## 4. ASSEMBLY INSTRUCTIONS

---

The figures in this set require minor assembly. Follow the general guidelines below and refer to the specific figure sections for details. Components are designed to snap together. If a part does not fit easily, do not force it; check the orientation or ensure it is the correct part.

### 4.1 General Assembly Tips

- Identify all parts for a specific figure before starting assembly.
- Connect limbs (arms, legs) to the main body. Ensure correct left/right orientation.
- Attach head units to the neck joint.
- Equip weapons and shields by inserting pegs into designated holes on hands or arms.

### 4.2 Gundam Assembly

Assemble the RX-78-2 Gundam figure by attaching its arms, legs, and head to the torso. Equip the beam rifle into its right hand and the shield onto its left arm. The shield typically attaches via a peg and hole system.

## ガンダム

Figure 3: Assembled Gundam figure, ready for display.

### 4.3 Zaku Assembly

For the Zaku figure, connect its limbs and head to the main body. The Zaku typically comes with a machine gun or heat hawk. Attach the chosen weapon to its hand.

## ザク

Figure 4: Assembled Zaku figure, equipped with its weapon.

### 4.4 G-Fighter Assembly

The G-Fighter is a vehicle. Assemble its components, which may include attaching wings, cannons, or landing gear. Ensure all parts are securely fitted.

## Gファイター

Figure 5: Assembled G-Fighter vehicle.

### 4.5 Unicorn Gundam (Destroy Mode) Assembly

Assemble the Unicorn Gundam in Destroy Mode by attaching its distinctive V-fin, arms, and legs. Equip its beam magnum and shield. The shield for Unicorn Gundam often has multiple connection points.

## ユニコーンガンダム (テストロイモード)

Figure 6: Assembled Unicorn Gundam (Destroy Mode) figure.

### 4.6 MS Weapon Set

The MS Weapon Set includes various armaments and accessories. These can be used interchangeably with the Mobile Suit figures. Identify the appropriate hand or mounting point on the figures for each weapon.

## MS武器セット

### 5. OPERATING INSTRUCTIONS

These action figures feature multiple points of articulation, allowing for dynamic posing. Gently move the joints to achieve desired stances. Avoid forcing joints beyond their natural range of motion to prevent damage.

- **Joint Movement:** Most figures have ball joints or swivel joints at the neck, shoulders, elbows, hips, and knees.
- **Weapon Posing:** Weapons can be held in the figures' hands. Some shields or larger weapons may have additional attachment points on the back or arms.
- **Display:** Figures can be displayed on a flat surface. Consider using a display stand (not included) for more dynamic aerial poses.

## 6. MAINTENANCE AND CARE

- **Cleaning:** Dust figures regularly with a soft, dry cloth or a soft brush. For stubborn dirt, lightly dampen a cloth with water and gently wipe. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store figures in a cool, dry place away from direct sunlight to prevent discoloration or material degradation. Keep them in their original packaging or a sealed container if not on display to protect from dust.
- **Joint Care:** If joints become stiff, gently work them back and forth. If they become loose, a small amount of clear nail polish or a specialized joint tightener can be applied to the peg and allowed to dry before reassembly.

## 7. TROUBLESHOOTING

- **Parts Not Fitting:** Ensure you are using the correct parts for the specific figure. Check the orientation of the part. Do not force connections.
- **Loose Joints:** Refer to the "Joint Care" section under Maintenance and Care for solutions.
- **Missing or Damaged Parts:** If you find any parts missing or damaged upon opening the package, please contact BANDAI customer support.
