## WORKPRO 48x24x72

# WORKPRO 5-Tier Heavy Duty Metal Shelving Unit

Model: 48"W x 24"D x 72"H

Brand: WORKPRO

## 1. SAFETY INFORMATION

Please read and understand all safety information before assembling or using this shelving unit.

- Do not exceed the maximum weight limit of 4000 lbs for the entire unit.
- Each individual shelf has a maximum capacity of 800 lbs. Do not overload shelves.
- Ensure proper assembly for stability. All connections must be securely fastened.
- Be cautious when adjusting the height of the shelves to prevent injury.
- Always use a rubber mallet for assembly to ensure components are fully seated and secure.
- Place the unit on a flat, stable surface.
- Keep children and pets away from the assembly area.

## 2. PRODUCT OVERVIEW

The WORKPRO 5-Tier Heavy Duty Metal Shelving Unit is designed for robust storage and organization in various environments such as garages, basements, warehouses, workshops, kitchens, and more. Its boltless design allows for easy assembly, and the adjustable shelves provide versatile storage solutions.

### Key Features:

- **5-Tier Design:** Provides ample storage space.
- **Heavy Duty Construction:** Made from durable metal with a powder-coated finish for corrosion and rust resistance.
- **Adjustable Height:** Shelves can be adjusted to suit various item sizes.
- **Boltless Assembly:** Quick and easy setup without the need for nuts or bolts.
- **High Load Capacity:** Up to 4000 lbs total, 800 lbs per shelf.
- **Non-Slip Footpads:** Protects floors and adds stability.

### 3. SETUP AND ASSEMBLY

This shelving unit features a boltless design for straightforward assembly. A rubber mallet is recommended to ensure all

components are securely fitted.

## Assembly Steps:

1. **Prepare Components:** Unpack all parts and ensure you have all necessary components.
2. **Install Footpads:** Attach the rubber footpads to the bottom of the vertical posts to protect your floor and enhance stability.
3. **Assemble Base Frame:** Connect the bottom horizontal beams to the vertical posts. Ensure the longer ledge of the beams is on top and the narrow end of the keyhole slots on the posts face down for proper engagement. Use a rubber mallet to tap connections securely.
4. **Build Upright Structure:** Continue adding vertical posts and horizontal beams for each tier. The height of each shelf can be adjusted to your preference by selecting different keyhole slots.
5. **Insert Support Rods:** For each shelf, insert the support rods into the designated slots on the horizontal beams.
6. **Place Wire Shelves:** Lay the wire shelves onto the assembled frames. Ensure the wires of each shelf are underneath the support rods for maximum stability and load distribution.
7. **Secure All Connections:** Once all tiers are assembled, go back and firmly tap all connections with a rubber mallet to ensure they are fully seated and secure.

## Assembly Options:

The unit can be assembled in two configurations:

- **Single 5-Tier Unit:** A full-height unit measuring 48"W x 24"D x 72"H.
- **Two Separate Units:** The unit can be split into a 3-tier shelving unit (approximately 36"H) and a 2-tier shelving unit (approximately 38"H) for increased versatility.

## 4. OPERATING AND USAGE

The WORKPRO shelving unit is designed for versatile storage across various settings. Proper loading and placement are crucial for safety and longevity.

### Loading Guidelines:

- Distribute weight evenly across each shelf.
- Place heavier items on lower shelves for increased stability.
- Do not exceed 800 lbs per shelf or 4000 lbs total for the entire unit.

### Recommended Uses:

This unit is suitable for organizing items in:

- Garages

- Basements
- Warehouses
- Workshops
- Kitchens
- Living Rooms
- Closets
- Bedrooms
- Offices

## 5. MAINTENANCE

---

To ensure the longevity and appearance of your WORKPRO shelving unit, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the unit with a dry cloth to remove dust and debris. Avoid abrasive cleaners that could damage the powder-coated finish.
- **Inspection:** Periodically check all connections to ensure they remain tight and secure. Re-tap with a rubber mallet if any looseness is detected.
- **Load Management:** Regularly review the items stored on the shelves to ensure weight limits are not exceeded and weight is distributed evenly.

## 6. TROUBLESHOOTING

---

If you encounter any issues with your shelving unit, consider the following common solutions:

- **Unit feels unstable:** Ensure all beams are fully seated into the keyhole slots. Use a rubber mallet to firmly tap all connections. Verify the unit is on a level surface.
- **Shelves are sagging:** Check if the weight on the shelf exceeds the 800 lbs limit. Redistribute items or remove excess weight. Ensure support rods are correctly installed and the wire shelves are placed with wires underneath.

- **Difficulty during assembly:** Confirm that the narrow end of the keyhole slots on the vertical posts are facing downwards. Ensure the longer ledge of the horizontal beams is on top. A rubber mallet is essential for proper seating of components.

## 7. SPECIFICATIONS

---

Feature	Detail
Product Dimensions	24"D x 48"W x 72"H
