

## HEWLETT PACKARD 7313

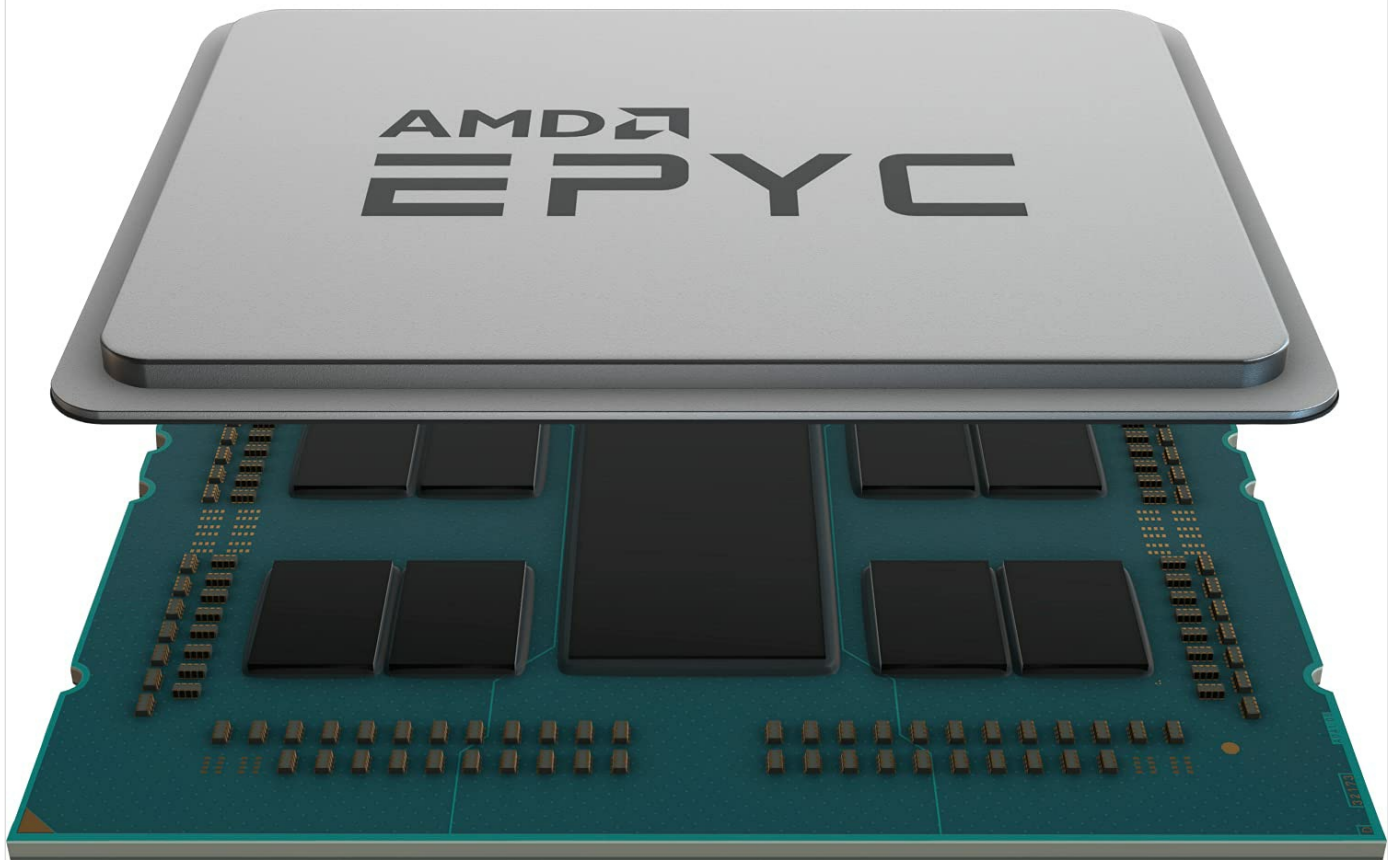

# HPE AMD EPYC 7003 (3rd Gen) 7313 Processor Upgrade User Manual

Model: 7313 | Brand: HEWLETT PACKARD

## INTRODUCTION

---

This manual provides essential information for the installation, operation, maintenance, and troubleshooting of your Hewlett Packard Enterprise HPE AMD EPYC 7003 (3rd Gen) 7313 Hexadeca-core Processor Upgrade. The AMD EPYC™ 7313 is designed as a high-performance x86 server CPU, offering advanced features for data centers requiring superior processing power, security, and scalability.

An image showing the HPE AMD EPYC 7003 (3rd Gen) 7313 processor. The top of the processor features the 'AMD EPYC' logo, and the underside reveals the integrated circuits and connection points.

## SETUP AND INSTALLATION

---

Proper installation is crucial for optimal performance and longevity of your processor. Always ensure your system is powered off and unplugged before beginning any installation procedures. It is recommended to wear an anti-static wrist strap to prevent electrostatic discharge (ESD) damage.

### Pre-installation Checklist:

- Ensure your motherboard supports the Socket SP3 socket type.
- Verify your system's BIOS/UEFI firmware is updated to support 3rd Gen AMD EPYC processors.
- Gather necessary tools: thermal paste, clean lint-free cloth, screwdriver.

### Installation Steps:

1. **Prepare the Motherboard:** Open the CPU socket retention mechanism on your server motherboard.
2. **Handle the Processor:** Carefully remove the processor from its packaging, holding it by the edges to avoid touching the contact pins or the integrated heat spreader (IHS).

3. **Align and Seat:** Align the triangular marker on the processor with the corresponding marker on the socket. Gently lower the processor straight down into the socket. Do not force it.
4. **Secure the Processor:** Close the CPU socket retention mechanism to secure the processor in place.
5. **Apply Thermal Paste:** Apply a small, pea-sized amount of high-quality thermal paste to the center of the processor's IHS.
6. **Install CPU Cooler:** Mount the compatible CPU cooler according to its manufacturer's instructions, ensuring even pressure distribution. Connect the cooler's fan cable to the appropriate header on the motherboard.
7. **Final Checks:** Double-check all connections and ensure no cables are obstructing airflow.

## OPERATING INSTRUCTIONS

---

Once installed, the HPE AMD EPYC 7313 processor operates as the central processing unit for your server system. Its 16 cores and 3 GHz clock speed provide robust performance for demanding server workloads.

### System Power-On:

- After installation, connect all necessary power cables and peripherals to your server.
- Power on the system. The BIOS/UEFI will detect the new processor.
- Access the BIOS/UEFI settings if necessary to verify processor recognition and configure any specific settings required by your server's operating system or applications.

### Performance Considerations:

- The processor's performance is highly dependent on adequate cooling. Ensure your server chassis has proper airflow and that the CPU cooler is functioning correctly.
- For optimal performance, ensure your operating system and applications are configured to utilize multi-core processors effectively.
- Regularly monitor system temperatures using appropriate software to prevent overheating.

## MAINTENANCE

---

Maintaining your processor and its cooling system helps ensure long-term stability and performance.

- **Dust Removal:** Periodically clean dust from the CPU cooler heatsink and fan using compressed air. Ensure the system is powered off and unplugged before cleaning.
- **Thermal Paste:** While thermal paste can last for several years, consider reapplying it if you notice consistently high temperatures or if you remove the CPU cooler for any reason.
- **Temperature Monitoring:** Use server management software to monitor CPU temperatures. Sustained high temperatures can indicate cooling issues or excessive workload.
- **Firmware Updates:** Keep your server's BIOS/UEFI firmware updated. Manufacturer updates often include performance enhancements, bug fixes, and improved compatibility.

## TROUBLESHOOTING

---

If you encounter issues with your processor, consider the following troubleshooting steps:

- **System Not Booting/No Display:**
  - Ensure the processor is correctly seated in the socket and the retention mechanism is fully closed.
  - Verify the CPU cooler is properly installed and its fan is connected.
  - Check that all power cables to the motherboard and CPU are securely connected.

- Reset the BIOS/UEFI to default settings.

- **Overheating Issues:**

- Confirm the CPU cooler is making proper contact with the processor's IHS.
- Check if the thermal paste application is adequate and evenly spread.
- Ensure server chassis fans are functioning and airflow is not obstructed.
- Clean any dust buildup from the heatsink fins.

- **Performance Degradation:**

- Check CPU utilization in your operating system's task manager or resource monitor.
- Ensure all system drivers, especially chipset drivers, are up to date.
- Verify that the system's power management settings are configured for high performance.
- Run diagnostic tools to check for hardware conflicts or errors.

If problems persist after attempting these steps, consult your server's documentation or contact Hewlett Packard Enterprise technical support.

## SPECIFICATIONS

---

Key technical specifications for the HPE AMD EPYC 7003 (3rd Gen) 7313 Processor Upgrade:

| Feature                    | Specification              |
|----------------------------|----------------------------|
| Brand                      | Hewlett Packard Enterprise |
| Series                     | EPYC 7003                  |
| Model Number               | 7313                       |
| Processor Brand            | AMD                        |
| Processor Cores            | Hexadeca-core (16 Core)    |
| Clock Speed                | 3 GHz                      |
| L3 Cache Memory            | 123 MB                     |
| Socket Type                | Socket SP3                 |
| Item Weight                | 0.65 ounces                |
| Product Dimensions (LxWxH) | 11 x 9 x 2 inches          |
| Date First Available       | September 2, 2021          |

## WARRANTY AND SUPPORT

---

This Hewlett Packard Enterprise processor upgrade is covered by a manufacturer's warranty. For specific warranty terms and conditions, please refer to the documentation included with your purchase or visit the official Hewlett Packard Enterprise website.

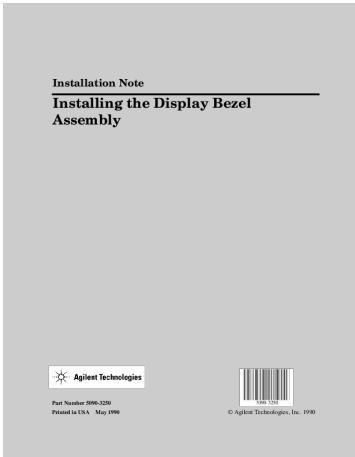

For technical assistance, product support, or warranty claims, please contact Hewlett Packard Enterprise customer support through their official channels. Have your product model number (7313) and any relevant purchase information

ready when contacting support.

**Online Resources:** For the latest drivers, firmware updates, and additional support documentation, please visit the official Hewlett Packard Enterprise support website.

## Overview

## HPE ProLiant DL385 Gen10 Plus v2 server

The HPE ProLiant DL385 Gen10 Plus v2 server is a high-performance server with the new fourth-generation processors. Powered by the latest AMD EPYC™ 7002 Series Processors, the HPE ProLiant DL385 Gen10 Plus v2 Server offers greater processing power, memory scalability up to 32 TB, and data transfer rates with PCIe Gen4 capabilities. This 2U, 22.5 server has been designed for high availability while delivering a high core count and large memory footprint. Choose this purpose-built platform for virtualized high-performance compute and memory-intensive workloads.

## SERIAL NUMBERS

This manual applies to a HP/Agilent 8757D scalar network analyzer and variants. Each instrument is individually numbered. The serial numbers are the sequential prefix, unique to each instrument.

Note: The original HP 8757D incorporated a cathode ray tube (CRT) based display. The current design incorporates a liquid crystal display (LCD). In this manual references to video CRT are used to refer to both display designs or use both designs.

**Product description**

The HPE ProLiant DL385 Gen10 Plus v2 Server is a high-performance server with the new AMD EPYC™ 7000 series processors. It features 16 cores, 128 GB of memory, and 24 SATA drives. It is designed for high performance and reliability, with a focus on energy efficiency and sustainability. It is ideal for a wide range of applications, from small businesses to large enterprises.

**What's new**

- Supports the latest AMD EPYC™ 7000 series processors
- Supports for 16 SATA storage controllers for 500/1000/1600 drives
- New Basic Center Management/Remote access
- Enterprise-class 10GbE LAN & expansion

[Click here to view more information about Enterprise-class 10GbE LAN & expansion](#)

### HPE PROLIANT DL385 GEN10 PLUS V2 7313 3.0GHZ 16-CORE 1P 32GB- R MR416I-A 8SFF 800W PS EU SERVER (P55284-421)

ProLiant DL300 Servers

#### WHAT'S NEW

- Powered by the 3rd Generation AMD EPYC™ processors with more compute performance compared to the previous generation.
- Enhanced storage management with TruScale storage controller supporting

#### OVERVIEW

Do you need a versatile server with built-in security and flexibility that addresses key applications such as Machine Learning or Deep Learning and Big Data Analytics?

Building on HPE ProLiant as the intelligent foundation for hybrid cloud, the HPE ProLiant DL385 Gen10 Plus v2 server

HPE Processor AMD EPYC 7313 3.0GHz

Indeks: 179838 Producent: HEWLETT PACKARD ENTERPRISE kod producenta: P38669-B21

Cena: 7,266.20 zł

Opis

HPE Processor AMD EPYC 7313 3.0GHz

Producent: HEWLETT PACKARD ENTERPRISE

Opis

Procesory AMD EPYC to rodzaje procesorów przeznaczonych do zastosowań serwerowych. Zaprojektowane do zastosowań w środowiskach chmurowych, dedykowane do zastosowań w środowiskach chmurowych. Zaprojektowane do zastosowań w środowiskach chmurowych.

Produkt:

- Nowy HPE Processor AMD EPYC 7313 3.0GHz 16-core 128MB
- Opis: AMD EPYC 7313 3.0GHz - 16-core, 128 MB pamięci podręcznej - dla ProLiant DL385 Gen10 Plus V2 Base
- Kod: 179838 7313 3.0GHz
- Gwarancja producenta: 36 miesięcy w miejscu instalacji

Opis

- Rodzaj: Procesor

Procesor

- Typ / Rodzaj: Procesor AMD EPYC 7313
- Rodzaj: 16-core
- Pamięć podręczna: 128 MB
- Liczba rdzeni: 16
- Rodzaj: 3.0GHz
- Częstotliwość zegara: 3.0 GHz
- Max Turbo Speed: 3.7 GHz
- Rodzaj: 128 MB

Informacja o kompatybilności

- Zaprojektowany dla: HPE ProLiant DL385 Gen10 Plus, DL385 Gen10 Plus V2, DL385 Gen10 Plus V2 Base

Servidores ProLiant DL300

NOVEDADES

- Mejora el rendimiento de computación con dos procesadores en una carcasa en rack único.
- Incorpora el procesador AMD EPYC de la serie 7000 de 3ª generación con mayor rendimiento de computación que la 2ª.

DESCRIPCIÓN GENERAL

¿Necesitas una plataforma densa con seguridad y flexibilidad integradas que aborden aplicaciones clave como la arquitectura de nodos virtuales? Tomando el HPE ProLiant como la base inteligente para la nube híbrida, el servidor HPE ProLiant DL365 Gen10 Plus ofrece la 3ª generación del procesador AMD EPYC de la serie 7000, que

新增内容

- 搭载第三代 AMD EPYC 处理器
- 支持 NVMe/SAS/SATA 混合存储
- 支持 3D 缓存和智能缓存管理

概述

您是否需要一个具备可靠安全性和灵活性，而且能够满足各种不同规模和数据类型的应用需求的多用途服务器？以 HPE ProLiant 技术为基础的 HPE ProLiant DL385 Gen10 Plus V2 服务器是应用于混合云环境的智能基础，配备第三代 AMD EPYC

## Novedades

- **Incrementa la productividad** con AMD EPYC™, la 7ª generación, un nuevo mecanismo de procesamiento que simplifica la generación propia de imágenes.
- **Genio del almacenamiento** optimizado con capacidades de almacenamiento de tipo mixto, compatible con las unidades SATA/SAS/SSD.
- **Convierte sus servidores AMD EPYC™ en servidores con 3D vCache** que proporciona 768 GB de caché L3 por generación.

## Descripción general

¡Descubre cómo servir mejor a sus clientes con seguridad y flexibilidad integradas que abordan las aplicaciones clave como el aprendizaje automático, el aprendizaje profundo y el análisis de Big Data! Tomando HPE ProLiant como base, las integraciones para la nube híbrida, el servidor HPE ProLiant DL385 Gen10 Plus v2 incluye procesadores AMD EPYC™ de 7ª generación que proporcionan más rendimiento que la generación anterior. Con hasta 128 núcleos (por configuración de 2 sockets) y 12.000 MB para memoria de hasta 3200 MHz, el servidor HPE ProLiant DL385 Gen10 Plus v2 ofrece máximas ventajas. Oferto de bajo costo con una seguridad integrada. Equipado con capacidades 3x/a Genio del servidor HPE ProLiant DL385 Gen10 Plus v2 ofrece tasas de transferencia de datos, migración y replicación de ultraestructura más rápidas. Combinado con la compatibilidad con sensores gráficos, una solución de RAID de almacenamiento más avanzada y una gran densidad de almacenamiento, el servidor HPE ProLiant DL385 Gen10 Plus v2 representa la opción ideal para el aprendizaje automático/profundo y los análisis de Big Data.

## HPE ProLiant DL385 Gen10 Plus v2 Server

### Overview

#### HPE ProLiant DL385 Gen10 Plus v2 Server

The HPE ProLiant DL385 Gen10 Plus v2 Server is a leading-edge server form factor with the new form factor, a 4-socket server. Powered by the latest Xeon® E7-2000 Series Processors, the HPE ProLiant DL385 Gen10 Plus v2 Server offers greater processing power, memory scalability up to 3,072GB DDR4, and data transfer rates with PCIe Gen4 capabilities.

The 2U 2-bay server has been designed with flexibility while delivering a high core count and large memory. Choose the performance platform for virtualization, High Performance Compute, and analytical workloads seamlessly.

| HPE ProLiant DL385 Gen10 Plus v2 2U Server Front View |                                            |
