Operating Instructions

General Use:

1. Ensure the frother has fresh batteries installed.

5. Move the frother up and down gently to create foam or mix ingredients thoroughly.
6. Release the power button to turn off the frother.

Tips for Optimal Frothing:

- For best milk froth, use cold milk.
- Froth milk in a tall, narrow container to prevent spills.
- Angle the frother slightly (around 45 degrees) for better aeration.
- Froth for approximately 10-15 seconds for a decent amount of foam.
