# Yaheetech HWOA-100/2FR(0.2A)

# Yaheetech 4.5ft Pre-lit Snow Flocked Artificial Christmas Tree Instruction Manual

Model: HWOA-100/2FR(0.2A)

#### 1. IMPORTANT SAFETY INFORMATION

- · Read all instructions before assembly and use.
- · Keep children and pets away from the tree during assembly.
- Do not overload electrical outlets. Ensure all light connections are secure.
- Do not place the tree near heat sources or open flames.
- Unplug the tree when leaving the house, going to bed, or when not in use for extended periods.
- For indoor use only.

#### 2. PACKAGE CONTENTS

Please ensure all parts are present before beginning assembly:

- Tree Sections (typically 2-3 sections for 4.5ft tree)
- Foldable Metal Stand
- Stand Screws (3-4 pieces)
- Protective Plastic Caps for Stand Feet
- Brown Paper (for assembly cleanup)

#### 3. ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your Yaheetech Pre-lit Snow Flocked Artificial Christmas Tree:

## 1. Step 1: Prepare the Area and Stand

Place the provided brown paper on the floor where you intend to set up the tree to catch any loose flocking during assembly. Unfold the metal stand and insert the protective plastic caps onto each foot. Secure the stand by tightening the screws.

**Description:** This image illustrates the initial steps of assembly, including placing protective caps on the foldable metal stand and laying down brown paper to manage any flocking debris.

## 2. Step 2: Assemble the Tree Sections

Insert the bottom tree section into the assembled metal stand. Ensure it is firmly seated. Then, insert the middle section into the top of the bottom section, aligning the poles. Finally, insert the top section into the middle section.

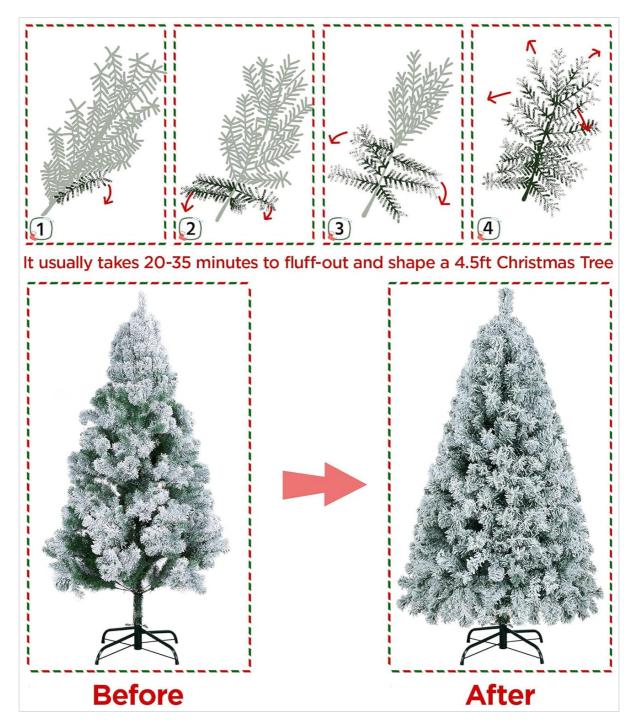

**Description:** A close-up view of the tree's hinged branch system, demonstrating how branches are attached to the central trunk for easy assembly and shaping.

**Description:** This video demonstrates the step-by-step process of setting up the Christmas tree, including assembling the stand, inserting tree sections, and fluffing branches. It highlights the ease of assembly for the Yaheetech tree.

#### 3. Step 3: Fluff the Branches

Starting from the bottom section and working your way up, gently pull apart and spread out each branch tip. Bend the smaller tips to fill in any gaps and create a full, natural appearance. This process may take 20-35 minutes for a 4.5ft tree.

**Description:** This image provides a visual guide to fluffing the tree branches, showing the tree's appearance before and after fluffing, along with detailed diagrams on how to properly spread out the branch tips for a fuller look.

# 4. Step 4: Connect the Lights

Locate the light connectors between each tree section and securely plug them together. Ensure all connections are tight to ensure proper illumination. Plug the main power cord into a suitable electrical outlet.

**Description:** This video showcases the Yaheetech Pre-lit Christmas Tree with Warm White Lights, demonstrating its appearance and the warm glow it provides once fully assembled and lit. It offers a general overview of the product's aesthetic.

#### 4. OPERATING INSTRUCTIONS

To turn the tree lights on, simply plug the power cord into a standard electrical outlet. To turn them off, unplug the power cord. There is no separate switch for the lights.

#### 5. MAINTENANCE

## Cleaning:

Dust the tree periodically with a soft, dry cloth. Do not use liquid cleaners or solvents, as these may damage the flocking or lights.

## Storage:

Once the festive season is over, carefully disassemble the tree by reversing the assembly steps. Gently compress the branches. Store the tree sections and stand in their original packaging or a suitable storage bag in a cool, dry place away from direct sunlight.

#### 6. TROUBLESHOOTING

- **Lights Not Working:** Check all electrical connections between tree sections and ensure the main power cord is securely plugged into a working outlet. Inspect individual bulbs for damage; replace any burnt-out bulbs if possible (check manufacturer's guidelines for bulb replacement).
- **Tree Appears Sparse:** Ensure all branches have been thoroughly fluffed and spread out. The initial fluffing process is crucial for achieving a full appearance.
- Tree is Unstable: Verify that the metal stand is fully unfolded and the securing screws are tightened. Ensure the bottom tree section is properly seated in the stand.

## 7. SPECIFICATIONS
