WHAT'S IN THE BOX

The package includes the following items:

- 1 x EnergyCell Slim 2 Portable Power Bank (5000mAh)
- 1 x Micro USB Charging Cable
- 1 x Storage Bag
- 1 x User Manual

Image: The contents of the product package, including the blue Slim 2 power bank, a white Micro USB cable, and the user manual, all neatly arranged next to an open cardboard box.

PRODUCT OVERVIEW

The EnergyCell Slim 2 is designed for portability and efficiency. Key features include:

- **Ultra-Compact Design:** Measuring only 1.8 x 1.26 x 3.9 inches and weighing 99g, it is highly portable.
- **High Capacity:** 5000mAh battery provides ample power for daily use.
- **Fast Charging:** 2.1A output for quick device charging and 2A input for rapid power bank recharge.
- **Advanced Safety Features:** Built-in protection against overheating, overcharge, overcurrent, and short circuits.
- **LED Light Display:** Indicates battery status.

Compact design, easy to carry

SETUP: CHARGING THE POWER BANK

Before first use, fully charge your EnergyCell Slim 2 power bank.

1. Connect the provided Micro USB cable to the **INPUT** port on the power bank.
2. Connect the other end of the Micro USB cable to a USB wall adapter (not included) or a computer's USB port. For fastest charging, use a 2A USB adapter.
3. The LED indicators on the power bank will illuminate to show the charging progress. All LEDs will be solid when fully charged.

Note: A 2A adapter can fully charge the power bank in approximately 3 hours. A 1A adapter will take longer, around 5.5

hours.

High input

Less time plugged in, more time for going out
2A high input, twice faster than general 1A input

Recharge Slim 2 fully

OPERATING INSTRUCTIONS

Charging Your Device

1. Connect your device's charging cable (e.g., USB-A to Lightning, USB-A to USB-C, or USB-A to Micro USB) to the **OUTPUT** port on the power bank.
2. Connect the other end of the cable to your mobile device.
3. The power bank will automatically begin charging your device. The LED indicators will show the remaining battery

level of the power bank.

4. To stop charging, simply disconnect your device from the power bank.

Tip: The 2.1A output automatically detects your device to provide the fastest possible charging speed.

2.1A Output, High efficiency

MAINTENANCE AND CARE

- Store the power bank in a cool, dry place, away from direct sunlight and extreme temperatures.
- Avoid dropping or subjecting the power bank to strong impacts.
- Do not expose the power bank to water or other liquids.
- Clean the power bank with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- If not used for extended periods, charge the power bank at least once every three months to maintain battery health.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Power bank not charging	Cable not connected properly; faulty cable/adapter; power bank fully charged.	Ensure cable is securely connected. Try a different cable or adapter. Check LED indicators; if all are solid, it's fully charged.
Device not charging from power bank	Power bank is depleted; faulty cable; device incompatibility.	Recharge the power bank. Try a different charging cable. Ensure your device is compatible with USB charging.
Slow charging	Using a low-power adapter (for power bank); using a low-quality cable; device drawing less current.	Use a 2A adapter for charging the power bank. Use a high-quality charging cable. Some devices inherently charge slower.
Power bank gets hot during use	Normal operation; excessive load; poor ventilation.	Slight warmth is normal. Ensure adequate ventilation. If excessively hot, disconnect and contact support.
