Intex PureSpa 6 Person Bubble Massage Inflatable Hot Tub Spa Set Instruction Manual

Model: 28427EP

IMPORTANT SAFETY INFORMATION

Please read and understand all instructions before installing and using this product. Failure to follow these warnings and instructions could result in property damage, serious injury, or death. This manual contains important information regarding the setup, operation, and maintenance of your Intex PureSpa. For comprehensive safety guidelines, always refer to the full PDF user manual provided with your product.

WARNING: This product can expose you to chemicals including Lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

- Always supervise children and individuals with health conditions when they are in or near the spa.
- Do not operate the spa if the water temperature exceeds 104°F (40°C).
- Avoid using electrical appliances near the spa.
- Ensure proper chemical balance to prevent skin irritation and damage to the spa.

PRODUCT OVERVIEW

The Intex PureSpa 6 Person Bubble Massage Inflatable Hot Tub Spa Set provides a relaxing and therapeutic experience with its advanced features and durable construction. Designed for comfort and ease of use, this portable spa is an excellent addition to any outdoor space.

Key Features

- **Fiber-Tech Beam Construction:** Innovative Fiber-Tech Technology offers superior structural stability while maintaining a comfortable surface for a luxurious and refreshing spa experience.

- **Hard Water Treatment System:** Built-in Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system; hard water buildup limits water flow and reduces the life of your spa.
- **Heated Air Bubble Technology:** The Positive Temperature Coefficient (PTC) heater is designed to maximize heat transfer to the water, while ensuring the highest level of safety, performance, and longevity.
- **Energy Efficient Spa Cover:** High density thermal-resistant foam provides extra insulation and minimizes heat loss; this cover enhances the Spa performance while improving the energy efficiency by as much as 50%.

Components Included

Your Intex PureSpa package includes the following items:

The complete Intex PureSpa 6 Person Bubble Massage Inflatable Hot Tub Spa Set, including the inflatable spa, control unit, and accessories.

WHAT'S INCLUDED

Energy Efficient
Cover

Control Panel

Spa Control
Base

A visual representation of the main components included with the PureSpa: the energy-efficient cover, the digital control panel, and the spa control base unit.

2 FILTER CARTRIDGES

Two S1 filter cartridges, essential for maintaining clean and clear spa water by trapping debris and impurities.

FLOATING CHEMICAL DISPENSER

The floating chemical dispenser, designed to hold chemical tablets for continuous and even distribution of sanitizers in the spa water.

SETUP

Proper setup is crucial for the safe and efficient operation of your Intex PureSpa. Follow these steps carefully:

1. Site Selection

- Choose a flat, level surface that can support the weight of the filled spa (approximately 2,400 lbs or 1,089 kg).
- Ensure the area is free of sharp objects and debris.
- Locate the spa near a suitable grounded electrical outlet, ensuring the power cord is not stretched or placed in a high-traffic area.
- Provide adequate drainage for water runoff.

2. Inflation

The PureSpa features a **FastFill Inflation System** for quick and easy setup.

- Unfold the spa liner and spread it out on the chosen site.
- Connect the inflation hose from the control unit to the spa's inflation valve.
- Press the inflation button on the control panel. The spa will inflate automatically.
- Inflate until the spa walls are firm to the touch, but not over-inflated.
- Inflate the included inflatable cover insert and place it inside the spa cover.

3. Filling the Spa

- Ensure the drain valve is closed.
- Fill the spa with fresh water using a garden hose. Fill to the recommended water level indicated on the spa's interior.

4. Control Panel Setup

The **Touch Button Control Panel** allows easy management of spa functions.

- Connect the control unit to a grounded electrical outlet.
- The control panel display will light up.
- Familiarize yourself with the buttons for heating, bubble massage, and filtration.

OPERATION

Once your PureSpa is set up, you can begin to enjoy its features. Always ensure the spa cover is on when not in use to maintain water temperature and cleanliness.

1. Heating the Water

- Press the heater button on the control panel. The display will show the current water temperature and the set temperature.
- Use the temperature adjustment buttons to set your desired water temperature (between 68°F and 104°F / 20°C and 40°C).
- The heating rate is approximately 2-3°F (1-1.5°C) per hour, depending on ambient temperature and initial water temperature.

2. Bubble Massage Function

- Activate the bubble massage by pressing the bubble button on the control panel.
- The 140 high-powered bubble jets will provide a soothing massage.
- The bubble function has an automatic shut-off after 30 minutes to prevent overheating and conserve energy.

3. Filtration System

- The filtration system runs automatically to keep the water clean.
- You can manually activate or deactivate the filtration cycle using the filter button on the control panel.

MAINTENANCE

Regular maintenance is essential to ensure the longevity and hygiene of your Intex PureSpa.

1. Water Chemistry

- Test the spa water regularly using test strips to check pH, chlorine/bromine, and alkalinity levels.
- Maintain pH levels between 7.4 and 7.6.
- Utilize the built-in **Hard Water Treatment System** to reduce calcium buildup, which can extend the life of your spa and make water gentler on skin.
- Add appropriate sanitizers (chlorine or bromine) and other chemicals as needed to keep the water clean and safe. Use the provided floating chemical dispenser for even distribution.

2. Filter Cartridge Cleaning and Replacement

- The filter cartridges should be cleaned daily or every other day, depending on usage.
- Remove the filter housing and rinse the cartridge thoroughly with a garden hose.
- Replace filter cartridges every 2-4 weeks, or sooner if they remain dirty after cleaning.

3. Draining and Storage

- To drain the spa, connect a garden hose to the drain valve and open the valve.
- Once drained, clean the interior and exterior of the spa with a mild detergent and rinse thoroughly.
- Ensure the spa is completely dry before deflating and storing to prevent mold and mildew.
- Store the spa and all components in a dry, temperate location, away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

This section provides solutions to common issues you might encounter with your Intex PureSpa. For more complex problems, please refer to the full user manual or contact customer support.

Problem	Possible Cause	Solution
Spa not heating	Heater not activated, low water level, dirty filter, ambient temperature too low.	Ensure heater is on. Check water level and add water if necessary. Clean or replace filter cartridge. Heating may be slower in cold weather.
Bubbles are weak or not working	Bubble function not activated, air blower obstruction, automatic shut-off.	Press the bubble button. Check for any obstructions around the air blower intake. Wait for the 30-minute auto-shutoff timer to reset.
Water is cloudy or dirty	Dirty filter cartridge, improper water chemistry, heavy usage.	Clean or replace filter cartridge. Test and adjust water chemistry (pH, sanitizer). Shock the water if necessary.
Spa is losing air	Loose valve cap, small puncture, temperature changes.	Ensure all valve caps are tightly secured. Check for small punctures and repair with the included patch kit. Air pressure can fluctuate with temperature changes; re-inflate if needed.

SPECIFICATIONS

Detailed technical specifications for the Intex PureSpa 6 Person Bubble Massage Inflatable Hot Tub Spa Set:

Specification	Detail
Brand	Intex
Model Name	PureSpa Bubble Massage Spa
Item Model Number	28427EP
UPC	078257328871
