## 5. COOKING GUIDE AND TIPS

Achieve optimal results with these general cooking guidelines and tips:

- **Preheating:** For best results, preheat the air fryer for 3-5 minutes before adding food.
- **Oil Usage:** While air frying requires significantly less oil than deep frying, a light spray or toss with oil can enhance crispiness and flavor for many foods.
- **Do Not Overfill:** Avoid overcrowding the cooking accessories. Cook in batches if necessary to ensure even cooking and crispiness.
- **Shaking/Flipping:** For even browning, shake the rotisserie basket or flip items on the crisper tray halfway through the cooking time.
- **Cooking Times:** Cooking times may vary based on food density, size, and initial temperature. Always use a food thermometer to ensure food is cooked to safe internal temperatures.
