Camiysn camisyn61-black gray-blue switch

Camiysn 60% Mechanical Gaming Keyboard Instruction Manual

Model: camisyn61-black gray-blue switch

INTRODUCTION

This manual provides detailed instructions for the setup, operation, and maintenance of your Camiysn 60% Mechanical Gaming Keyboard. Please read this manual thoroughly to ensure proper use and to maximize your product experience.

PRODUCT FEATURES

- **60% Compact Layout:** Space-saving design with 61 keys.
- **Clicky Blue Switches:** Provides excellent tactile feedback and a clear clicky sound, ideal for gaming and typing.
- **N-Key Rollover:** All keys are non-conflict, allowing multiple keys to register simultaneously for fast response.
- **Blue LED Backlight:** Features 19 distinct blue LED light effects.
- **Detachable Type-C Cable:** Offers plug-and-play convenience and wide compatibility with Win2000/7/8/10.
- **Ergonomic Design:** Smooth lines and comfortable feel to reduce hand fatigue.
- **Durable Construction:** Two-color injection keycaps enhance longevity.

STAR 61

PACKAGE CONTENTS

The package includes the following items:

- Camiysn 60% Mechanical Gaming Keyboard (with blue switches)
- Detachable Type-C to A USB Cable
- Keycap Puller (for switch/keycap replacement)
- Additional red keycaps (for customization)

Image: The Camiysn 60% mechanical gaming keyboard, featuring a black and grey body with red accent keycaps for Esc, Spacebar, and Backspace.

SETUP INSTRUCTIONS

- Connect the Cable:** Insert the Type-C end of the detachable cable into the port on the back of the keyboard.
- Connect to Computer:** Plug the USB-A end of the cable into an available USB port on your PC or laptop.
- Driver Installation:** The keyboard is plug-and-play and typically does not require additional driver installation. Your operating system (Windows 2000/7/8/10) will automatically recognize the device.
- Placement:** Position the keyboard comfortably on your desk. Its compact size is designed to save space.

OPERATING INSTRUCTIONS

Basic Key Functions

The Camiysn 60% keyboard features a compact layout. Many keys have secondary functions accessed via the **Fn** key.

- **Standard Typing:** All alphanumeric keys function as standard.
- **Function Keys (F1-F12):** Accessed by holding **Fn** and pressing the corresponding number key (e.g., **Fn + 1** for F1).
- **Arrow Keys:** Accessed by holding **Fn** and using keys like W, A, S, D or other designated keys (refer to keycap legends if present).
- **Home, End, PgUp, PgDn:** Accessed by holding **Fn** and pressing the respective keys (e.g., **Fn + J** for Home, **Fn + K** for PgUp).

LED Backlight Control

The keyboard features 19 blue LED light effects. Use the following combinations to control the backlight:

- **Change Light Effects:** Press **Fn + ** to cycle through the 19 different blue LED lighting modes.
- **Adjust Brightness:** Use **Fn + ↑** (Up Arrow) to increase brightness and **Fn + ↓** (Down Arrow) to decrease brightness.
- **Adjust Speed:** Use **Fn + ←** (Left Arrow) to slow down the lighting effect speed and **Fn + →** (Right Arrow) to speed up the lighting effect.

MAINTENANCE

To ensure the longevity and optimal performance of your keyboard, follow these maintenance guidelines:

- **Cleaning Keycaps:** Use a soft, damp cloth to wipe the keycaps. For deeper cleaning, use the provided keycap puller to remove keycaps and clean underneath with compressed air or a small brush.
- **Cleaning Switches:** If switches become dirty, use compressed air to remove dust and debris. Avoid liquid cleaners directly on switches.

- **Cable Care:** Handle the detachable Type-C cable carefully. Avoid sharp bends or excessive pulling to prevent damage.
- **Storage:** When not in use for extended periods, store the keyboard in a dry, dust-free environment.
- **Avoid Liquids:** Keep liquids away from the keyboard to prevent damage to internal components.

HOT SWAP CKLICKY BLUE SWITCHES

Excellent tactile feedback, when pressed, you can clearly get the feedback of the click.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Keyboard not responding	Loose cable connection, faulty USB port, driver issue.	Ensure the Type-C cable is securely connected to both the keyboard and the computer. Try a different USB port on your computer. Restart your computer. Check Device Manager (Windows) to see if the keyboard is recognized.
Backlight not working or stuck	Backlight turned off, brightness set to minimum, software glitch.	Press Fn + \ to cycle through lighting modes. Increase brightness using Fn + ↑ . Unplug and replug the keyboard.
Keys not registering correctly	Dust/debris under keycap, faulty switch.	Remove the keycap using the keycap puller and clean the switch area with compressed air. If a switch is faulty, it may need replacement (hot-swappable design allows for this).

SPECIFICATIONS

Brand	Camiysn
