Zinus ZU-FBOBH1-12Q

ZINUS Mory Metal Platform Bed Frame with Split Headboard - Queen User Manual

Model: ZU-FBOBH1-12Q

1. Introduction

This manual provides detailed instructions for the assembly, usage, and maintenance of your ZINUS Mory Metal Platform Bed Frame with Split Headboard. Please read all instructions carefully before assembly and retain this manual for future reference.

2. Safety Information

WARNING: Failure to follow these safety guidelines may result in injury or damage to the product.

- Do not exceed the maximum weight recommendation of 700 pounds for Queen size.
- Always follow the assembly instructions carefully to ensure stability and prevent collapse.
- Ensure all bolts and screws are securely tightened before use. Periodically check and re-tighten as necessary.
- Keep small parts and packaging materials away from children to prevent choking hazards.
- Assemble the bed frame on a soft, clean surface to prevent scratching.

3. Package Contents

Before beginning assembly, verify that all components and hardware are present. Refer to the parts list provided in your package. The bed frame is efficiently packed into one box for delivery.

Image 3.1: All components of the ZINUS Mory bed frame laid out for assembly.

Expected contents typically include:

- Headboard sections (2)
- Side rails (2)
- Center support beam(s)
- Support legs
- Wood slats
- Hardware kit (bolts, washers, nuts, Allen wrench, ratchet tool)
- Instruction manual

4. Assembly Instructions

Assembly of the ZINUS Mory Platform Bed Frame is designed to be straightforward and typically requires two people. All necessary tools are included in the hardware kit.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out and compare them against the parts list in your manual to ensure nothing is missing.

2. **Assemble the Headboard:** Attach the headboard sections to the headboard frame using the provided bolts and Allen wrench.
3. **Connect Side Rails:** Attach the side rails to the headboard and footboard sections. Ensure the connections are secure.
4. **Install Center Support:** Place and secure the center support beam(s) and associated legs. These are crucial for mattress stability and weight distribution.
5. **Place Wood Slats:** Lay the wood slats across the frame. Many Zinus frames include anti-slip tape on the slats to prevent mattress movement. Ensure slats are evenly spaced and secured if applicable.
6. **Final Tightening:** Once all parts are in place, go back and ensure all bolts and screws are fully tightened using the provided ratchet tool. Do not overtighten.

5. Usage and Operation

The ZINUS Mory Platform Bed Frame is designed to provide robust support for your mattress without the need for a box spring. Its sturdy wood slats are engineered to extend the life of foam, latex, or spring mattresses.

- **Mattress Compatibility:** This frame is compatible with various mattress types including foam, latex, and spring mattresses.

- **Under-Bed Clearance:** The frame offers approximately 10 inches of clearance space beneath the bed, providing ample room for storage.

Image 5.1: Illustration of the 10-inch under-bed clearance for storage.

6. Maintenance

Regular maintenance will help prolong the life and ensure the stability of your bed frame.

- **Cleaning:** Wipe down the metal and wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Tightness Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they remain tight. Re-tighten as needed to prevent wobbling or squeaking.
- **Slat Inspection:** Inspect the wood slats for any signs of damage or wear. Replace any broken slats immediately to maintain proper mattress support.

7. Troubleshooting

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all bolts and screws. Ensure the slats are properly seated and not rubbing against the frame.
- **Wobbling Frame:** A wobbling frame is typically due to loose hardware. Systematically check and tighten all connections, especially those at the corners and along the center support.
- **Mattress Shifting:** If your mattress shifts, ensure the anti-slip tape on the slats (if present) is clean and intact. You may also consider using a non-slip mattress pad.
- **Missing Parts:** If you find any parts missing upon unboxing, contact Zinus customer support immediately for assistance.

8. Specifications

Feature	Detail
Brand	Zinus
Model Number	ZU-FBOBH1-12Q
Size	Queen
Product Dimensions (L x W x H)	83"L x 59.5"W x 37"H
Weight Capacity	700 lbs
Material	Alloy Steel, Wood
Color	Brown (wood finish), Black (metal frame)
Assembly Required	Yes
Special Feature	Sturdy, Wood Slat Support, No Box Spring Needed

Dimension & Capacity
