4. Setup

4.1 Initial Charging

1. Before first use, fully charge the scrubber.
2. Connect the USB charging cable to the charging port on the scrubber unit.
3. Connect the other end of the USB cable to a standard USB power adapter (not included) with a voltage not exceeding 5V.
4. Allow 3-4 hours for a full charge. The indicator light will change to show charging status (refer to product specific indicator details if available, otherwise assume standard).

Important: Do not use adapters with a voltage exceeding 5V to charge the product.

4.2 Assembly of Handle and Brush Heads

1. **Attaching the Extension Handle:** If using the extension handle, align the main scrubber unit with the handle and

push them together until they click securely into place. The handle can be adjusted in length using the release buckle.

2. **Attaching Brush Heads:** Select the appropriate brush head for your cleaning task. Align the brush head with the rotating base of the scrubber unit and press firmly until it locks into place. Ensure it is securely attached before operation.
3. **Removing Brush Heads:** To remove a brush head, pull it firmly away from the rotating base.

5. Operating Instructions

5.1 General Operation

1. Ensure the scrubber is fully charged.
2. Select and attach the appropriate brush head for the surface you intend to clean.
3. Apply a suitable cleaning solution to the surface or directly to the brush head.
4. Press the power button to start the scrubber.
5. Gently guide the rotating brush over the surface, allowing the scrubber to do the work. Avoid applying excessive pressure, as this can reduce brush effectiveness and motor life.
6. After cleaning, press the power button again to turn off the device.

5.2 Brush Head Selection Guide

- **Flat Brush:** Ideal for large, flat surfaces such as hard floors, ceramic tiles, walls, and windows.
- **Curved Brush (Arc Brush):** Designed for irregular or concave surfaces like bathtubs, sinks, and toilets.
- **Pointed Brush (Corner Brush):** Excellent for cleaning grout lines, faucets, edges, and other narrow or hard-to-reach spaces.
- **Sponge Brush:** Best for delicate surfaces like glass, car interiors, showers, stove tops, and grills.
- **Scouring Pad/Wool Pad:** Use for polishing or more abrasive cleaning tasks as needed.

6. Maintenance and Care

6.1 Cleaning the Scrubber Unit

- After each use, remove the brush head.
- Wipe the main scrubber unit with a damp cloth. Do not submerge the main unit in water.
- When using the scrubber in wet conditions, ensure the rubber plug on the machine head is securely sealed to prevent water ingress and ensure a long lifespan.

6.2 Cleaning Brush Heads

- Rinse brush heads under running water to remove dirt and cleaning solution residue.
- Allow brush heads to air dry completely before storing.
- Replace brush heads when bristles become worn or damaged to maintain optimal cleaning performance.

6.3 Storage

- Store the scrubber and its accessories in a clean, dry place, away from direct sunlight and extreme temperatures.
- Ensure the device is fully charged before long-term storage to preserve battery health.

7. Troubleshooting

If you encounter issues with your vrillo Electric Spin Scrubber, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Scrubber does not turn on.	Battery is depleted.	Charge the scrubber for 3-4 hours using a 5V adapter.
Reduced scrubbing power.	Low battery or worn brush head.	Recharge the battery. Replace the brush head if bristles are worn. Avoid applying excessive pressure.
Brush head detaches during use.	Brush head not securely attached.	Ensure the brush head is firmly pressed onto the rotating base until it clicks into place.
Water ingress into the unit.	Rubber plug not sealed during wet use.	Always ensure the rubber plug on the machine head is securely sealed when operating in wet conditions. Do not submerge the main unit.

If the problem persists after attempting these solutions, please contact customer support.
