### RealTruck BAKFlip MX4 448324

# RealTruck BAK BAKFlip MX4 Hard Folding Truck Bed Tonneau Cover Instruction Manual

Model: BAKFlip MX4 (448324)

## PRODUCT OVERVIEW

---

The RealTruck BAK BAKFlip MX4 is a hard folding truck bed tonneau cover designed to provide secure cargo storage and full bed access. It features durable aluminum panels with a matte finish, offering protection against UV damage, fingerprints, and scratches. The cover is engineered with an integrated buckle system and automatic latching mechanism, allowing operation in partially or fully opened positions without obstructing the third brake light. For complete bed access, the cover can be folded up against the cab and secured with support rods. It includes dual drain tubes and full perimeter seals to minimize water intrusion, ensuring confident cargo storage in various weather conditions.

This tonneau cover is specifically designed to fit 2021-2025 Ford Maverick trucks with a 4' 6" bed (54.4").

## WHAT'S INCLUDED

---

The product package for your BAKFlip MX4 Tonneau Cover includes the following components:

- BAKFlip MX4 Tonneau Cover Assembly
- Side Rails (for mounting the cover to the truck bed)
- Installation Guide (detailed instructions for setup)

## SETUP AND INSTALLATION

---

Proper installation is crucial for the optimal performance and longevity of your BAKFlip MX4 Tonneau Cover. While a detailed installation guide is included with your product, here are general steps and important considerations:

1. **Preparation:** Ensure your truck bed is clean and free of debris. Verify all components listed in the "What's Included" section are present.
2. **Rail Installation:** Attach the side rails to the truck bed using the provided clamps. Ensure the rails are level and properly aligned to allow the cover panels to latch correctly. Some truck models may require minor adjustments or the removal of factory accessories for proper fitment.

3. **Cover Placement:** Carefully place the main cover assembly onto the installed rails.
4. **Drain Tube Connection:** Connect the dual drain tubes to the designated ports on the cover and route them through the truck bed's drain holes to divert water away.
5. **Final Adjustments:** Close the cover and check for proper alignment and latching. Make any necessary adjustments to the rails or cover position to ensure a secure and flush fit.

It is recommended to consult the specific installation video or guide provided by BAK Industries for your exact truck model to ensure a smooth and correct setup. Some users find watching a video helpful for visual reference.

## OPERATING INSTRUCTIONS

---

The BAKFlip MX4 Tonneau Cover is designed for ease of use, offering multiple configurations for accessing your truck bed.

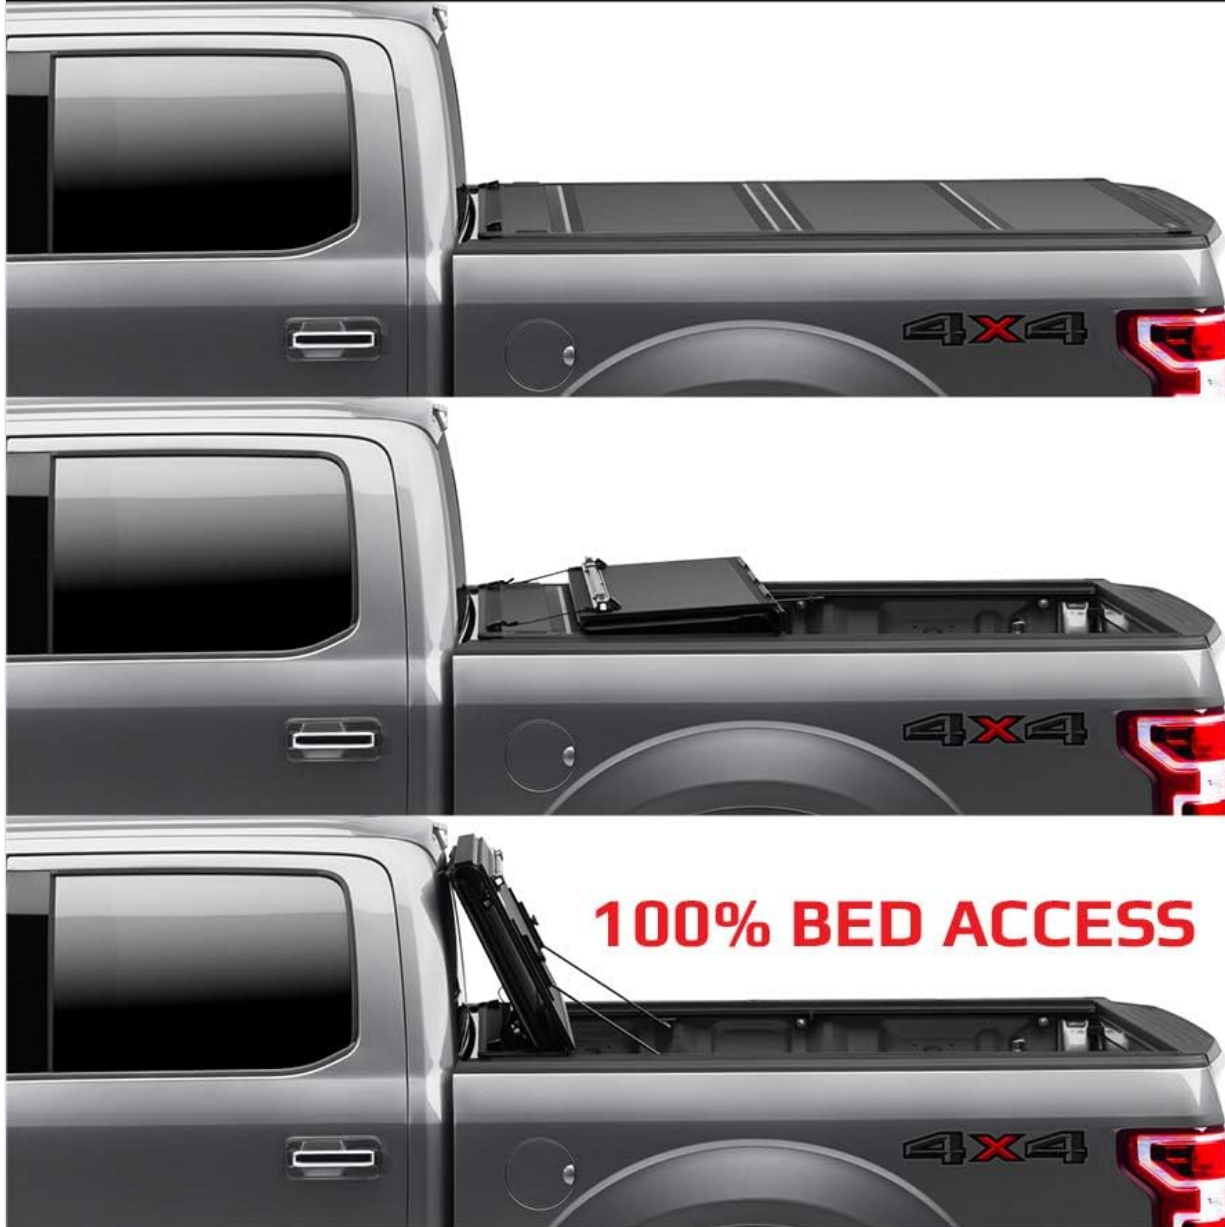

### Opening the Cover:

- **Partial Access:** To access a portion of your truck bed, simply pull the release latches located on either side of the cover near the tailgate. Fold the panel(s) forward towards the cab. The integrated buckle system allows you to drive with the cover partially open.
- **Full Bed Access (100%):** For complete access to your truck bed, unlock the cover from both sides using the pull latches. Continue folding the panels until the entire cover rests vertically against the truck's cab. Secure the folded cover in place by tightening the two support rods into the underside of the panel. This position ensures the third brake light remains unobstructed.

### Closing the Cover:

- To close the cover, release the support rods (if used for full access) and gently unfold the panels back towards the tailgate. The automatic latching mechanism will engage as each panel lays flat, securing the cover.
- For ultimate security, ensure your truck's tailgate is closed and locked, as the cover's security is enhanced by the tailgate's locked position.

## MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your BAKFlip MX4 Tonneau Cover.

- **Cleaning:** Clean the matte-finished aluminum panels with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the finish. Rinse thoroughly and dry with a soft cloth.
- **Seal Inspection:** Periodically inspect the full perimeter seals and dual drain tubes for any blockages or damage. Ensure they are clear to effectively divert water away from the truck bed.
- **Hardware Check:** Occasionally check all clamps, latches, and hinges to ensure they are secure and operating smoothly. Tighten any loose fasteners as needed.
- **UV Protection:** While the matte finish offers UV protection, applying a UV protectant designed for automotive plastics and vinyl can further extend the life and appearance of the seals and other non-metal components.

## TROUBLESHOOTING

---

If you encounter issues with your BAKFlip MX4 Tonneau Cover, consider the following common solutions:

- **Water Leakage:**

- Check that the perimeter seals are clean, intact, and properly seated along the truck bed rails.
- Ensure the dual drain tubes are clear of obstructions and correctly routed to allow water to exit the bed.
- Verify that the cover is fully closed and latched, and that your tailgate is securely closed.

- **Difficulty Latching/Unlatching:**

- Inspect the side rails for proper alignment. Misaligned rails can prevent the automatic latches from engaging or disengaging smoothly.
- Check the latch mechanisms for any debris or obstructions.

- Ensure the cover panels are not warped or damaged, which could affect proper closure.

- **Cover Not Lying Flat:**

- Re-check the installation of the side rails to ensure they are level and parallel.
- Verify that no items in the truck bed are obstructing the cover from fully closing.

For persistent issues not resolved by these steps, please contact the RealTruck support team for assistance.

## SPECIFICATIONS

<b>Brand</b>	RealTruck
<b>Model</b>	BAKFlip MX4 (448324)
<b>Material</b>	Aluminum
<b>Exterior Finish</b>	Painted (Matte)
<b>Lock Type</b>	Tailgate (integrates with truck's tailgate lock)
<b>Compatibility</b>	Fits 2021-2025 Ford Maverick 4' 6" Bed (54.4")
<b>Item Weight</b>	Approximately 48.9 pounds
<b>Product Dimensions</b>	Approximately 68 x 23 x 23 inches (packaged)
<b>Distributed Weight Capacity</b>	Up to 400 lbs (evenly distributed)
<b>Manufacturing Location</b>	Made in the USA with globally sourced materials
