1. PRODUCT OVERVIEW

The Rich Oxy 6% LQ is a professional-grade liquid hair color developer, supplied in a 2000ml pouch. It is designed for use in beauty and barber salons as a second agent for hair coloring and bleaching processes. This product is part of a versatile range of developers offered by GR, including various concentrations to suit different hair treatment needs.

Image 1: A white pouch containing Rich Oxy 6% LQ hair color developer, designed for professional use. The label indicates 'RICH OX 6 LQ' and 'Hair Dye/Bleach Oxidant'. Product Code: 4573375500223.

Image 2: A view inside a cardboard box showing several individual Rich Oxy liquid pouches, indicating bulk packaging for professional use.

2. KEY FEATURES

- **Liquid Type Formula:** This product is a liquid type, similar in consistency to a perm solution. Cream type developers are also available from GR .
- **Enriched with Treatment Ingredients:** Formulated with high-quality ingredients such as Hydrolyzed Silk, Hydrolyzed Keratin, and Royal Jelly Protein Liquid to provide superior strengthening, repairing, and conditioning effects during the coloring process.
- **Cost-Effective & High Quality:** Offered in a large 2L volume, providing a high-quality solution that helps reduce costs for professional salons.
- **Enhanced Hair Quality:** Designed to improve the hair's texture, feel, and overall appearance after coloring, contributing to higher customer satisfaction.
- **High Conditioning Power:** Contains a cationic polymer with very high conditioning capabilities, aiding in hair manageability.
- **Easy Waste Disposal:** Packaged in a pouch container for convenient and simple waste management.

3. USAGE GUIDELINES (OPERATING)

3.1 Distinguishing Usage Points for OX3 and OX6

To minimize hair damage, it is crucial to select the appropriate hydrogen peroxide concentration based on the hair's condition and desired outcome.

- **For Damaged Hair or Post-Bleach Coloring (OX3 Recommended):**For damaged areas such as hair ends, or for applying color after bleaching, a lower concentration developer like OX3 is recommended. This helps reduce further stress on compromised hair.
- **For Bright Colors or Bleaching (OX6 Recommended, with considerations):**For achieving bright hair colors or performing bleaching, OX6 is generally recommended due to its quicker color development. However, if the client has a sensitive or weakened scalp, fine hair, or if there are concerns about excessive hair damage, OX3 is the preferred choice.

- **Extended Processing Time (OX3 Consideration):** While individual results may vary, if the product is left on for 20 minutes or more, OX3 may sometimes yield better color development.

3.2 General Application

1. Mix the Rich Oxy 6% LQ developer with your chosen hair colorant or bleach powder according to the manufacturer's instructions for the specific color or bleach product.
2. Ensure thorough mixing to achieve a consistent, smooth mixture.
3. Apply the mixture evenly to the hair, following standard professional hair coloring techniques.
4. Observe the processing time as recommended by the hair colorant/bleach product, taking into account hair condition and desired results.
5. Rinse hair thoroughly with lukewarm water until the water runs clear.
6. Shampoo and condition the hair as usual.

Image 4: An informational image with a warning sign, stating that this product is a liquid type (Rich Oxy 6% LQ) similar to perm solution 2. It advises customers seeking a cream type to purchase from the Rich Oxy 6% cream page. It also notes that returns/exchanges due to customer ordering errors will incur fees.

4. KEY INGREDIENTS

The Global Rich Oxy developer contains beneficial ingredients designed to protect and nourish the hair during chemical treatments:

- **Hydrolyzed Silk Liquid:**

This ingredient has an amino acid composition remarkably similar to human natural moisturizing factors, making it an excellent natural moisturizing agent. It is expected to form a protective film, protect hair, provide moisture, impart luster, and offer antioxidant effects. It helps repair hair damaged by UV rays and hair dye, giving hair firmness and body with a smooth film.

- **Hydrolyzed Keratin Liquid:**

A protein found in hair, skin, and nails, this is an aqueous solution of polypeptide obtained by hydrolyzing keratin protein (Keratin PPT). It effectively strengthens the fibrous material inside the hair, providing firmness and body. It is also included for its conditioning properties and to help prevent skin roughness. Rich in cysteine and being the same protein as hair, it is highly compatible and particularly effective for weakened hair or hair lacking elasticity.

5. PRODUCT SPECIFICATIONS

Attribute	Detail
Product Name	Rich Oxy 6% LQ Hair Color Developer
Model Number	0193
Brand	GR (Global Rich Co., Ltd.)
Volume	2000ml (1 bag)
Type	Liquid Hair Color Developer (Oxidant)
Concentration	6% Hydrogen Peroxide
ASIN	B09DKCXCL7
First Available Date	February 17, 2020

6. SAFETY INFORMATION & STORAGE (MAINTENANCE)

6.1 Safety Precautions

- For professional use only.
- Always perform a patch test 48 hours before full application to check for allergic reactions.
- Wear appropriate gloves during mixing and application.
- Avoid contact with eyes. In case of contact, rinse immediately with plenty of water and seek medical advice.
- Do not use on irritated or damaged scalp.
- Keep out of reach of children.
- Do not ingest. If swallowed, seek medical attention immediately.

6.2 Storage and Handling

- Store in a cool, dry place, away from direct sunlight and heat.
- Keep the container tightly sealed when not in use.

- Do not store near flammable materials.
- Dispose of empty containers according to local regulations. The pouch design facilitates easy waste disposal.

6.3 Troubleshooting (General Advice)

- **Color Not Developing as Expected:** Ensure correct mixing ratios with the colorant. Check the hair's porosity and previous treatments. Consider using OX3 for longer processing times if needed.
- **Scalp Irritation:** Discontinue use immediately. Rinse thoroughly. Advise clients with sensitive scalps to use OX3 or consult a dermatologist.
- **Hair Damage:** Ensure proper application and processing times. The product contains conditioning agents, but excessive use or improper technique can still lead to damage. Consider pre-treatment or post-treatment hair care.

7. MANUFACTURER & SUPPORT INFORMATION

This product is manufactured by Global Rich Co., Ltd. For inquiries regarding OEM manufacturing, wholesale, bulk purchases, or continuous supply, please contact us directly via email for potential discounts.

Manufacturer: Global Rich Co., Ltd.
