## PACKAGE CONTENTS

---

- Ltvystore 104-Key Typewriter Style Mechanical Gaming Keyboard
- USB Cable

## SETUP

---

1. **Connect the Keyboard:** Locate the USB cable provided with your keyboard.
2. **Plug into Computer:** Insert the USB connector into an available USB 2.0 port on your computer (Windows, Mac, or Linux).
3. **Automatic Installation:** The keyboard is plug-and-play. Your operating system should automatically detect and install the necessary drivers. No additional software is required.
4. **Adjust Feet:** For optimal typing comfort, adjust the rear feet of the keyboard to your preferred angle.

## OPERATING INSTRUCTIONS

---

### Key Features:

- **104-Key Layout:** Full-size keyboard with a numeric keypad.
- **Anti-Ghosting:** Supports full keys without conflict, ensuring all keystrokes are registered during intense gaming or fast typing.
- **Mechanical Blue Switches:** Provides a tactile and audible "clicky" feedback, ideal for typing and gaming.
- **Ergonomic Design:** Stepped keycaps and an arc/slope design reduce hand fatigue during prolonged use.

### Backlight Control:

The keyboard features 9 true RGB backlight modes. Use the following key combinations to control the backlighting:

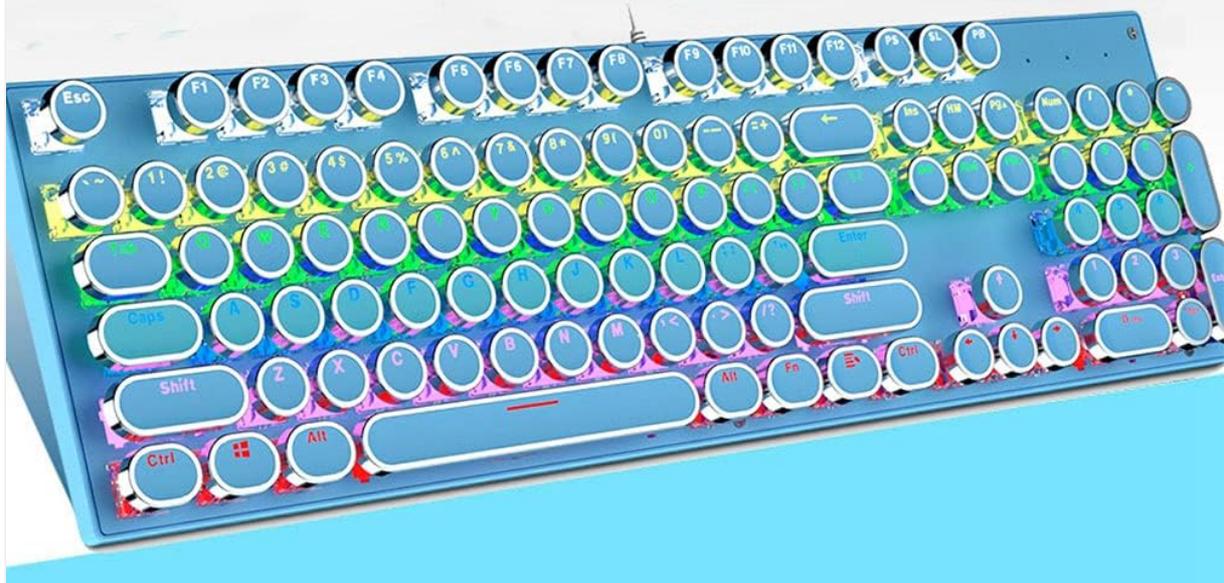

- **Switch Lighting Modes:** Press **FN + INS** to cycle through 9 different lighting effects and modes.
- **Adjust Brightness:** Press **FN + ↑** (Up Arrow) or **FN + ↓** (Down Arrow) to adjust the backlight brightness (3 levels).
- **Adjust Breathing Speed:** Press **FN + ←** (Left Arrow) or **FN + →** (Right Arrow) to adjust the backlight breathing speed.
- **Disable WIN Key:** For gaming, the WIN key can be disabled to prevent accidental presses. Refer to specific key combinations if available on your model (often FN + WIN key).

## RGB Mechanical Punk Keyboard

Press FN+INS to switch 9 special effect mode

FN+↑/↓=Adjust brightness level bright(strength/weak)

FN+←-/→= Adjust backlit breathing rate(Fast/slow)

## Multimedia Keys:

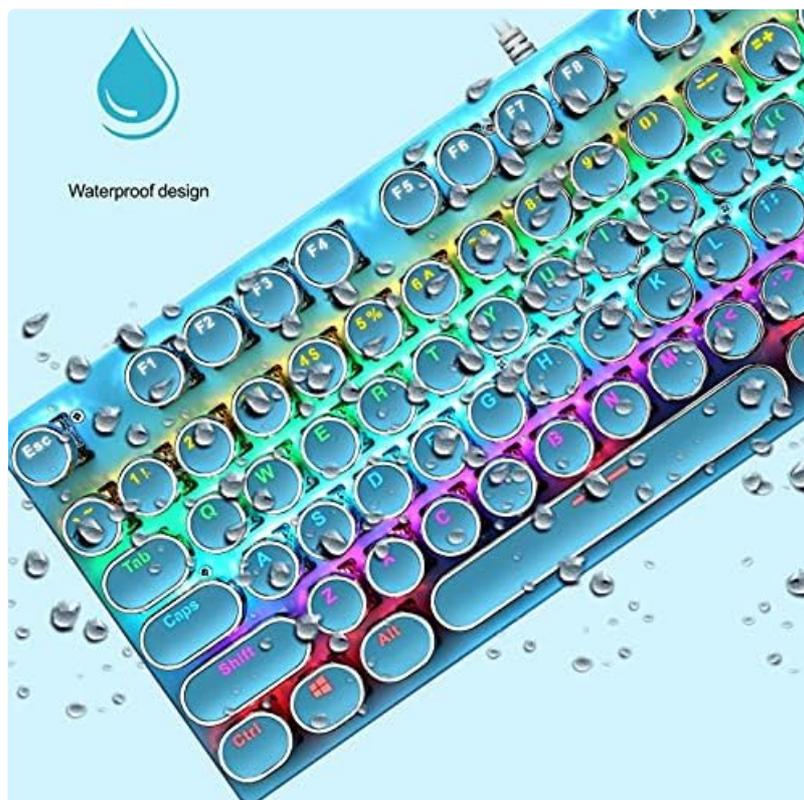

The keyboard includes 12 multimedia keys for quick access to various functions. These are typically accessed by holding the **FN** key and pressing the corresponding F-key (F1-F12).

- **FN + F1:** Media Player
- **FN + F2:** Volume Down
- **FN + F3:** Volume Up
- **FN + F4:** Mute
- **FN + F5:** Stop
- **FN + F6:** Previous Track
- **FN + F7:** Play/Pause
- **FN + F8:** Next Track
- **FN + F9:** Email
- **FN + F10:** Web Browser
- **FN + F11:** My Computer
- **FN + F12:** Calculator

## MAINTENANCE

---

- **Cleaning:** Use a soft, dry cloth to wipe down the keyboard surface. For dust and debris between keycaps, use compressed air.
- **Spill Resistance:** The keyboard features a splash-proof design. In case of minor spills, quickly disconnect the keyboard, wipe off the liquid, and allow it to dry completely before reconnecting. Avoid submerging the keyboard in liquid.
- **Keycap Removal:** Keycaps can be carefully removed for deeper cleaning or switch replacement. Use a keycap puller if available, or gently pry them off from the edges.

## TROUBLESHOOTING

---

### Keyboard is not responding:

- Ensure the USB cable is securely connected to both the keyboard and the computer's USB port.
- Try connecting the keyboard to a different USB port on your computer.
- Test the keyboard on another computer to determine if the issue is with the keyboard or the computer.
- Restart your computer.

### Backlighting is not working or is dim:

- Press **FN + INS** to cycle through different backlight modes.
- Press **FN + ↑** (Up Arrow) to increase brightness.
- Ensure the keyboard is receiving sufficient power from the USB port.

### Keys are not registering or are lagging:

- Clean around and under the affected keycaps to remove any debris that might be obstructing the switch.
- Ensure the keycaps are properly seated on the switches.
- If a specific key is consistently failing, it might indicate a faulty switch.

### Keyboard is typing incorrect characters:

- Check your computer's language and keyboard layout settings.
- Ensure no other software is interfering with keyboard input.
