

UTEX SS21-SPT-301

UTEX Over-The-Toilet Storage Cabinet

MODEL: SS21-SPT-301

1. Introduction

Thank you for choosing the UTEX Over-The-Toilet Storage Cabinet. This manual provides essential information for the safe assembly, operation, and maintenance of your new storage unit. Please read these instructions thoroughly before beginning assembly and retain them for future reference.

This cabinet is designed to provide efficient storage in your bathroom, utilizing the space above your toilet. It features high-quality MDF construction, adjustable shelving, and a modern design suitable for various home decor styles.

2. Safety Information

Please observe the following safety precautions during assembly and use:

- Keep all small parts and packaging materials away from children and pets.
- Assemble the unit on a soft, clean surface to prevent scratches.
- Ensure all connections are securely tightened before use. Do not overtighten screws.
- **Important:** This cabinet must be secured to the wall using the provided anti-tip device to prevent accidental tipping and potential injury.
- Do not exceed the maximum weight limit of 100 pounds for the entire unit. Distribute weight evenly.

- Use only as intended for bathroom storage.

3. Package Contents

Before assembly, verify that all components are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Cabinet Panels (Top, Bottom, Sides, Back, Doors)
- Adjustable Shelf
- Hardware Pack (Screws, Dowels, Cam Locks, Hinges, Handles, Anti-tip Kit)
- Instruction Manual

4. Assembly Instructions

Assembly is estimated to take approximately 60 minutes with two adults. A Phillips head screwdriver is required (not included).

Image 4.2: Exploded view of cabinet components.

1. **Prepare Components:** Unpack all parts and lay them out on a protected, flat surface. Identify each component using the provided parts list.
2. **Assemble Side Frames:** Attach the horizontal support bars to the vertical side panels using the designated hardware (dowels and screws/cam locks). Ensure the adjustable bottom crossbar is installed at the appropriate height to clear your toilet's valve position (refer to dimensions in Section 7).

3. **Attach Top and Bottom Panels:** Connect the assembled side frames to the main top and bottom panels of the cabinet using cam locks and dowels.
4. **Install Back Panel:** Slide or fasten the back panel into the grooves or attach it to the rear of the cabinet structure.
5. **Attach Doors and Handles:** Secure the hinges to the cabinet doors and then attach the doors to the main cabinet frame. Install the brush nickel finish handles onto the doors.

6. **Install Adjustable Shelf:** Place the adjustable shelf inside the cabinet at your desired height using the shelf pins.

Image 4.7: Adjustable shelf detail.

7. **Position Cabinet:** Carefully lift and position the assembled cabinet over your toilet. Ensure it is centered and stable.
8. **Secure to Wall:** Attach the anti-tip device to the top rear of the cabinet and then to a wall stud using the provided hardware. This step is crucial for stability and safety.

5. Operating Instructions

The UTEX Over-The-Toilet Storage Cabinet is designed for straightforward use.

- **Adjusting Shelves:** The interior shelf can be adjusted to different heights to accommodate various items. Simply remove the shelf pins, reposition the shelf to the desired height, and reinsert the pins securely.
- **Door Operation:** The cabinet features two doors with brush nickel finish handles. Gently pull the handles to open and push to close.
- **Open Storage:** The open shelf below the cabinet doors provides easy access for frequently used items.

6. Maintenance

To ensure the longevity and appearance of your cabinet, follow these maintenance guidelines:

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals, as these can damage the finish.
- **Spills:** Promptly wipe up any spills to prevent moisture damage to the engineered wood.
- **Hardware:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Environment:** Avoid placing the cabinet in areas with extreme humidity or direct sunlight for prolonged periods.

7. Troubleshooting

Problem	Possible Cause	Solution
Cabinet feels wobbly	Not secured to wall; uneven floor; loose connections.	Ensure anti-tip device is properly installed. Check all screws and cam locks for tightness. Adjust cabinet position on floor.
Doors do not align or close properly	Hinges not adjusted correctly; cabinet not level.	Adjust hinge screws to align doors. Ensure the cabinet is level on the floor.
Missing parts or damaged components	Manufacturing error or shipping damage.	Do not proceed with assembly. Contact UTEX customer support for replacement parts.
