Anita Women's Support Bra Orelly 5882 Instruction Manual

INTRODUCTION

This instruction manual provides essential information for the proper use, care, and maintenance of your Anita Women's Support Bra Orelly 5882. Please read this manual carefully to ensure optimal comfort and longevity of your product.

PRODUCT OVERVIEW

The Anita Orelly 5882 is a non-wired support bra designed for comfort and support. Key features include:

- Wire-free design for strain relief.
- Seamed cups for shaping and support.
- Upper cups adorned with lace on transparent tulle for an elegant finish.
- Wide, adjustable support straps for personalized comfort.
- Hook-and-eye back closure for a secure fit.

SETUP AND FITTING

Achieving the correct fit is crucial for comfort and support. Follow these steps to ensure your bra fits properly:

1. **Band Fit:** The band should be snug and level all the way around your body, not riding up in the back. It should be firm enough to provide most of the support.
2. **Cup Fit:** Your breasts should fill the cups without spilling over the top or sides. There should be no gaps or wrinkles in the cup fabric.
3. **Center Gore:** The center panel (gore) between the cups should lie flat against your sternum.
4. **Strap Adjustment:** Adjust the shoulder straps so they are comfortable and do not dig into your shoulders. Straps provide secondary support; the primary support comes from the band.

Refer to the Anita size guide for accurate measurements if you are unsure of your size.

OPERATING AND WEARING

Once properly fitted, the Anita Orely 5882 bra is designed for everyday wear, providing comfortable support throughout your activities. Ensure the hook-and-eye closure is securely fastened and straps are adjusted to prevent discomfort or slippage.

MAINTENANCE AND CARE INSTRUCTIONS

To maintain the quality and extend the lifespan of your Anita bra, follow these care instructions:

- **Hand Wash Recommended:** For best results, hand wash your bra in cool water with a mild detergent.
- **Machine Wash (Delicate Cycle):** If machine washing, use a lingerie bag and select a delicate cycle with cold water.
- **Avoid Bleach:** Do not use bleach or harsh chemicals, as these can damage the fabric and elasticity.
- **Air Dry:** Lay flat or hang to air dry. Do not tumble dry, as high heat can damage elastic fibers and alter the bra's shape.
- **Do Not Iron:** Ironing is not recommended.

TROUBLESHOOTING

If you experience issues with your bra, consider the following:

- **Band Riding Up:** The band is too loose. Try a smaller band size or adjust to a tighter hook-and-eye setting.
- **Cups Gaping or Wrinkling:** The cups are too large. Try a smaller cup size.
- **Spillage Over Cups:** The cups are too small. Try a larger cup size.
- **Straps Digging In:** The band is not providing enough support, or the straps are too tight. Ensure the band is snug, and loosen the straps.
- **Center Gore Not Lying Flat:** The cups are too small or the bra style is not suitable for your breast shape. Try a larger cup size or a different bra style.
