SETUP AND ASSEMBLY

The Wood Trick Christmas Ball 3D Wooden Puzzle consists of 179 pieces and requires no glue or special tools for assembly. An illustrated step-by-step guide is included in the kit to facilitate the building process. Assembly typically takes approximately 2-3 hours.

Assembly Steps:

1. Carefully detach all wooden pieces from their sheets. A specialized tool is provided to assist in pushing out the pieces without damage.
2. Follow the included illustrated instructions precisely. Pay close attention to the orientation and connection points of each piece.
3. When connecting pieces, apply gentle, even pressure. Pieces are designed to fit snugly and click into place. Avoid excessive force to prevent breakage.
4. Utilize the provided wax to lubricate moving parts if necessary, ensuring smooth operation of the ball's opening mechanism.

5. Once all pieces are assembled, ensure all connections are secure.

OPERATING THE CHRISTMAS BALL

Your assembled Wood Trick Christmas Ball serves as both a decorative ornament and a functional container.

Opening and Closing:

The Christmas Ball features a hinged design with a small latch mechanism. Gently push the designated area to release the latch and open the two halves of the ball. To close, align the halves and press firmly until the latch engages.

Hidden Compartment:

The interior of the ball features a hidden compartment, ideal for placing small surprises, wrapped candies, or other tiny gifts. While the latch provides closure, it is not designed for heavy or unsecured items that could fall out if the ball is jostled.

MAINTENANCE

To ensure the longevity and appearance of your wooden puzzle, follow these maintenance guidelines:

- **Cleaning:** Dust the puzzle regularly with a soft, dry cloth. Avoid using abrasive cleaners or excessive moisture, which can damage the wood.
- **Storage:** Store the puzzle in a dry environment, away from direct sunlight or extreme temperature fluctuations. These conditions can cause the wood to warp or crack.
- **Lubrication:** If the moving parts of the opening mechanism become stiff, apply a small amount of the provided wax (or a similar non-toxic wood wax) to the contact points to restore smooth operation.

TROUBLESHOOTING

- **Pieces are difficult to fit:** The pieces are designed for a tight fit. Ensure correct alignment and apply firm, but gentle, pressure. Do not force pieces, as this may cause them to break. Refer to the instruction manual for visual guidance.
- **Pieces break during assembly:** While the wood is durable, thin sections can be fragile. If a piece breaks, carefully assess if it can be repaired with wood glue. For significant breakage or missing parts, please contact Wood Trick customer support.
- **Ball does not stay closed securely:** The latch mechanism is designed to hold the ball closed. If it feels loose, gently inspect the small notch and corresponding slot for any obstructions or minor misalignments. The latch can be customized slightly to improve closure if needed.
