## 4. Assembly Instructions

The nanoblock Trunks kit is designed for an engaging building experience. The kit includes a detailed, step-by-step instruction sheet. Follow these general guidelines for successful assembly:

1. **Preparation:** Open the package and carefully empty all nanoblock pieces onto a clean, flat surface. It is recommended to sort the pieces by color and shape to facilitate the building process.
2. **Follow the Instructions:** Refer to the included instruction sheet. Each step will illustrate which blocks to use and where to place them. Pay close attention to the orientation of the blocks.
3. **Layer by Layer:** nanoblock models are typically built layer by layer from the base upwards. Ensure each layer is securely connected before proceeding to the next.
4. **Small Pieces:** Be mindful of the extremely small size of nanoblocks (as small as 4mm x 4mm x 5mm). Using tweezers (not included) can assist with precise placement.
5. **Verification:** After completing each major section or the entire model, compare your build with the images in the instruction manual to ensure accuracy.
