

NUX B-6

NUX B-6 Saxophone Wireless System

USER MANUAL

Introduction

The NUX B-6 Saxophone Wireless System is a compact and reliable 2.4GHz wireless solution designed specifically for saxophonists. It provides high-resolution 24-bit/44.1kHz audio transmission, allowing for freedom of movement without compromising sound quality. The system features a custom condenser microphone, three EQ scenes optimized for different saxophone types, and a convenient USB-C rechargeable charging case.

This manual provides detailed instructions for setting up, operating, and maintaining your NUX B-6 system to ensure optimal performance and longevity.

Safety Information

- Do not expose the unit to rain or moisture to avoid fire or electric shock.
- Do not open the casing. There are no user-serviceable parts inside. Refer all servicing to qualified personnel.
- Avoid placing the unit near heat sources, such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Use only attachments/accessories specified by the manufacturer.
- Clean only with a dry cloth.
- Dispose of batteries responsibly according to local regulations.

Package Contents

Verify that all items are present in your NUX B-6 Saxophone Wireless System package:

- NUX B-6 Transmitter (TX)
- NUX B-6 Receiver (RX)
- Custom Condenser Microphone with Gooseneck
- Charging Case
- USB-C Charging Cable
- User Manual (this document)

Image: The NUX B-6 wireless system components, including the transmitter, receiver, microphone, and charging cable, neatly organized within the charging case.

Image: A complete view of all NUX B-6 system components, including the charging case, microphone, transmitter, receiver, and USB-C charging cable.

Product Overview

The NUX B-6 system consists of a transmitter (TX) that attaches to your saxophone, a receiver (RX) that plugs into your amplifier or mixer, and a dedicated condenser microphone.

Image: Individual components of the NUX B-6 system: the transmitter (TX), receiver (RX), and the gooseneck condenser microphone.

Transmitter (TX)

The transmitter unit clips securely to the bell of your saxophone. It features the input for the gooseneck microphone and controls for power and EQ settings.

Receiver (RX)

The receiver unit plugs directly into the XLR input of your amplifier, mixing console, or audio interface. It receives the wireless signal from the transmitter.

Image: A detailed view of the NUX B-6 receiver, highlighting its XLR output connector and power button.

Custom Condenser Microphone

The included gooseneck microphone is designed to capture the natural tone of your saxophone. It connects to the transmitter and can be positioned precisely for optimal sound pickup.

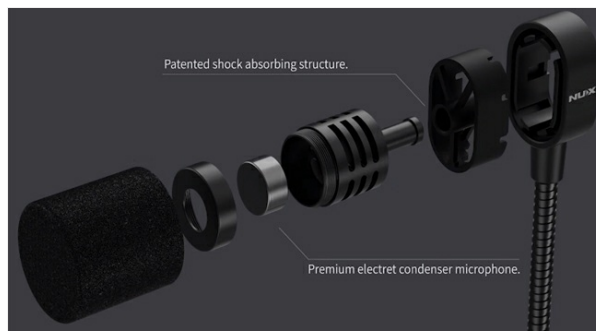

Image: An exploded diagram showing the internal components of the NUX B-6 microphone, including its premium electret condenser and patented shock-absorbing structure.

Setup

1. Charging the System

Before first use, ensure both the transmitter and receiver are fully charged. Place both units into the charging case. Connect the provided USB-C cable to the charging case and a suitable USB power adapter (not included). The indicator lights on the units will show charging status.

Image: Illustration showing the NUX B-6 transmitter and receiver being charged via USB-C connection within the charging case.

Image: The NUX B-6 transmitter, receiver, and microphone stored securely within their dedicated charging case.

2. Attaching the Microphone and Transmitter

1. Insert the gooseneck microphone into the input on the transmitter unit.
2. Carefully clip the transmitter unit onto the bell of your saxophone. Ensure it is secure but does not obstruct any keys or pads.
3. Adjust the gooseneck microphone to point towards the bell or sound holes of your saxophone for optimal sound capture.

Image: The NUX B-6 microphone and transmitter unit securely clipped to the bell of a saxophone, ready for use.

Image: A hand demonstrating the adjustment of the NUX B-6 microphone clip on the saxophone bell, showing its flexible attachment mechanism.

3. Connecting the Receiver

Plug the NUX B-6 receiver directly into an available XLR input on your amplifier, mixing console, or audio interface.

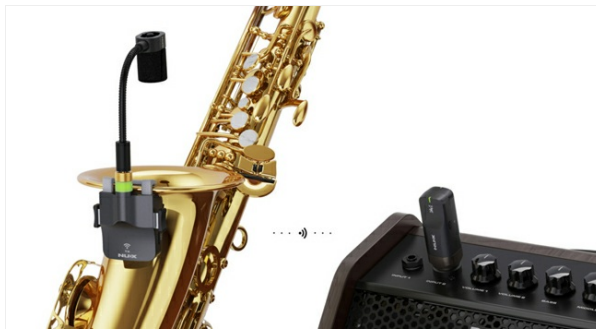

Image: The NUX B-6 receiver plugged into an amplifier, with the saxophone and transmitter unit shown wirelessly connected.

4. Powering On and Pairing

The NUX B-6 system is designed for plug-and-play simplicity. Simply turn on both the transmitter and receiver. They will automatically pair within seconds. The indicator lights will confirm a successful connection.

Operation

EQ Scenes

The NUX B-6 features three EQ scenes optimized for different types of saxophones. These settings adjust the frequency response to best suit the instrument's characteristics:

- **Soprano Saxophone:** Optimized for the brighter, higher-pitched sound of a soprano sax.
- **Alto Saxophone:** Tailored for the balanced and versatile tone of an alto sax.
- **Tenor Saxophone:** Designed to enhance the rich, warm sound of a tenor sax.

Refer to the transmitter unit for controls to switch between these EQ scenes. Experiment with each setting to find the one that best complements your instrument and playing style.

Image: Three different saxophones (soprano, alto, tenor) each fitted with the NUX B-6 microphone, demonstrating the system's adaptability and EQ scene options.

Wireless Performance

The NUX B-6 operates on a reliable 2.4GHz digital signal, providing an operation range of up to 20 meters (approximately 65 feet) in optimal conditions. This ensures stable performance for rehearsals, studio sessions, and small stage gigs.

Image: The NUX B-6 microphone attached to a saxophone, emphasizing its 2.4GHz wireless technology for trusted performance.

Audio Quality

The system delivers high-resolution 24-bit/44.1kHz audio, ensuring that your saxophone’s natural tone and dynamics are captured accurately without distortion or latency.

Maintenance

Cleaning

Wipe the transmitter, receiver, and microphone with a soft, dry cloth after each use. Do not use liquid cleaners or abrasive materials, as they may damage the finish or internal components.

Battery Care

- Recharge the units regularly, even if not used frequently, to maintain battery health.
- Store the system in its charging case when not in use to keep it protected and charged.
- Avoid exposing the batteries to extreme temperatures.

Storage

When not in use, store the NUX B-6 system in its original charging case in a cool, dry place away from direct sunlight and excessive humidity.

Image: The NUX B-6 charging case in its closed position, indicating secure storage for the wireless system.

Troubleshooting

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No sound or intermittent sound	Units not powered on. Low battery on transmitter or receiver. Units out of range. Interference from other 2.4GHz devices. Receiver not properly connected to amplifier/mixer.	Ensure both transmitter and receiver are powered on. Recharge both units fully. Reduce distance between transmitter and receiver (max 20 meters). Move away from Wi-Fi routers, Bluetooth devices, or other 2.4GHz sources. Check XLR cable connection to amplifier/mixer.
Excessive key noise or unwanted sounds	Microphone placement. Incorrect EQ scene selected.	Adjust microphone position to minimize mechanical noise. Try different EQ scenes (Soprano, Alto, Tenor) to find the best fit for your saxophone.
Short battery life	Units not fully charged. Aging battery.	Ensure units are fully charged before use. Battery life may diminish over time with repeated charging cycles.
Wind noise or feedback (especially outdoors)	Environmental factors.	The microphone is sensitive to wind. Use indoors or in sheltered outdoor environments. Adjust microphone gain on your mixer/amp to prevent feedback.

Specifications

Feature	Detail
Model Name	B-6
Wireless Frequency	2.4GHz
Operation Range	Up to 20 meters (65 feet)
Audio Quality	24-bit/44.1kHz
Microphone Type	Custom Electret Condenser
EQ Scenes	Soprano, Alto, Tenor Saxophone
Power Source	Battery Powered (Lithium Ion)
Charging Port	USB-C
Item Weight	124 Grams (4.4 ounces)
Product Dimensions	7.56 x 3.62 x 13.07 inches
UPC	885947104253
Manufacturer	Cherub Technology Co.,Ltd

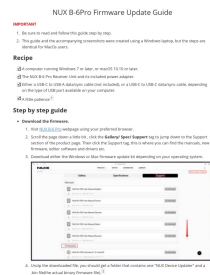

Warranty and Support

NUX products are designed and manufactured to high-quality standards. For warranty information and technical support, please refer to the official NUX website or contact your local distributor.
