OPERATING INSTRUCTIONS

Two-Way Lift Top Functionality

The coffee table features a dual lift-top design, allowing two sections of the tabletop to be independently raised and moved forward. This creates two separate, elevated surfaces suitable for working, dining, or other activities while seated on a sofa.

- To raise a tabletop section: Gently pull the desired section upwards and forward. The metal mechanism will smoothly lift and lock into place.

- To lower a tabletop section: Gently push the section downwards and backward until it rests flush with the main table surface. Ensure fingers are clear of the mechanism.

Two Installation Methods

The larger table top can be adjusted according to the direction of different L-shaped sofas.
