X88 X88-Pro-13-32GB

X88 PRO 13 Android TV Box User Manual

Model: X88-Pro-13-32GB

Introduction

The X88 PRO 13 Android TV Box is a smart home player designed to enhance your entertainment experience. Equipped with the latest Android 13.0 OS and a powerful RK3528 Quad-Core Cortex-A53 CPU, it offers a stable and smooth performance. With 4GB RAM and 32GB ROM, it provides ample space for applications and media. This device supports 2.4G/5.8G WiFi 6, BT 5.0, and delivers stunning 8K H.265 Ultra HD content with HDR10+ support, along with USB 3.0 for high-speed data transfer.

Package Contents

The X88 PRO 13 Android TV Box comes with the main unit, an HDMI cable for connecting to your TV, a remote control for navigation, an AC power adapter, and a user guide.

- X88 PRO 13 Android TV Box
- Remote Control
- HDMI Cable
- Power Adapter
- User Guide

Setup Guide

Follow these steps to set up your X88 PRO 13 Android TV Box and begin enjoying your media.

1. Unboxing and Initial Inspection

Carefully remove all components from the packaging. Inspect the TV box and accessories for any signs of damage.

Your browser does not support the video tag.

This video demonstrates the unboxing process of the X88 PRO 13 Android TV Box, showing the contents and initial look at the device.

2. Connecting to Your TV

Connect the provided HDMI cable from the HDMI port on the TV box to an available HDMI input on your television.

The rear panel of the X88 PRO 13 TV Box features multiple ports for connectivity, including HDMI for video output, LAN for wired internet, USB 2.0 and USB 3.0 for peripherals, and a TF card slot for expandable storage.

This diagram illustrates the simple three-step setup process: connect the TV Box to your TV via HDMI, connect to the internet (wired or wireless), and then start streaming content.

3. Powering On

Plug the power adapter into the DC port on the TV box, then plug the adapter into a wall outlet. The device will power on automatically or can be turned on using the remote control.

4. Network Connection

For internet access, you have two options:

- **Wired Connection:** Connect an Ethernet cable from your router to the LAN port on the TV box.
- **Wireless Connection (WiFi 6):** Navigate to the network settings on the TV box, select your WiFi network, and enter the password. The device supports 2.4GHz and 5.8GHz dual-band WiFi 6 for faster and more stable connections.

WiFi 6 technology provides faster transmission speeds and enhanced stability for a seamless streaming experience.

Operating Instructions

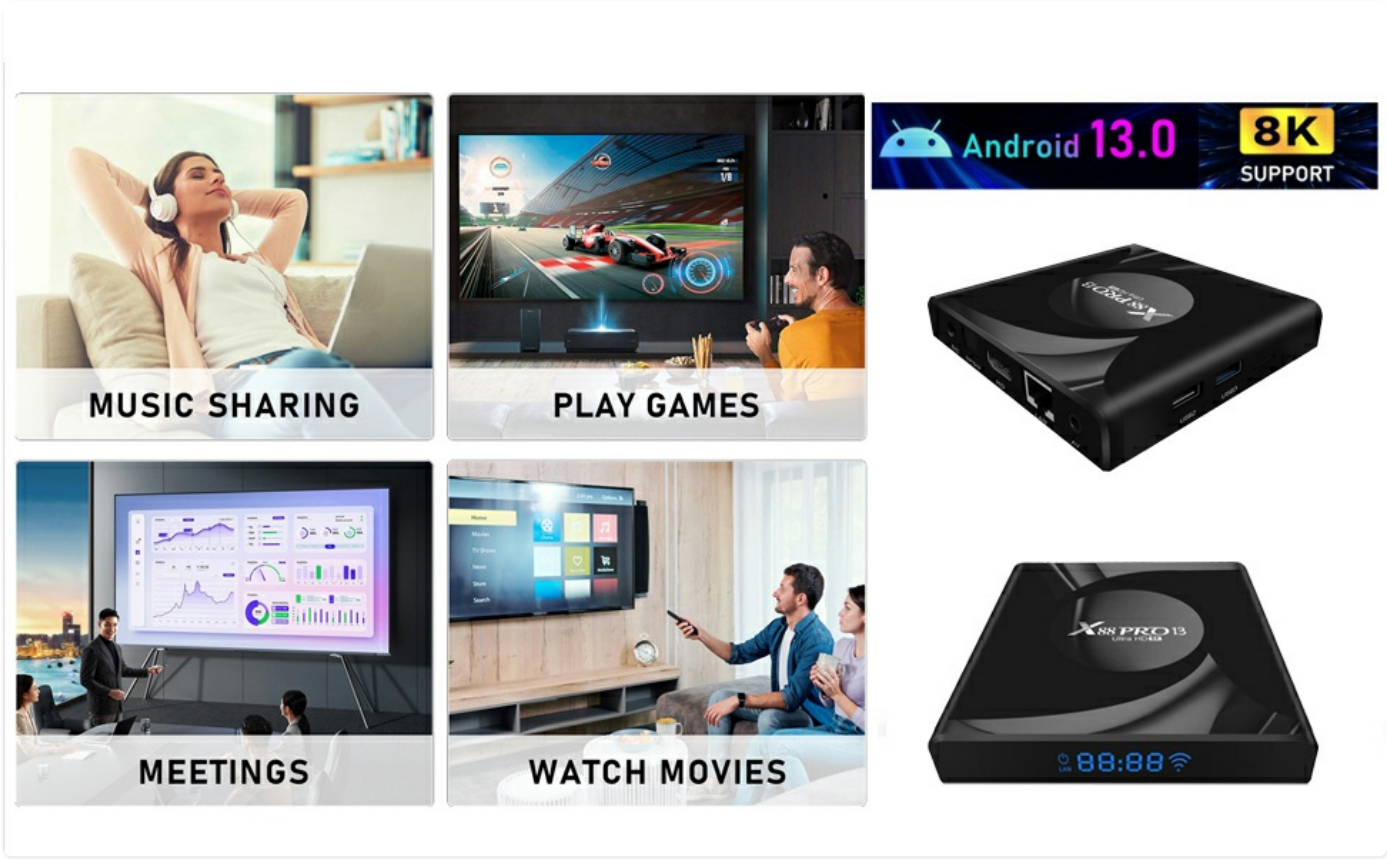

Once your X88 PRO 13 Android TV Box is set up, you can begin exploring its features.

1. Navigating the Interface

Use the provided remote control to navigate the Android 13.0 interface. The directional buttons allow you to move between icons, and the "OK" button selects items. The home button returns you to the main screen, and the back button goes to the previous screen.

The Android 13.0 operating system offers a user-friendly interface with faster speed and better compatibility for various applications.

Customize your user interface by adding or removing app icons directly from the home screen for quick access to your favorite applications.

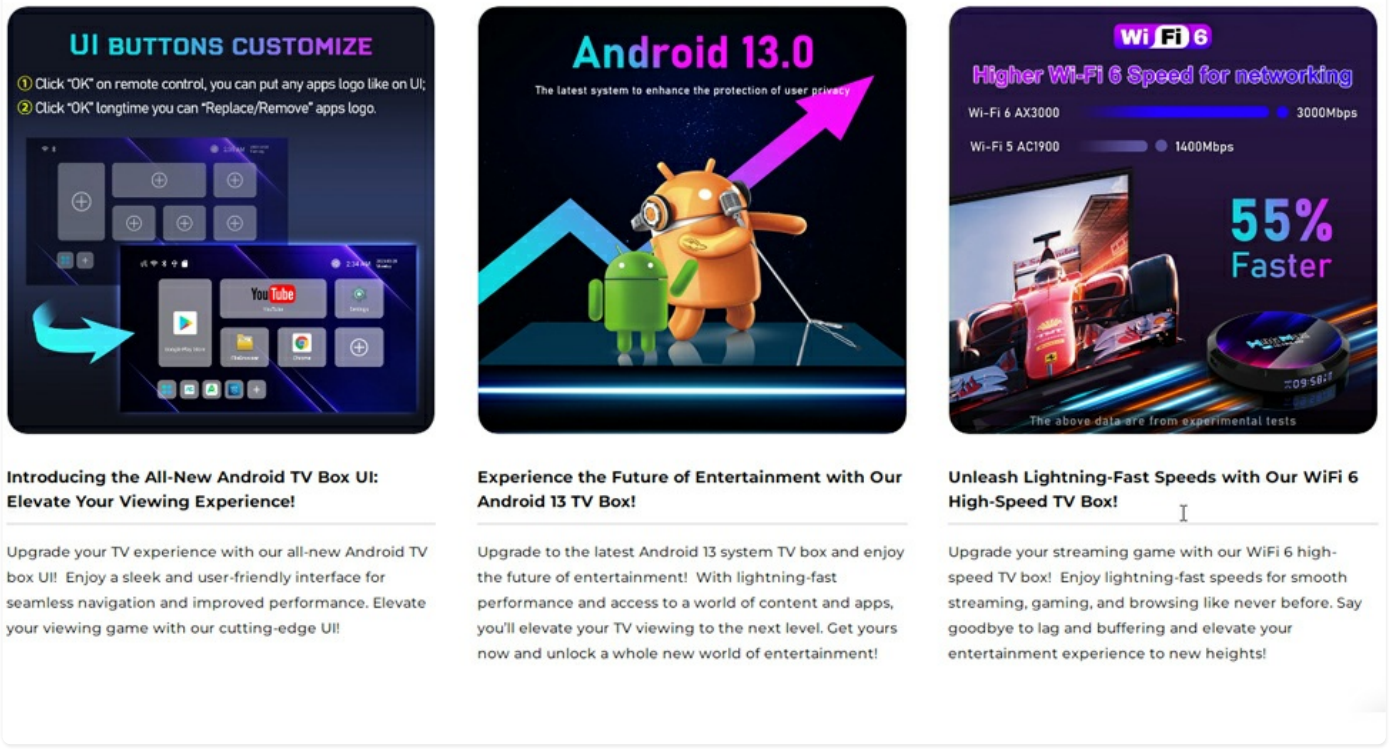

2. Media Playback and Streaming

The X88 PRO 13 supports a wide range of media formats and streaming services. You can install apps like Hulu, Netflix, YouTube, and others from the Google Play Store (note: some apps like Netflix/Hulu may have copyright restrictions and require specific versions or sideloading).

- **8K H.265 Decoding:** Enjoy ultra-high-definition content with stunning clarity.
- **3D Support:** Experience immersive 3D movies at home.
- **USB 3.0:** Connect external hard drives or USB devices for fast media playback.

The TV box supports 8K video decoding, providing an incredibly detailed and vibrant visual experience.

Enjoy an immersive 3D viewing experience directly from your TV box.

3. Bluetooth Connectivity (BT 5.0)

Connect various Bluetooth devices such as keyboards, mice, game controllers, headphones, or speakers for enhanced control and audio experience.

Bluetooth 5.0 allows for easy connection to a wide range of multimedia devices, enhancing your interaction with the TV box.

4. Mirroring Cast Function

Utilize the built-in Miracast function to transmit video content from your phone or tablet directly to your large TV screen.

Maintenance

Proper care and maintenance will ensure the longevity and optimal performance of your X88 PRO 13 Android TV Box.

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the device. Avoid using liquid cleaners or abrasive materials.
- **Ventilation:** Ensure the TV box is placed in a well-ventilated area to prevent overheating. Do not block the ventilation holes.
- **Power Off:** When not in use for extended periods, it is recommended to power off the device and unplug it from the power outlet.
- **Software Updates:** Periodically check for and install system updates to ensure you have the latest features and security patches.

Troubleshooting

If you encounter issues with your X88 PRO 13 Android TV Box, refer to the common problems and solutions below.

Problem	Possible Cause	Solution
No Power / Device Not Turning On	Power adapter not connected properly; Power outlet issue.	Ensure the power adapter is securely connected to the device and a working power outlet. Try a different outlet.
No Picture on TV Screen	Incorrect HDMI connection; Wrong TV input selected.	Check HDMI cable connection. Ensure your TV is set to the correct HDMI input source.
Buffering or Slow Streaming	Weak Wi-Fi signal; Network congestion; Internet speed issues.	Move the TV box closer to your router or use a wired Ethernet connection. Restart your router. Check your internet service provider's speed.
Remote Control Not Responding	Low or dead batteries; Obstruction between remote and device.	Replace batteries in the remote control. Ensure no objects are blocking the infrared sensor on the TV box.
Applications Crashing or Freezing	Insufficient memory; App compatibility issues; Outdated software.	Close background applications. Clear app cache. Update the app or the TV box firmware. Some apps may not be fully optimized for this Android version.
