securely into place.
5. Close the battery compartment cover.

## 2. Connecting the Charging Station

1. Connect the provided USB-C cable to the Type-C port on the back of the OIVO charger station.
2. Connect the other end of the USB-C cable to a compatible power source (5V/1.5A). This can be an Xbox console, PC, USB hub, or a wall adapter.
3. Ensure the ON/OFF switch on the charger station is in the 'ON' position to power on the unit.

## OPERATING INSTRUCTIONS

### 1. Charging Batteries

1. With the charging station powered on, gently place the OIVO rechargeable battery packs into the designated charging slots. Ensure the batteries are fully seated in the slots.
2. The charging process will begin automatically.

### 2. LED Indicators

The charger station features LED indicators to show the charging status of each battery:

- **Red LED:** Indicates that the battery is currently charging.

- **Green LED:** Indicates that the battery is fully charged or in standby mode.

A single LED on both sides of the charging station will illuminate when the unit is powered. This can be controlled using the ON/OFF switch.

## MAINTENANCE

- Keep the charger station and batteries clean and dry. Use a soft, dry cloth to wipe surfaces.
- Avoid exposing the product to extreme temperatures, direct sunlight, or high humidity.
- Do not attempt to disassemble or modify the charger station or batteries.
- Store the product in a cool, dry place when not in use.

## TROUBLESHOOTING

### 1. Batteries Not Charging

- Ensure the USB-C cable is securely connected to both the charger station and the power source.
- Verify that the power source is active and providing sufficient power (5V/1.5A).
- Check if the ON/OFF switch on the charger station is in the 'ON' position.
- Ensure the batteries are correctly seated in the charging slots and making proper contact.
- If the LED indicator remains green, the battery may already be fully charged.

### 2. Short Battery Life

- Ensure batteries are fully charged before use (LED indicator should be green).
- Battery performance can vary based on controller usage and game intensity.
- Over time, all rechargeable batteries experience a gradual decrease in capacity. If batteries are significantly older, consider replacing them.

### 3. LED Indicators Not Working

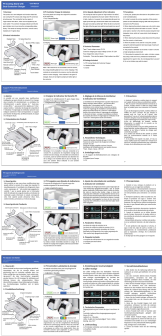

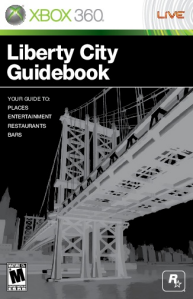

- Confirm the charger station is powered on and connected to a power source.
- Check the ON/OFF switch.
- If only specific indicators are not working, try placing a different battery in that slot to determine if the issue is with the battery or the slot.
