SETUP GUIDE

Step 1: Download the CloudEdge App

Search for and download the 'CloudEdge' app from your mobile device's app store (App Store for iOS or Google Play Store for Android). Ensure you download the correct application.

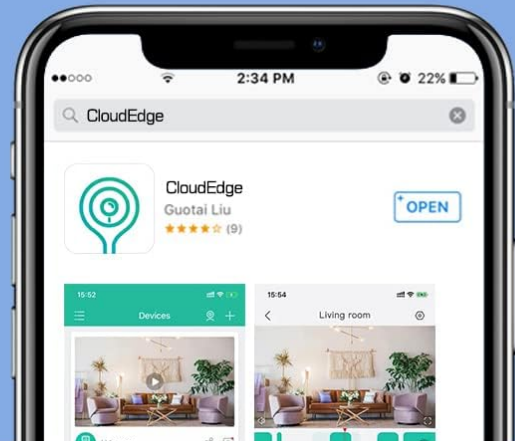

Easy Setup Guide

1

Download the CloudEdge APP

From "App Store" or "Google play"

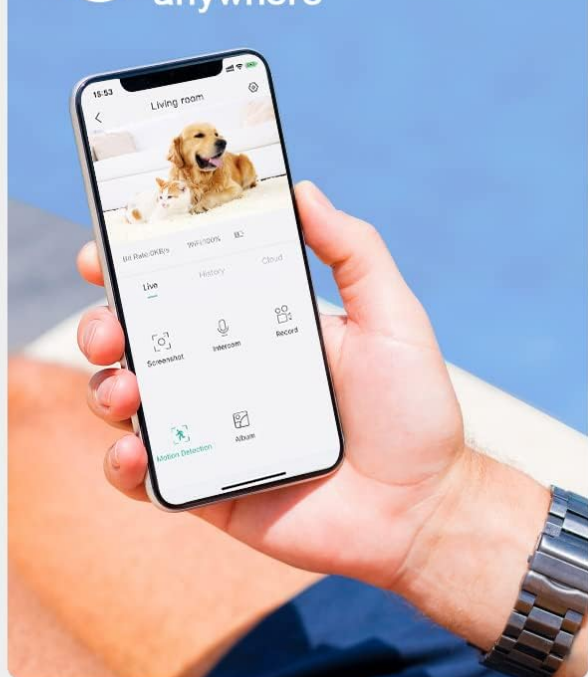

2

Connect to 2.4GHz WIFI and install

3

View at any time and anywhere

Visual guide for downloading the CloudEdge app from either the Apple App Store or Google Play Store.

Step 2: Power On and Connect to Wi-Fi

Plug in the camera using the provided power adapter. The camera supports 2.4G WiFi networks only. Place the camera and your phone close to your Wi-Fi router for the best signal during the initial setup process. Follow the in-app instructions to connect the camera to your Wi-Fi network. This typically involves scanning a QR code displayed on your phone screen with the camera lens.

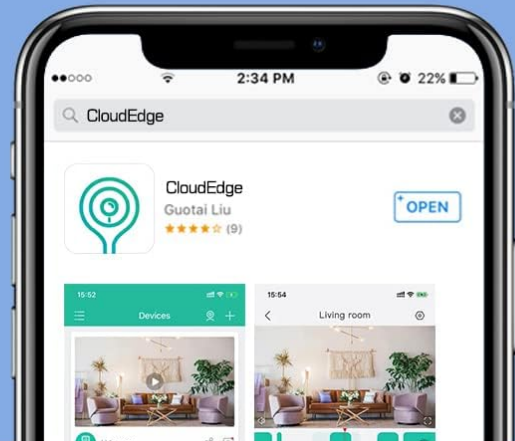

Easy Setup Guide

1

Download the CloudEdge APP

From "App Store" or "Google play"

2

Connect to 2.4GHz WIFI and install

3

View at any time and anywhere

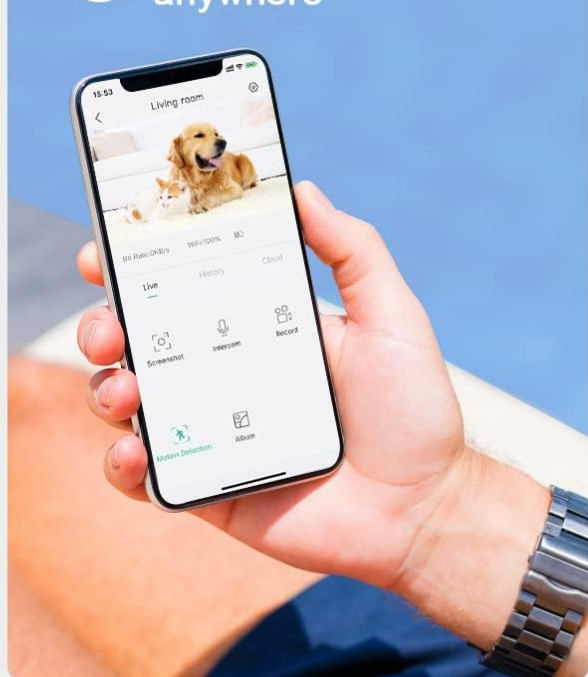

Illustration of connecting the camera to power and establishing a 2.4GHz Wi-Fi connection.

Step 3: Complete Setup and View

Once connected, the app will guide you through naming your camera and completing the setup. You can then view the live feed and access various features from anywhere using the CloudEdge app.

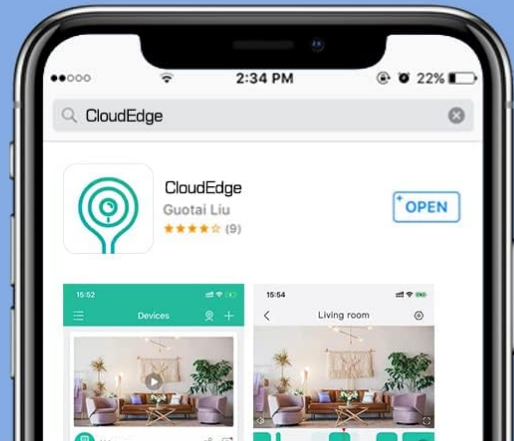

Easy Setup Guide

1

Download the CloudEdge APP

From "App Store" or "Google play"

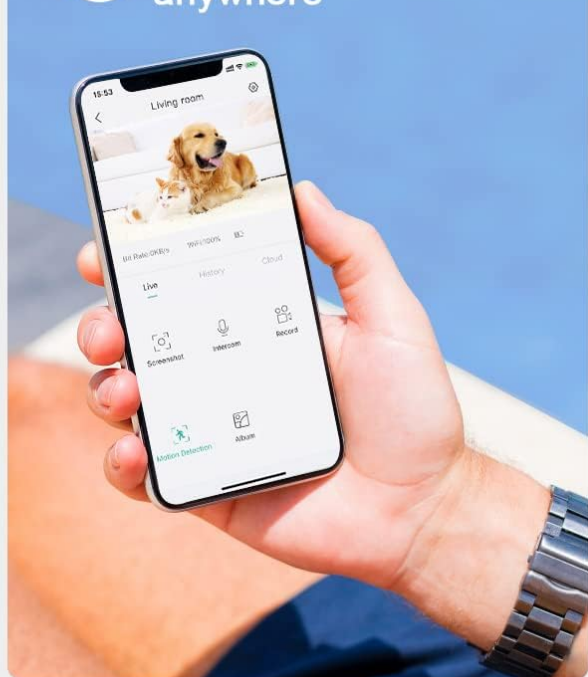

2

Connect to 2.4GHz WIFI and install

3

View at any time and anywhere

A smartphone screen displaying the live view from the ANRAN security camera within the CloudEdge app.

This video demonstrates the step-by-step process of setting up the ANRAN B01 camera using the CloudEdge application, including app download, power connection, and Wi-Fi pairing via QR code scan.

OPERATING INSTRUCTIONS

Two-Way Audio

The camera features a built-in microphone and speaker, enabling two-way communication. You can speak to visitors or deter intruders directly through the CloudEdge app from your smartphone.

2-Way Audio and Live Streams

Images illustrating the two-way audio functionality, showing a user communicating with someone near the camera via the app.

Night Vision

Equipped with powerful infrared LEDs, the camera provides clear night vision up to 80 feet, ensuring continuous monitoring even in complete darkness. The camera automatically switches between day and night modes.

This video highlights the main features of the ANRAN B01 WiFi Home Security Camera, including two-way audio, night vision, and motion detection capabilities.

MAINTENANCE

Weather Resistance

The ANRAN B1 White camera is rated IP66 waterproof, designed to withstand various outdoor weather conditions, including rain and snow. This ensures reliable operation year-round.

IP65 Waterproof

-25°C/-13°F

60°C/140°F

The camera is shown being exposed to water, demonstrating its IP66 waterproof rating and ability to operate in temperatures ranging from -25°C to 60°C.

Cleaning and Care

To maintain optimal performance, periodically clean the camera lens and housing with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials that could damage the camera's surface or lens. Ensure the power is disconnected before cleaning.

TROUBLESHOOTING

Problem	Possible Solution
---------	-------------------

Problem	Possible Solution
Camera not connecting to Wi-Fi	Ensure your Wi-Fi is 2.4GHz. Check Wi-Fi password. Move camera closer to router. Reset camera and try again.
No live view or video playback	Check internet connection. Ensure camera is powered on. Verify SD card is inserted correctly (if applicable). Check cloud storage subscription status.
Motion alerts not received	Check app notification settings on your phone. Ensure motion detection is enabled in the app. Adjust motion sensitivity and detection zones.
Two-way audio not working	Ensure microphone and speaker permissions are granted to the app. Check volume settings on your phone and in the app.
Poor image quality	Clean the camera lens. Ensure sufficient lighting. Check Wi-Fi signal strength for stable streaming.
