MAINTENANCE AND CARE

To maintain the appearance of your nanoblock model, follow these simple care guidelines:

- **Cleaning:** Gently wipe the model with a soft, dry cloth to remove dust. For more stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** If disassembling for storage, keep all pieces in a sealed container to prevent loss and protect them from dust.
- **Handling:** Handle the model carefully to avoid accidental disassembly, especially with smaller, delicate sections.

TROUBLESHOOTING

Missing Pieces:

If you believe you are missing pieces, first carefully re-check the packaging and your workspace. Due to their small size, nanoblock pieces can be easily overlooked. If pieces are genuinely missing from a new, sealed kit, please contact customer support as detailed in the Warranty and Support section.

Difficulty with Assembly:

nanoblock kits, especially those at Level 3 difficulty, require precision. If you encounter difficulty:

- Review the instruction manual steps carefully, ensuring each block is placed in the correct orientation and position.
- Take a break and return to the assembly with fresh eyes.
- Ensure you are using the correct pieces as indicated in the manual.
