OPERATING INSTRUCTIONS

The Monstroid building set features interactive elements for dynamic play:

- **Poseable Legs:** The Monstroid has four poseable legs, articulated at the lower sections and feet, allowing for various stances and dynamic display options while maintaining stability.
- **Clamping Claws:** The large red claws are mounted on ball joints and feature hinged pincers, enabling them to open and close to grasp micro action figures or other objects.
- **Wind Whirling Action:** To activate the Monstroid's unique whirling action, locate the dowel at the back of the creature. Turn this dowel to make the Monstroid's body, head, and arms twist wildly, simulating battle movements.

- **Storage:** Store the set in a cool, dry place away from direct sunlight and extreme temperatures to prevent discoloration or warping of plastic components.
- **Handling:** Handle the assembled model with care to prevent pieces from detaching. Avoid dropping or applying excessive force.

TROUBLESHOOTING

If you encounter any issues during assembly or operation, consider the following:

- **Missing Pieces:** Double-check all packaging materials and the building area. If a piece is genuinely missing, refer to the manufacturer's customer service for assistance.
- **Difficulty Assembling:** Review the instruction booklet carefully, paying close attention to the orientation and connection points of each brick. Ensure pieces are pressed firmly together.
- **Loose Connections:** If parts feel loose, disassemble the affected section and reassemble, ensuring each connection is secure.
