## Juskys 21161

# Juskys Basic Heavy Duty Shelving Unit

MODEL: 21161

## Introduction

This instruction manual provides comprehensive guidance for the assembly, operation, and maintenance of your Juskys Basic Heavy Duty Shelving Unit, model 21161. Designed for optimal organization, this galvanized metal shelving unit measures 200 cm high, 100 cm wide, and 60 cm deep, making it suitable for various environments such as cellars, storage rooms, pantries, garages, or workshops. It features 5 sturdy MDF wood shelves, each capable of holding up to 175 kg, for a total load capacity of 875 kg.

## Safety Information

Please read all safety instructions carefully before assembly and use to prevent injury or damage to the product.

- **Weight Limit:** Do not exceed the maximum weight limit of 175 kg (385 lbs) per shelf or 875 kg (1929 lbs) total for the entire unit. Ensure even load distribution on each shelf.
- **Assembly:** Always assemble and install the shelf strictly according to the provided instructions. Improper assembly can lead to instability and collapse.
- **Stability:** Ensure the shelving unit is placed on a flat, stable surface. For added safety, consider anchoring the unit to a wall, especially in areas prone to earthquakes or if heavy items are stored on upper shelves.
- **Environment:** Keep the shelf dry and avoid exposure to extreme temperatures or corrosive chemicals. This is particularly important if the unit is used in a garage or workshop where spills may occur.
- **Children:** Keep children away from the shelving unit during assembly. Do not allow children to climb on the shelves, as this can cause the unit to tip over.

## Package Contents

Before beginning assembly, verify that all components are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Galvanized Metal Uprights (vertical supports)
- Galvanized Metal Cross Braces (horizontal supports for shelves)
- MDF Wood Shelves (5 pieces)

- Plastic Feet (for floor protection)
- Assembly Hardware (connectors for uprights)

## Specifications

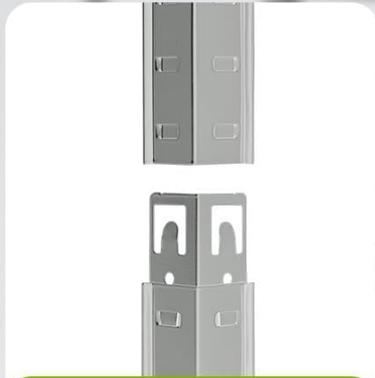

---

Feature	Detail
Model Number	21161
Dimensions (H x W x D)	200 cm x 100 cm x 60 cm (78.74" x 39.37" x 23.62")
Number of Shelves	5
Material (Frame)	Galvanized Metal
Material (Shelves)	MDF Wood (Engineered Wood)
Max. Load Capacity per Shelf	175 kg (385 lbs) with even load distribution
Max. Total Load Capacity	875 kg (1929 lbs)
Assembly Required	Yes
Installation Type	Freestanding
Special Features	Flexible configuration, Sturdy construction, Plug-in system

## Setup / Assembly Instructions

---

The Juskys Basic Heavy Duty Shelving Unit features a simple plug-in system for quick and easy assembly without the need for screws or drilling. It can typically be assembled by one person.

### Assembly Steps:

1. **Connect the Uprights:** Begin by connecting the lateral uprights (vertical metal supports) together using the provided hardware. Ensure they are securely interlocked.
2. **Insert Shelf Supports:** Insert the metal cross braces (shelf supports) into the appropriate tabs on the uprights. These tabs allow you to customize the height of each shelf. Make sure all tabs are fully engaged for stability.
3. **Place MDF Panels:** Once the metal frame is assembled and the cross braces are in place, position the MDF wood panels onto the shelf supports.

The shelving unit is designed for flexible construction. You can choose the height between individual shelves to accommodate items of various sizes. Additionally, the unit can be assembled as one tall shelf or as two half-height storage shelves placed side-by-side, which can also serve as a workbench.

Attach the plastic feet to the bottom of the uprights to protect your floor from scratches.

### Operating Instructions / Usage

Your Juskys Basic Heavy Duty Shelving Unit is designed to provide robust storage for a variety of items in different environments.

- **Loading:** Place items on the shelves, ensuring that the weight is distributed evenly. Do not concentrate heavy loads in one small area of a shelf.
- **Capacity:** Adhere strictly to the maximum load capacity of 175 kg per shelf and 875 kg total. Overloading can compromise the structural integrity of the unit.
- **Versatility:** Use the shelving unit to store tools, garden accessories, supplies, file folders, or other heavy items. Its robust construction makes it suitable for both private and commercial use.

## Maintenance

Proper maintenance will ensure the longevity and continued performance of your shelving unit.

- **Cleaning:** Wipe the metal frame and MDF shelves with a dry cloth to remove dust and debris. Avoid using abrasive cleaners or harsh chemicals that could damage the galvanized finish or the wood panels.
- **Inspection:** Periodically check all connections and components to ensure they remain secure. Tighten any loose parts if necessary.
- **Environment:** Store the unit in a dry environment to prevent rust on the metal components and warping of the MDF shelves.

## Troubleshooting

If you encounter any issues with your shelving unit, consider the following common troubleshooting steps:

- **Instability:** If the unit feels wobbly, ensure it is placed on a level surface. Recheck all plug-in connections to confirm they are fully engaged. Verify that the plastic feet are properly installed.
- **Shelf Sagging:** If a shelf appears to be sagging, check if the load exceeds the 175 kg limit or if the weight is unevenly distributed. Redistribute items or remove excess weight.
- **Difficulty Assembling:** Ensure you are following the steps in the correct order. Sometimes, applying gentle pressure or using a rubber mallet (with caution) can help secure tight connections.

## Warranty and Support

---

For information regarding warranty coverage, product support, or to order replacement parts, please refer to the contact information provided at the point of purchase or visit the official Juskys website. Keep your purchase receipt as proof of purchase.
