## YO BON

# YO BON 10000mAh Portable Power Bank User Manual

Model: Green (B09BKP71CD)

## INTRODUCTION

Thank you for choosing the YO BON 10000mAh Portable Power Bank. This device is designed to provide reliable and efficient portable charging for your mobile phones, tablets, and other USB-powered devices. Its compact and lightweight design makes it an ideal companion for travel and daily use. This manual provides essential information on how to safely and effectively use and maintain your power bank.

## SAFETY INFORMATION

Please read all safety instructions carefully before using this product. Failure to follow these instructions may result in electric shock, fire, or damage to the product.

- Do not expose the power bank to extreme temperatures (above 60°C/140°F or below 0°C/32°F), direct sunlight, or high humidity.
- Do not disassemble, repair, or modify the device. This will void the warranty and may cause harm.
- Keep the power bank away from water and other liquids.
- Do not drop, hit, or apply strong impact to the device.
- Keep out of reach of children.
- Use only certified charging cables and adapters.
- The power bank features an 8-Layer-protection system to protect against overcharge, over discharge, excessive currents, short circuits, and overheating. However, always monitor charging.
- Dispose of the power bank according to local regulations for electronic waste. Do not dispose of it in household waste.

## SETUP

---

Before first use, it is recommended to fully charge your YOBON Power Bank.

1. **Initial Charge:** Connect the power bank to a USB wall charger (not included) using either the provided USB-A to USB-C cable or a Micro USB cable. The digital LED display will show the charging progress.
2. **Full Charge Indication:** The display will show "100" when the power bank is fully charged. Disconnect the cable once fully charged.

## OPERATING INSTRUCTIONS

---

### Charging Your Devices

The power bank features 3 output ports (2 USB-A, 1 USB-C) allowing you to charge up to three devices simultaneously.

1. **Connect Device:** Use your device's charging cable (USB-A to device, or USB-C to device) and connect it to one of the power bank's output ports (USB-A or USB-C).
2. **Start Charging:** The power bank will automatically begin charging your device. The digital display will show the power bank's remaining battery level.
3. **Charging Multiple Devices:** You can connect up to three devices at once to the available output ports. The power bank will distribute power efficiently.
4. **Charging Completion:** Disconnect your device once it is fully charged. The power bank will automatically stop outputting power when no device is connected or when the connected device is fully charged.

## Recharging the Power Bank

You can recharge the power bank using either the USB-C input port or the Micro USB input port.

- 1. Connect to Power Source:** Connect the power bank to a USB wall charger, computer USB port, or other compatible power source using a USB-C cable or a Micro USB cable.
- 2. Monitor Progress:** The digital LED display will show the charging percentage, indicating how much battery capacity has been restored.
- 3. Full Charge:** The display will show "100" when the power bank is fully charged. Disconnect the charging cable.

## MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your power bank.

- **Cleaning:** Use a soft, dry cloth to clean the surface of the power bank. Do not use harsh chemicals or

abrasive materials.

- **Storage:** Store the power bank in a cool, dry place away from direct sunlight and extreme temperatures. If storing for extended periods, charge the power bank to about 50-75% every 3 months to maintain battery health.
- **Avoid Drops:** Protect the device from drops and impacts.
- **Cable Care:** Handle charging cables gently to prevent damage to the connectors.

## TROUBLESHOOTING

If you encounter issues with your YOBON Power Bank, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Power bank not charging	Charging cable is faulty. Wall adapter is not working. Port is dirty or damaged.	Try a different charging cable. Try a different wall adapter or USB port. Gently clean the charging port.
Device not charging from power bank	Power bank battery is depleted. Charging cable is faulty. Device is not compatible. Power bank is in protection mode.	Recharge the power bank. Try a different charging cable. Ensure your device is compatible with USB charging. Disconnect and reconnect the device.
Slow charging speed	Cable quality. Device's charging input limit. Charging multiple devices simultaneously.	Use a high-quality, shorter cable. Some devices have slower charging capabilities. Charging fewer devices may increase speed for individual devices.
Power bank gets warm during use	Normal operation. Overload or poor ventilation.	A slight warmth is normal during charging/discharging. Ensure adequate ventilation. If it becomes excessively hot, disconnect immediately and contact support.
