Quictent 1312W

Quictent Mini Greenhouse Model 1312W Instruction Manual

Model: 1312W | Dimensions: 71" x 36" x 36"

1. Product Overview

The Quictent Mini Greenhouse Model 1312W is designed to provide an optimal environment for plant protection and seed starting. This portable, quick-setup shelter is suitable for both indoor and outdoor use, offering a protective space for your plants.

It features a durable powder-coated steel frame and a transparent, UV-protected PE cover. The design includes features for temperature management and easy access, making it a versatile addition to any garden or patio.

2. Safety Information

- Read this user manual carefully before assembly and use.
- Ensure all components are securely connected during assembly to prevent collapse.
- Do not attempt to set up or move the greenhouse in strong winds.
- Secure the greenhouse to the ground using stakes or weights, especially in outdoor environments, to prevent wind damage.
- Keep children and pets away from the assembly area.
- Avoid placing heavy objects on the greenhouse frame or cover.

3. Package Contents

Verify that all parts are present before beginning assembly. If any parts are missing or damaged, please contact customer support.

- Powder-Coated Steel Frame Poles
- Connectors
- Transparent PE Cover (UV Protected, Waterproof, Reinforced)
- Ground Stakes (for securing)

4. Assembly Instructions

Assembly typically takes 10-15 minutes. No special tools are required.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out.
2. **Assemble Frame:** Connect the steel poles using the provided connectors. Ensure each connection is firm. Refer to the diagram for the correct frame structure.
3. **Install Cover:** Drape the PE cover over the assembled frame. Ensure the cover is aligned correctly with the frame. Do not stretch the cover excessively; adjust the frame geometry if needed to achieve a proper fit.
4. **Secure Cover:** Use the integrated fastening straps to secure the cover to the frame. This prevents the cover from blowing away in light winds.
5. **Ground Anchoring:** For outdoor use, insert the provided ground stakes through the cover extension design at the base and into the ground to anchor the greenhouse securely. For hard surfaces, use additional weights (not included) on the cover extension to prevent movement.

5. Operating Instructions

5.1 Temperature Management and Ventilation

The greenhouse cover features zippered doors and roll-up vents to control the internal environment.

- **To Retain Warmth:** Close all zipper doors completely. This helps maintain a consistent growing environment and

provides anti-frost protection.

- **For Ventilation:** Roll up the vents and secure them with the attached straps. This allows for air circulation, preventing overheating and promoting healthy plant growth.

5.2 Watering Plants

The roll-up doors provide convenient access for watering and fertilizing your plants without needing to remove the entire

cover.

6. Maintenance

- **Cleaning:** Wipe the PE cover with a damp cloth and mild soap as needed. Avoid harsh chemicals that could damage the material.
- **Frame Inspection:** Periodically check all frame connections and poles for any signs of wear, rust, or damage.
- **Cover Integrity:** Inspect the cover for tears or holes. Small tears can often be repaired with greenhouse repair tape to extend the cover's lifespan.
- **Winter Storage:** If storing for winter, clean the cover and frame thoroughly. Disassemble the greenhouse and store components in a dry, protected area to prolong product life.

7. Troubleshooting

- **Greenhouse unstable in wind:** Ensure the greenhouse is properly anchored using all provided stakes. For hard surfaces or very windy conditions, place additional heavy objects (e.g., bricks) on the cover extension design at the base.
- **Cover does not fit:** Double-check that the frame is assembled correctly according to the instructions. The cover should fit without excessive stretching.
- **Zippers sticking:** Apply a small amount of zipper lubricant or wax to the zipper teeth to ensure smooth operation.
- **Condensation inside:** Increase ventilation by rolling up the vents or partially opening the doors during warmer parts of the day.

8. Specifications

Feature	Specification
Model Number	1312W
Product Dimensions	71"L x 36"W x 36"H (180 x 91 x 91 cm)
Item Weight	7.33 pounds (3.32 kg)
Frame Material	Alloy Steel (Powder-Coated)
Cover Material	Polyethylene (PE), UV Protected, Reinforced
Nominal Wall Thickness	140g/sqm
Number of Doors	2 (Zippered, Roll-Up)
Number of Vents	2 (Roll-Up)
Indoor/Outdoor Usage	Indoor, Outdoor
