Setup

Follow these steps to set up your new Braun Oral-B Power Handle:

1. **Initial Charge:** Before first use, fully charge the handle. Place the handle onto your existing Oral-B charger. The battery indicator light will show charging status.
2. **Attach Brush Head:** Securely attach a compatible Oral-B brush head to the handle. Ensure it clicks into place.
3. **First Use:** Wet the brush head and apply a small amount of toothpaste.

Operating Instructions

Your Oral-B Power Handle is designed for effective daily brushing. It features multiple modes and smart features for an optimized cleaning experience.

1. **Power On/Off:** Press the power button to turn the toothbrush on. Press again to turn it off.
2. **Brushing Modes:** This handle supports 5 brushing modes. Press the mode button (if available) or cycle through modes by pressing the power button repeatedly after turning it on. The default mode is typically 'Daily Clean'.
3. **Brushing Technique:** Guide the brush head slowly from tooth to tooth, holding it in place for a few seconds on each tooth before moving to the next. Allow the brush to do the work.
4. **Pressure Sensor:** If your model includes a pressure sensor, a red light will illuminate if you are brushing too

hard. Reduce pressure to protect your gums and teeth.

5. **Timer:** Most Oral-B handles include a built-in timer that signals when you have brushed for the dentist-recommended 2 minutes.
6. **Bluetooth Connectivity (select models):** Some models feature Bluetooth to connect with the Oral-B app for real-time feedback and tracking. Refer to the Oral-B app instructions for pairing.

Maintenance

Proper maintenance ensures the longevity and hygiene of your power handle.

- **After Each Use:** Rinse the brush head thoroughly under running water while the handle is still on. Then, remove the brush head and rinse both the brush head and the handle separately. Wipe the handle dry with a clean cloth.
- **Preventing Buildup:** To prevent toothpaste residue and grime from accumulating around the charging base, regularly clean the bottom of the handle and the charger. You can place a small absorbent material, such as a cut-out cotton pad or panty liner, around the charging pin to absorb drips and prevent buildup. Replace this material regularly.
- **Charging Base:** Keep the charging base clean and dry. Avoid submerging the charger in water.
- **Battery Care:** For optimal battery life, allow the handle to fully discharge occasionally before recharging.

Troubleshooting

If you encounter issues with your power handle, try these common solutions:

- **Handle Not Turning On:** Ensure the handle is fully charged. If the battery is completely depleted, it may take a few minutes on the charger before the indicator light appears.
- **Battery Not Holding Charge:** Over time, rechargeable batteries can degrade. If your handle's battery life has significantly decreased after many years of use, it may be due to normal wear. Ensure you are using the correct charger for your model.
- **Protective Rubber Issues:** If the protective rubber on the handle appears to be coming off, ensure the handle is kept dry after each use and during charging. Avoid harsh cleaning agents that could degrade the material.
- **Unusual Noise/Vibration:** Check that the brush head is securely attached. If the issue persists, the internal mechanism may be faulty.
- **Charging Indicator Not Working:** Verify the charger is plugged in correctly and the outlet is functional. Clean the charging contacts on both the handle and the charger.

If these steps do not resolve the issue, please contact Braun customer support.
