# Lorus Men's Analog Quartz Watch RX307AX9 Instruction Manual

Model: RX307AX9

## 1. INTRODUCTION

This manual provides detailed instructions for the proper use, setup, and maintenance of your Lorus Men's Analog Quartz Watch, model RX307AX9. Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece.

Lorus, a brand under the Seiko Watch Corporation, is committed to providing reliable and stylish watches. This model combines a durable design with precise quartz movement.

## 2. PRODUCT OVERVIEW

The Lorus RX307AX9 watch features a robust construction and a clear analog display. Key components are illustrated below.

Figure 1: Lorus RX307AX9 Men's Analog Quartz Watch. This image displays the watch face with its brown dial, gold-tone markers, and hands, along with the brown silicone strap and crown on the right side.

### Features:

- **Case:** Stainless steel and plastic construction for durability.
- **Strap:** Comfortable silicone strap with a secure pin buckle.
- **Crystal:** Mineral glass, offering good scratch resistance.
- **Movement:** Reliable analog quartz movement.
- **Water Resistance:** Up to 100 meters (10 ATM), suitable for swimming and snorkeling.
- **Date Display:** Integrated date window.

## 3. SETUP

---

### Setting the Time and Date:

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) out to the second click position. This will stop the second hand.
2. **Set the time:** Rotate the crown to move the hour and minute hands clockwise until the desired time is displayed. Ensure to account for AM/PM if setting the date.
3. **Set the date:** Push the crown in one click to the first click position. Rotate the crown to adjust the date. If the date changes during the day, rotate the crown past midnight to advance the date.
4. **Push in the crown:** Once the time and date are set, push the crown back into its normal position against the watch case. The second hand will resume movement.

***Note:** Avoid setting the date between 9:00 PM and 3:00 AM, as this may interfere with the date change mechanism.*

## 4. OPERATING INSTRUCTIONS

---

Your Lorus RX307AX9 watch is designed for straightforward operation.

- **Timekeeping:** The watch continuously displays the current time (hours, minutes, seconds) and date once set.
- **Battery Life:** The watch is powered by a single A-type battery (included). The typical battery life is approximately 2-3 years, but this can vary based on usage.

## 5. MAINTENANCE

---

### Cleaning:

- Wipe the watch case and strap regularly with a soft, dry cloth to remove dust and dirt.
- For silicone straps, a mild soap solution and water can be used, followed by thorough rinsing and drying.
- Avoid using harsh chemicals or abrasive materials, as these can damage the watch's finish.

### Water Resistance:

This watch is water resistant up to 100 meters (10 ATM). This means it is suitable for:

- Everyday use and showering.
- Swimming in pools and shallow snorkeling.

### Important Considerations:

- Do not operate the crown or pushers while the watch is wet or submerged.
- Avoid exposing the watch to hot water, steam, or sudden temperature changes, as this can compromise the water seals.
- After exposure to saltwater, rinse the watch with fresh water and dry it thoroughly.
- Water resistance is not a permanent condition and may decrease over time due to wear and tear or impact. It is recommended to have the water resistance checked periodically by a qualified watch technician.

### Battery Replacement:

When the watch stops or the second hand moves erratically (e.g., skipping seconds), it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and function.

## 6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch has stopped or runs intermittently.	Depleted battery.	Replace the battery (recommended by a professional).
Time is incorrect.	Time not set correctly or crown is not fully pushed in.	Refer to Section 3 "Setting the Time and Date" and ensure the crown is fully pushed in.
Date is incorrect.	Date not set correctly.	Refer to Section 3 "Setting the Time and Date".
Condensation inside the watch.	Exposure to extreme temperature changes or compromised water resistance.	Immediately take the watch to a qualified technician for inspection and repair to prevent internal damage.

If the problem persists after attempting these solutions, please contact Lorus customer support or an authorized service center.

## 7. SPECIFICATIONS

Model Number	RX307AX9
Movement	Quartz (Battery-powered)
Case Material	Stainless Steel and Plastic
Strap Material	Silicone
Crystal Material	Mineral Glass
Case Diameter	42 mm
Case Thickness	13 mm
Water Resistance	100 meters (10 ATM)
Battery Type	1 A (included)
Weight	Approximately 140 grams (package weight)
Country of Origin	China

## 8. WARRANTY AND SUPPORT

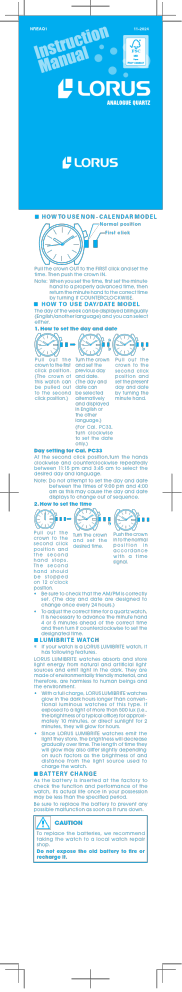

Your Lorus watch is covered by a manufacturer's warranty against defects in materials and workmanship. The specific terms and duration of the warranty may vary by region. Please refer to the warranty card included with your purchase or visit the official Lorus website for detailed warranty information.

For technical assistance, service, or warranty claims, please contact Lorus customer support or an

authorized Lorus service center. Contact information can typically be found on the official Lorus website or in the documentation provided with your watch.

**Online Resources:** For additional information and support, please visit the official Lorus website.
