Krups EA895N

Krups EA895N Evidence One Fully Automatic Coffee Machine User Manual

Model: EA895N

INTRODUCTION

This user manual provides detailed instructions for the setup, operation, maintenance, and troubleshooting of your Krups EA895N Evidence One Fully Automatic Coffee Machine. Please read this manual carefully before first use and keep it for future reference.

The Krups Evidence One is designed to deliver a wide range of coffee specialties with ease, featuring advanced technology for optimal brewing and user convenience.

SAFETY INSTRUCTIONS

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and/or injury to persons, including the following:

- Do not immerse the appliance, power cord, or plug in water or any other liquid.
- Ensure the voltage indicated on the appliance corresponds to your mains voltage.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Keep the appliance and its cord out of reach of children.
- Unplug from outlet when not in use and before cleaning.

PRODUCT OVERVIEW

The Krups EA895N Evidence One is a fully automatic coffee machine designed for ease of use and a wide variety of

coffee beverages. It features a sleek design and intuitive controls.

SETUP

Unpacking and Initial Placement

1. Carefully remove all packaging materials from the appliance.
2. Place the coffee machine on a stable, flat, heat-resistant surface, away from water splashes and heat sources.
3. Ensure adequate ventilation around the machine.

Water Tank Filling

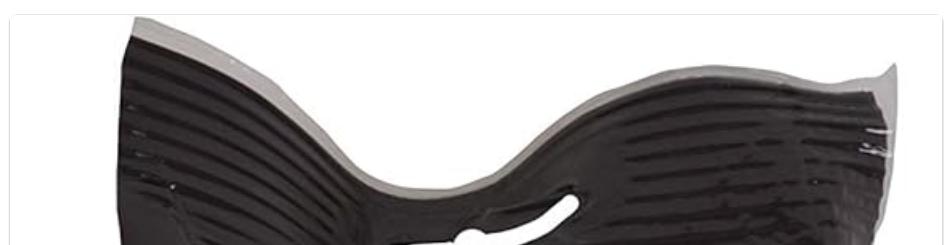

1. Remove the water tank from the back of the machine.
2. Fill the tank with fresh, cold tap water up to the MAX level indicator.
3. Replace the water tank securely.

Installing the Water Filter

The product includes a Krups Claris water filter cartridge (F08801) for improved water quality and machine longevity.

KRUPS
Original

KRUPS

Image: The Krups Claris Aqua Filter System F088 water filter, sealed in its plastic packaging.

1. Unpack the Claris water filter.
2. Immerse the filter in water for a few minutes to remove any air bubbles.
3. Insert the filter into its designated holder in the water tank.
4. Follow the on-screen prompts on the machine to activate the filter.

Bean Container Filling

1. Open the lid of the bean container located on top of the machine.
2. Fill with fresh coffee beans. Do not use ground coffee in the bean container.
3. Close the lid securely to maintain bean freshness.

First Use and Rinsing Cycle

1. Plug the appliance into a grounded power outlet.
2. Turn on the machine using the power button.
3. The machine will guide you through an initial rinsing cycle. Follow the instructions on the display.
4. Discard the water collected during the rinsing cycle.

OPERATING INSTRUCTIONS

Control Panel Overview

The Krups EA895N features an intuitive color display and touch controls for easy navigation and beverage selection.

Making Coffee Beverages

The machine offers 12 different beverage variations, including espresso, long coffee, cappuccino, latte macchiato, and more.

1. Place one or two cups under the coffee spouts.
2. Select your desired beverage from the display.
3. Adjust settings such as coffee strength, volume, and milk quantity (for milk-based drinks) if desired.
4. Press the start button to begin brewing.

One-Touch Cappuccino Function

The integrated milk system allows for easy preparation of milk-based drinks.

1. Connect the milk tube to the machine and insert the other end into a container with fresh milk.
2. Select a milk-based beverage (e.g., Cappuccino, Latte Macchiato).
3. The machine will automatically froth and dispense milk, then brew the coffee.

Double Cup Function

Prepare two cups of coffee simultaneously by selecting the double cup option on the display.

Hot Water Function

The machine provides three hot water temperature levels for tea preparation.

1. Select the hot water option.
2. Choose the desired temperature level.
3. Place a cup under the hot water spout and press start.

Favorites Menu

Save your personalized settings for any of the 12 beverages for quick access.

1. Prepare a beverage with your preferred settings.
2. Access the "Favorites" option on the display.
3. Follow the prompts to save your customized drink.

MAINTENANCE

Regular cleaning and maintenance are crucial for the longevity and optimal performance of your coffee machine.

Daily Cleaning

- **Drip Tray and Coffee Grounds Container:** Empty and rinse daily.
- **Milk System:** After each milk-based drink, perform the automatic milk system cleaning cycle. Regularly disassemble and clean the milk tube and nozzle with warm soapy water.
- **Water Tank:** Rinse daily and refill with fresh water.

Weekly Cleaning

- **Coffee Spouts:** Clean with a damp cloth.
- **Exterior:** Wipe the machine's exterior with a soft, damp cloth. Do not use abrasive cleaners.

Descaling

The machine will prompt you when descaling is necessary. Use only Krups descaling solution or a recommended alternative.

1. Follow the on-screen instructions for the descaling process.
2. The process typically involves adding descaling solution to the water tank and running a cycle.
3. Rinse the machine thoroughly after descaling.

Water Filter Replacement

Replace the Claris water filter cartridge approximately every 2-3 months, or as indicated by the machine.

1. Remove the old filter from the water tank.
2. Insert a new Claris filter as described in the "Setup" section.

3. Reset the filter indicator on the machine's display.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No coffee dispensed	Water tank empty; coffee beans empty; brewing unit clogged.	Refill water tank; refill bean container; perform a cleaning cycle.
Coffee is too weak/strong	Incorrect grind setting; insufficient coffee quantity.	Adjust grind setting (finer for stronger, coarser for weaker); increase coffee strength setting.
Milk not frothing properly	Milk system clogged; milk too warm/cold; wrong type of milk.	Clean the milk system thoroughly; use cold, fresh milk (preferably semi-skimmed); try different milk.
Machine displays "Descale" message	Limescale buildup.	Perform a descaling cycle as per maintenance instructions.
Machine leaks water	Water tank not properly seated; internal component issue.	Ensure water tank is correctly inserted; if problem persists, contact customer support.
