Power Allocation

The charger intelligently allocates power based on the connected devices and occupied ports:

- **USB-C Port:** Delivers up to 20W for fast charging compatible devices (e.g., iPhone 16, Google Pixel).
- **Dual USB-A Ports:** Share a total of 12W output. When both USB-A ports are in use, the 12W is distributed between them.
- The 20W USB-C output remains constant regardless of how many other ports are in use.

7. MAINTENANCE

- **Cleaning:** Disconnect the charger from the power outlet before cleaning. Use a soft, dry cloth to wipe the surface. Do not use liquid cleaners or aerosols.

- **Storage:** Store the charger in a cool, dry place away from direct sunlight and moisture when not in use.

8. TROUBLESHOOTING

- **Device not charging:**
 - Ensure the charger is securely plugged into a live wall outlet.
 - Verify that the charging cable is properly connected to both the charger and your device.
 - Try a different charging cable to rule out cable malfunction.
 - Test the charger with a different device to confirm charger functionality.
- **Slow charging:**
 - Confirm your device supports fast charging for the USB-C port.
 - Ensure you are using a high-quality cable that supports fast charging.
 - Note that the two USB-A ports share 12W; charging two devices simultaneously via USB-A will result in slower charging for each.
- **Overheating:**

The charger is equipped with an intelligent chip and IOA 2.0 system for protection against over-current, over-voltage, overheating, and short-circuits. If the charger feels excessively hot, disconnect it immediately and contact support.
