OWLTRA URRL01

OWLTRA OW-5 Ultrasonic Rodent Repellers User Manual

Model: URRL01

1. INTRODUCTION

Welcome to the OWLTRA OW-5 Ultrasonic Rodent Repellers user manual. This device offers a modern, poison-free method for managing rodent activity in your indoor spaces. By emitting high-frequency sound waves, the repellers create an uncomfortable environment for rodents, encouraging them to leave your home. The sound is specifically designed to be inaudible to humans and most non-rodent household pets, ensuring a silent and safe operation.

Image: Four OWLTRA OW-5 Ultrasonic Rodent Repellers, ready for use.

2. PRODUCT FEATURES

- **Ultrasonic Technology:** Emits high-frequency sound waves to repel rodents effectively.
- **Silent Operation:** Completely inaudible to humans and non-rodent pets.
- **Poison-Free Solution:** A safe alternative to chemical repellents and traps.
- **Built-in Night Light:** Provides a soft glow and indicates the device is working.
- **Easy to Use:** Simple plug-in design for immediate operation.
- **Wide Coverage:** Each unit provides coverage for a medium-sized room.

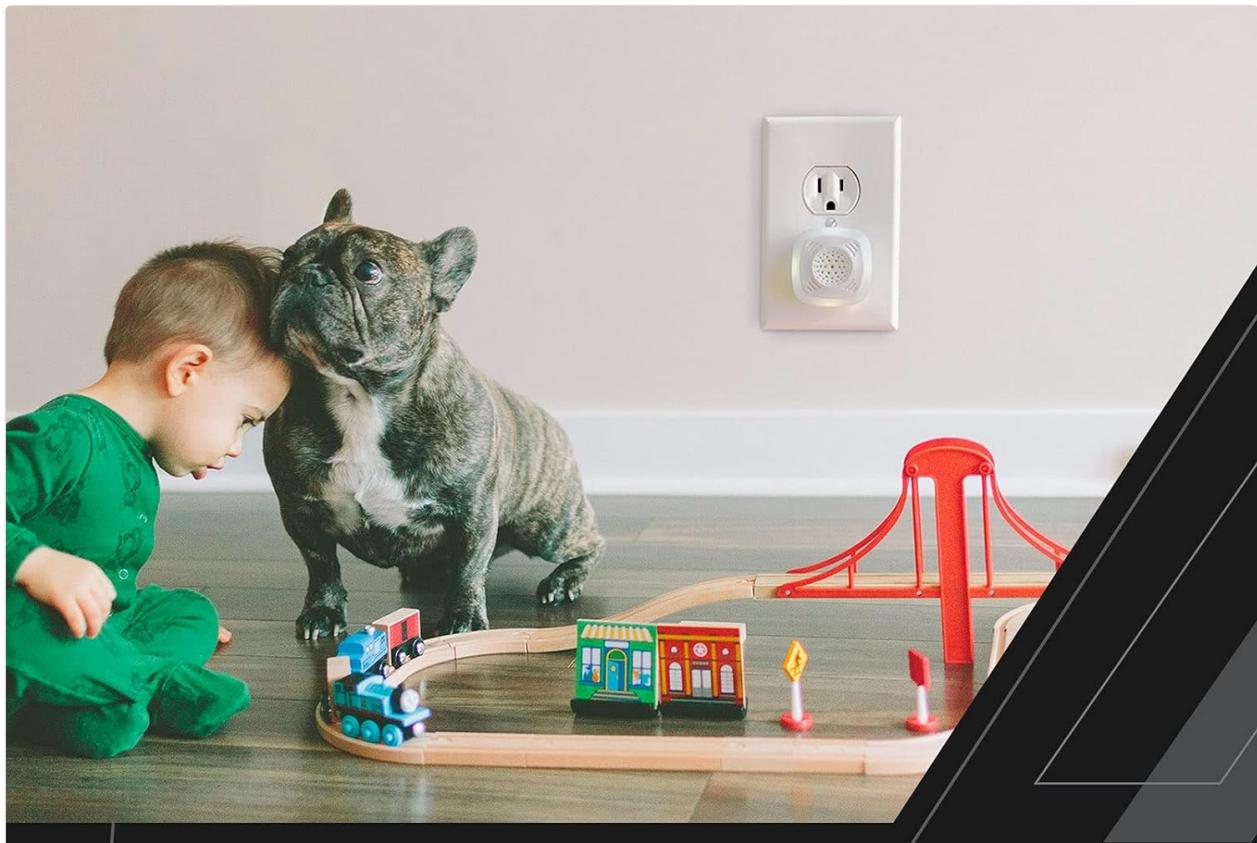

3. SAFETY INFORMATION

Please read and understand all safety instructions before using the OWLTRA OW-5 Ultrasonic Rodent Repellers.

- **Safe for Children & Pets:** The device is designed to be non-toxic and poison-free, making it safe for use around children and most household pets (excluding rodents).
- **Indoor Use Only:** This product is intended for indoor use in dry environments. Do not expose to water or high humidity.
- **Electrical Safety:**

- Plug directly into a wall outlet. Do not use with extension cords or power strips.
- Do not attempt to open or modify the device.
- Unplug the device from the outlet before cleaning.

- **Ventilation:** Ensure the device is not covered or obstructed, as this may affect performance and lead to overheating.

SAFE FOR CHILDREN & PETS!

Image: A child and a dog near a plugged-in repeller, highlighting its safety for non-rodent pets and children.

4. SETUP

4.1 Unpacking

1. Carefully remove the OWLTRA OW-5 Ultrasonic Rodent Repellers from their packaging.
2. Inspect each unit for any signs of damage. If any unit is damaged, do not use it and contact customer support.

4.2 Installation

1. Identify areas with known or suspected rodent activity.

2. Plug one repeller directly into a standard 120V AC wall outlet. Ensure the outlet is easily accessible and not obstructed by furniture or curtains.
3. For optimal performance, position the repeller in an open area, away from solid objects like walls, furniture, or thick carpets, which can absorb or block the ultrasonic waves. The sound waves cannot penetrate solid surfaces.
4. The built-in night light will illuminate, indicating the device is powered on and functioning.
5. Use one repeller per medium-sized room where rodent activity is present. For larger areas or multiple rooms, deploy additional units as needed.

Image: A hand plugging the repeller into a wall outlet, demonstrating the simple setup.

5. OPERATING INSTRUCTIONS

5.1 How It Works

The OWLTRA OW-5 repeller emits high-frequency ultrasonic sound waves that are specifically tuned to disrupt the nervous and auditory systems of rodents. These sound waves create an irritating and hostile environment for pests, causing them to avoid the treated area. This method is entirely physical and does not involve chemicals or traps.

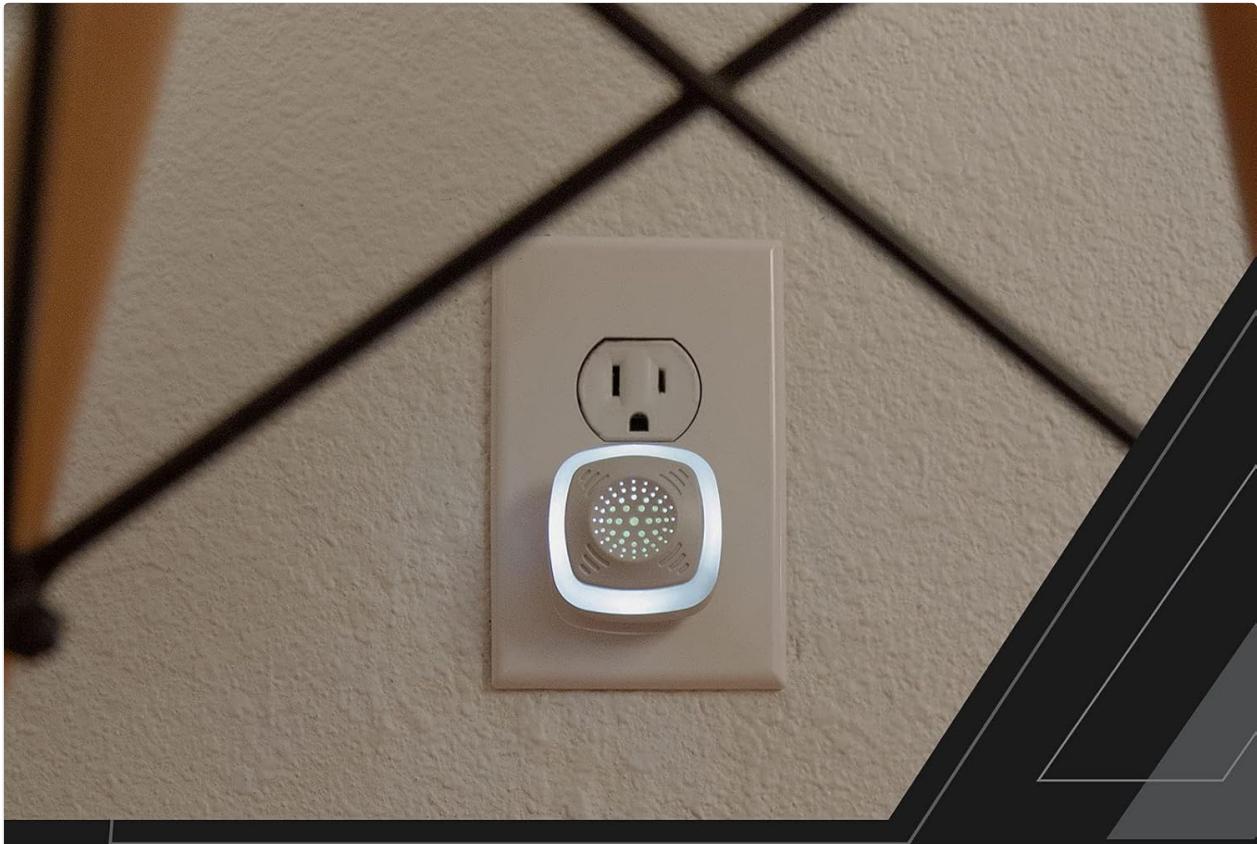

**HIGH-FREQUENCY SOUND
REPELS RODENTS & COMPLETELY
INAUDIBLE & SAFE TO HUMANS.**

Image: The repeller with visual representation of ultrasonic waves, illustrating its function.

5.2 Night Light Function

Each repeller includes a built-in night light. This light serves two purposes: it provides a soft illumination in dark areas and acts as a visual indicator that the device is powered on and actively emitting ultrasonic waves.

A BUILT-IN NIGHT LIGHT PROVIDES A SOFT GLOW & INDICATES WORKING STATUS.

Image: The repeller plugged into an outlet, with its night light glowing softly.

5.3 Best Practices for Effectiveness

- **Consistent Use:** Keep the repellers plugged in continuously for best results.
- **Strategic Placement:** Place units in rooms where rodent activity is observed. Ensure the ultrasonic waves have a clear path and are not blocked by furniture, walls, or other large objects.
- **Initial Period:** It may take 2 to 4 weeks to see a significant reduction in rodent activity as pests are gradually driven away. Patience is key during this period.
- **Combine with Other Methods:** For severe infestations, consider using the ultrasonic repellers in conjunction with traditional traps or baits for a more comprehensive approach during the initial phase.
- **Eliminate Food Sources:** Maintain good hygiene, store food in sealed containers, and promptly clean up spills to reduce attractants for rodents.

6. MAINTENANCE

The OWLTRA OW-5 Ultrasonic Rodent Repellers require minimal maintenance to ensure continued performance.

- **Cleaning:** Unplug the device from the wall outlet. Use a soft, dry cloth to wipe the exterior of the repeller. Do not use liquid cleaners, sprays, or abrasive materials.
- **Clear Obstructions:** Periodically check that the repeller's speaker grille is not covered by dust, debris, or other objects, as this can impede the ultrasonic wave emission.
- **Storage:** If storing the device for an extended period, unplug it and keep it in a cool, dry place.

7. TROUBLESHOOTING

If you encounter issues with your OWLTRA OW-5 Ultrasonic Rodent Repellers, please refer to the following troubleshooting guide:

Problem	Possible Cause / Solution
Device is not turning on (night light is off).	No Power: Ensure the wall outlet is functional by plugging in another device. Loose Connection: Unplug the repeller and plug it back in firmly.
Rodents are still present after several weeks.	Improper Placement: Ensure the repeller is not blocked by furniture, walls, or other objects. Ultrasonic waves cannot penetrate solid surfaces. Insufficient Coverage: For larger rooms or severe infestations, more than one repeller may be needed. Time Required: It can take 2-4 weeks for rodents to be fully deterred. Continue consistent use. Food Sources: Eliminate accessible food and water sources that attract rodents.
Night light is on, but no perceived effect.	The ultrasonic sound is inaudible to humans. The night light indicates proper function. Refer to "Rodents are still present" solutions above.

8. SPECIFICATIONS

Feature	Detail
Brand	OWLTRA
Model Number	URRL01
Product Dimensions	1.89" L x 3.74" W x 3.07" H
Item Weight	3.99 ounces (per unit)
Number of Pieces	4
Recommended Uses	Indoor Usage
Is Electric	Yes
Target Species	Rodent

Feature	Detail
Material	Plastic
Color	White
UPC	850027078373
