SETUP AND INITIAL USE

Before first use, ensure all packaging materials are removed. Place the machine on a stable, level surface. Fill the water tank and bean container as described below.

1. Water Tank

The water tank is located on the left side of the machine. Open the lid, remove the tank, fill it with fresh water, and reinsert it securely. The water tank has a capacity of 1.3 liters.

The machine also features a separate drawer for ground coffee, allowing for single servings of pre-ground coffee.

OPERATING INSTRUCTIONS

The Miele CM 5510 Silence offers a variety of beverage options and customizable settings for your perfect cup.

1. Selecting a Beverage

Use the DirectSensor display and touch controls to navigate through the menu. You can select from Ristretto, Espresso, Coffee,

Long coffee, Cappuccino, Latte Macchiato, Hot milk, Milk froth, Caffè Latte, and Hot water. The machine also has a coffee pot function to prepare up to 8 cups at a time (coffee pot sold separately).

4. Individual Profile Settings

The machine allows you to save your favorite drink settings in one of two connoisseur profiles. This includes grind level, water temperature, amount of coffee, water, milk, milk froth, pre-brew settings, and more.

MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and longevity of your Miele coffee machine. The machine features convenient cleaning programs and easily removable components.

1. Automatic Rinsing Functions

The machine performs automatic rinsing of the milk line with water from the water container. This helps maintain hygiene and prevents blockages.

4. Descaling

The machine features manual descaling. Follow the on-screen prompts for the descaling process. Descaling tablets are included with the machine.

The programmable water hardness setting helps optimize descaling intervals.

TROUBLESHOOTING

If you encounter issues with your Miele CM 5510 Silence, refer to the common solutions below. For persistent problems, consult the full user manual or Miele support.

- **Milk Frother Sputtering:** Ensure the milk pipework is clean and properly connected. Use fresh, cold milk. If using

alternative milks, note that some may not froth as effectively as dairy milk.

- **"Empty Drip Tray" Message:** This indicates the drip tray is full. Remove, empty, and clean the drip tray and coffee grounds container.
- **No Coffee Dispensing:** Check if the water tank is filled and correctly inserted. Ensure the bean container has enough beans or that ground coffee is properly loaded if using that option. Verify the brew unit is correctly seated.
- **Machine Not Turning On:** Check if the power cord is securely plugged into a working outlet.
