Yaheetech HWOA-100/2FR(0.2A)

Yaheetech 9ft Pre-lit Snow Flocked Artificial Christmas Tree Instruction Manual

Model: HWOA-100/2FR(0.2A)

1. INTRODUCTION

Thank you for choosing the Yaheetech 9ft Pre-lit Snow Flocked Artificial Christmas Tree. This tree is designed to bring a festive and cozy atmosphere to your home with its lush, snow-flocked branches and warm white incandescent lights. This manual provides essential information for safe assembly, operation, maintenance, and troubleshooting to ensure you enjoy your Christmas tree for many seasons.

2. SAFETY INFORMATION

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. (California Proposition 65)

- Always unplug the tree from the electrical outlet when not in use or before performing any maintenance.
- Do not overload electrical outlets. Ensure the power source matches the tree's requirements.
- Keep children and pets away from the tree during assembly and disassembly.
- Do not place the tree near heat sources or open flames.
- Inspect the electrical cord and lights for any damage before each use. Do not use if damaged.
- The snow flocking may shed slightly during initial setup and handling. This is normal.

3. PACKAGE CONTENTS

Your Yaheetech 9ft Pre-lit Snow Flocked Artificial Christmas Tree package includes the following components:

- Tree sections (typically 3-4 sections for a 9ft tree)
- Foldable Metal Stand
- Pre-installed Incandescent Warm White Lights
- Protective foot caps for the stand

Simple Set-Up

String Lights

Foldable Metal Stand

4. SETUP INSTRUCTIONS

Follow these steps to assemble your Christmas tree:

1. **Locate the Base Stand:** Unfold the metal stand and ensure it is stable. Insert the protective foot caps onto the ends of the stand legs to prevent floor scratches.

2. **Assemble the Trunk:** Insert the bottom tree section into the stand and tighten the screws securely.
3. **Add Middle Sections:** Insert the middle tree sections one by one, aligning them properly. The tree features a hinged system where branches automatically fall into place.
4. **Place the Top Section:** Carefully place the top section of the tree onto the last middle section.
5. **Fluff the Branches:** Starting from the bottom, gently separate and spread out each branch and individual tip to create a full and natural appearance. This process may take 2-2.5 hours for a 9ft tree.
6. **Connect Lights:** Ensure all pre-installed light connections between sections are securely plugged in.

Image: A step-by-step visual guide illustrating the installation process of the Christmas tree, including stand setup, trunk assembly, and branch fluffing.

HINGED SYSTEM

Branches are attached to the trunk using a hinged system, each branch automatically slide into the designated place and fan out to form a spruce shape.

PROTECTIVE FEET

Plastic foot caps protect your floor from scratches and scuffs.

Fluffing for Fullness

Properly fluffing the branches is crucial for achieving the tree's full and lush appearance. Refer to the illustration below for guidance.

INSTALLATION

1
Locate the base stand and put the protective covers in.

2
Remove the protective cover, insert the bottom branch and then tighten the screws.

3
Insert the middle trunks.

4
Insert the top trunk.

5
Separate the branches and tips to 45-60 degree and fluff the tree.

6
Decorating this plump and natural Christmas tree with your family.

Image: A comparison showing the tree before and after fluffing, highlighting how spreading the branches creates a fuller appearance.

5. OPERATING INSTRUCTIONS

Your Yaheetech Christmas tree comes pre-lit with 900 incandescent warm white lights. Once assembled and fluffed, simply plug the main power cord into a standard electrical outlet. The lights will illuminate, creating a cozy and festive ambiance.

Video: Demonstrates the ease of assembling the Christmas tree, highlighting its user-friendly design. Provided by Karin.

Video: Illustrates the tree's fullness and the integrated lights, showing its overall aesthetic appeal. Provided by Carolina Castaño.

6. MAINTENANCE

- **Cleaning:** The manufacturer specifies "Hand Wash Only" for care instructions. For general cleaning, gently dust

the branches with a soft cloth or duster. Avoid harsh chemicals or excessive water, especially on the flocked areas.

- **Storage:** After the festive season, detach the tree sections and fold the metal base. Store all components in their original packaging or a suitable storage bag in a cool, dry place to protect the flocking and lights. The collapsible design allows for compact storage.
- **Flocking:** Some shedding of the snow flocking is natural, particularly during handling. This does not affect the tree's overall appearance or quality.

7. TROUBLESHOOTING

Lights Not Working

- Ensure all sections of the tree are properly connected and the main plug is securely inserted into a working electrical outlet.
- Check for any loose or broken bulbs. Replace any faulty bulbs with spares if provided, or compatible replacements.
- If a section of lights is out, check the fuse in the plug. Replace if necessary.

Tree Appears Sparse

- The tree requires thorough fluffing after assembly. Spend adequate time (2-2.5 hours for a 9ft tree) separating and shaping each branch and tip to achieve maximum fullness.
- Ensure all hinged branches have fallen into their designated positions.

8. SPECIFICATIONS

Feature	Detail
Brand	Yaheetech
Model Number	HWOA-100/2FR(0.2A)
Product Dimensions	68"D x 68"W x 110"H
