WAITCOOK fdes301074

WAITCOOK Meat Probe Replacement User Manual

Model: fdes301074

PRODUCT OVERVIEW

This document provides instructions for the WAITCOOK Meat Probe Replacement, Model # fdes301074. This probe is designed as a direct replacement for the meat probe used in specific Char-Broil Deluxe Digital Electric Smokers.

Figure 1: WAITCOOK Meat Probe Replacement, Model # fdes301074. This image displays the stainless steel probe with its attached cable and 3.5mm audio jack style connector.

The probe is constructed from high-quality food-grade 304 stainless steel, ensuring durability and safety for use with all types of

meat. It features a 6-inch length and is engineered for simple installation and accurate temperature monitoring within your smoker.

SETUP AND INSTALLATION

The WAITCOOK Meat Probe is designed for straightforward installation into compatible Char-Broil electric smokers.

1. **Unpack the Probe:** Carefully remove the meat probe from its packaging.
2. **Remove Protective Cover:** Before first use, locate and remove the small protective cover from the tip of the probe. This cover is typically made of plastic and is present to protect the probe tip during shipping.

Figure 2: Illustration of the meat probe, highlighting the protective cover at the tip that must be removed before use. Also shown are details of the stainless steel probe, the compression interface, and the probe plug designed for Char-Broil smokers.

3. **Connect to Smoker:** Locate the meat probe port on your Char-Broil Deluxe Digital Electric Smoker. Insert the probe's plug firmly into this port.

Figure 3: The meat probe's connector inserted into the designated port on a Char-Broil electric smoker. The red circle highlights the connection point.

OPERATING INSTRUCTIONS

Once installed, the meat probe is ready for use to monitor the internal temperature of your food during the smoking process.

1. **Insert into Meat:** Carefully insert the stainless steel tip of the probe into the thickest part of the meat, avoiding bones. Ensure the tip is fully embedded to get an accurate reading.

Figure 4: A meat probe inserted into a large cut of meat inside a smoker, demonstrating proper placement for temperature monitoring.

2. **Monitor Temperature:** The smoker's display will show the internal temperature of the meat as measured by the probe. Refer to your smoker's manual for specific temperature settings and alerts.
3. **Remove After Use:** Once cooking is complete and the meat has reached the desired internal temperature, carefully remove the probe from the meat and the smoker. Allow it to cool before cleaning.

MAINTENANCE AND CARE

Proper care of your meat probe will ensure its longevity and accurate performance.

- **Cleaning:** After each use, clean the stainless steel probe tip and shaft thoroughly with warm, soapy water. Use a soft cloth or sponge to remove any food residue. Rinse well and dry completely before storage.
- **Do Not Submerge:** Do not submerge the entire probe, especially the connector end, in water. The electronic components within the connector are not waterproof.
- **Storage:** Store the probe in a clean, dry place when not in use to prevent damage and maintain hygiene.

TROUBLESHOOTING AND COMPATIBILITY

This meat probe is specifically designed for certain Char-Broil Deluxe Digital Electric Smoker models. Compatibility is crucial for proper function.

Compatible Models:

This replacement meat probe is compatible with the following Char-Broil Digital Electric Smoker models:
